MATERIALS SCIENCE & ENGINEERING B

# Cumulative Author Index for Volumes 21–30

The volume numbers are given in bold-face preceding the page numbers.

**A**
Abd-Shukor, R., **23**, 54
Abell, J.S., **21**, 19
Abernathy, C., **28**, 232
Abernathy, C.R., **23**, 36; **25**, 179
Abid, H., **25**, 159
Abraham, P., **21**, 257
Accard, A., **28**, 293
Acciarri, M., **24**, 159
Acerboni, S., **24**, 159
Achour, S., **24**, 141
Adhikari, T., **27**, 39
Agarwal, A., **24**, 43
Agne, M., **21**, 217
Ait-Lhouss, M., **28**, 155
Ajo, D., **28**, 224
Akasaki, I., **26**, L5
Akhtar, M., **26**, 41
Al-Kotb, M., **27**, 1
Alam, M., **27**, 81
Albrecht, T.F., **21**, 249
Alconchel, S.A., **27**, 117
Alexander, H., **24**, 1, 56
Alexandre, F., **28**, 151, 261
Alfuso, S., **28**, 43
Allain, J., **29**, 105
Allegri, P., **28**, 174, 469
Allen, E.M., **21**, 130
Altmann, A., **28**, 481
Alvarez, A., **28**, 111
Alvarez, A.-L., **21**, 262
Amaku, C.A., **24**, 8
Amano, H., **26**, L5
Amanuma, K., **22**, 133
Amar, J.G., **30**, 149
Amiotti, M., **28**, 337
Anderson, N.G., **21**, 237
Ando, E., **27**, 109
Andre, J., **28**, 179, 289
Andreev, A., **29**, 190, 194, 198
Angadi, M., **25**, L7; **30**, 35
Angadi, M.A., **21**, L1; **23**, L1
Anikin, M., **29**, 190, 90
Ansari, F., **26**, 13
Aouba, S., **28**, 408
Aourag, H., **25**, 159
Apel, U., **29**, 13
Aragon, G., **28**, 196, 515
Arai, T., **27**, L5
Araujo, D., **24**, 124; **28**, 497; **28**, 515
Arena, C., **21**, 189; **28**, 327
Arnaud, G., **29**, 138, 160
Arokiaraj, J., **28**, 461
Arshak, K.I., **26**, 13
Arulkumaran, S., **28**, 461
Asonen, H., **21**, 211
Aspar, B., **29**, 24
Aspnes, D., **30**, 109
Attolini, G., **28**, 164
Aubel, D., **29**, 110
Aulombard, R.L., **21**, 169
Autran, J.L., **23**, 120
Avanzini, V., **28**, 174, 469
Avella, M., **28**, 111
Azzini, G.A., **24**, 175

Materials Science and Engineering B33 (1995) 10–47

MATERIALS SCIENCE & ENGINEERING A

# Cumulative Subject Index for Volumes 21–30

The volume numbers are given in bold-face preceding the page numbers.

A
A.c. conductivity and electric modulus
a.c. conductivity and electric modulus behavior of the vitreous system $AgI-Ag_2O-[XSeO_2-(1-x)V_2O_5]$, **25**, 135
Absorption
absorption coefficient and exciton oscillator strengths in InGaAs/InP multi-quantum wells, **21**, 189
optical characterization of $As_2S_3$ and $As_2Se_3$ semiconducting glass films of non-uniform thickness from transmission measurements, **25**, 53
optical cross-sections and distribution of $Fe^{2+}$ and $Fe^{3+}$ in semi-insulating liquid encapsulated Czochralski grown InP:Fe, **21**, 321
Acoustic microscopy
scanning electron acoustic microscopy of electronic materials, **24**, 209
Adatoms
ab initio studies of single-height Si(001) steps, **30**, 167
Adhesion
diamond, diamond-like and titanium nitride biocompatible coatings for human body parts, **25**, 5
effect of pressure during deposition on the growth of gold thin films onto polycrystalline $\gamma$-$Al_2O_3$, **25**, 111
improved metal–dielectric adhesion for interconnect lines of MMICs and ICs: an experimental study, **28**, 357
Admittance
determination of donor and acceptor level energies by admittance spectroscopy in 6H SiC, **29**, 122
After glow
study of the photodecay in CdTe X-ray detectors, **28**, 47
AlGaAs
studies of deep-level defects at III–V heterointerfaces, **28**, 387
AlInAs
deep-level characterization of $Al_xIn_{1-x}As$ layers grown by low pressure metal–organic chemical vapor deposition, **28**, 421
Alkali halides
electrical conduction in MnTe and MnSe films, **21**, L1
Alloys
blue diode lasers and visible optoelectronic devices, **21**, 205
chemical beam epitaxy and photoluminescence characteristics of InGaAsP/InP BRAQWET modulators, **21**, 293
influence of hydrogen on the hyperfine field of amorphous $Fe_{83.3}Si_{3.5}B_{11.2}C_2$ alloy, **25**, 20
low temperature specific heat studies of amorphous and crystalline Er–Ru alloys, **23**, 66
metastable electrical activity of misfit-dislocation-associated defects in Si/Si(Ge) heteroepitaxial structures: EBIC/DLTS correlation, **24**, 43
stability of cubic $ZrO_2$ (10 mol.% $Y_2O_3$) when alloyed with NiO, $Al_2O_3$ or $TiO_2$: implications to solid electrolytes and cermets, **22**, 247
Alumina
growth of diamond on Au (selective) and $Al_2O_3$ surfaces, **26**, 41
Aluminium
aluminium-free 980 nm laser diodes, **21**, 211
deep centers and electroluminescence in 4H–SiC diodes with a p-type base region, **29**, 181
LBIC and diffusion length mapping applied to the investigation of gettering by aluminium diffusion in multicrystalline silicon, **24**, 188
photo-assisted direct writing of conducting aluminum, **30**, L5
Aluminium antimonide
intersubband transitions in InAs/AlSb quantum wells, **21**, 201
optical properties of GaSb–AlSb heterostructures grown by molecular beam epitaxy, **21**, 185
Aluminium arsenide
cation dependence of the electronic structure of AlAs and GaAs, **25**, 79
second harmonic generation via excitations between valence sub-bands in p-type GaAs–AlAs and Si–SiGe quantum well structures, **21**, 296
Aluminium oxide
effect of pressure during deposition on the growth of gold thin films onto polycrystalline $\gamma$-$Al_2O_3$, **25**, 111
Amorphous materials
a study on the preparation and magnetic properties of $Fe_{100-x}B_x$ ultrafine amorphous powders, **25**, 193
elaboration, characterization and electrical properties of Na–Al–O thin films, **26**, 181
influence of preparation procedure on some physical properties of BICUVOX, **21**, 70
many-particle theory of electron transport processes in transition liquid and amorphous metals, **26**, 141
reactive ion etching characterization of a-SiC:H in $CF_4/O_2$ plasma, **29**, 176
X-ray photoelectron spectroscopy study of $Sn^+$ implanted a-$Si_{1-x}C_x$:H thin films, **29**, 165
Amorphous silicon
characterization of the heterostructure between heteroepitaxially grown $\beta$-$FeSi_2$ and (111) silicon, **21**, 270

Annealing
an electron spin resonance study of the effect of thermal history on the structure of potassium silicate glasses, **26**, 35
conductivity and phase structure of blend based proton polymeric electrolytes II: Ammonium salts complexes, **22**, 117
contact resistivity of Re, Pt and Ta films on n-type β-SiC: preliminary results, **29**, 185
deep levels in rapid thermal annealed GaAs, **28**, 439
defect production and annealing in ion implanted silicon carbide, **29**, 142
effects of Ar and $H_2$ annealing on the electrical properties of oxides on 6H SiC, **29**, 131
electronic structure of non-stoichiometric Ga-As compounds, **22**, 290
influence of rapid thermal annealing on the properties of $SnO_2$ thin films, **30**, 1
mapping of GaAs wafers by IR light diffraction and luminescence, **28**, 448
preparation and characterization of semi-insulating 2 in InP wafers having a low Fe content by wafer annealing, **28**, 115
redistribution and incorporation of Si in GaAs due to indium doping, **26**, 7
relaxation of strained InGaAs/GaAs layers under thermal processing, **28**, 507
scanning deep-level transient spectroscopy investigations on gallium arsenide, **24**, 28
silicon on thin insulator: prediction of the oxygen fluence required for the formation of a continuous buried oxide, **22**, 172
simulation of lateral Al recoil atoms and damage defects gradients in a GaAs/GaAlAs quantum well created by masked ion implantation, **21**, 284
spectroscopic investigation of deep levels related to the compensation mechanism of nominally undoped semi-insulating InP, **28**, 101
time evolution of dislocation formation in ion implanted silicon, **25**, 60
vacancy controlled interdiffusion in III–V heterostructures, **21**, 281
Antimony
development of (001) texture of MnSb in thin films prepared by interdiffusion of Mn/Sb multilayers, **27**, 109
Antiphase domains
structural properties of GaAs/Ge heterostructures as a function of growth conditions, **28**, 502
Arsenic
*in situ* growth of Y–Ba–Cu–O films by ion beam sputtering, **22**, 165
molten salt synthesis and dielectric properties of Pb$(Fe_{1/2}Nb_{1/2})O_3$–$Pb(Fe_{1/2}Ta_{1/2})O_3$ (PFN–PFT) solid solutions, **22**, 133
Atomic layer MBE
photoluminescence study of surface segregation of In in InGaAs-based structures grown by MBE and atomic layer MBE, **28**, 469
Atomic ordering
two-dimensional phase separation and surface-reconstruction driven atomic ordering in mixed III–V layers, **30**, 187
Auger electron spectroscopy
carbonization of Si surfaces by solid source molecular beam epitaxy, **29**, 138
characterization study of CdS passivation layers on $Hg_xCd_{1-x}Te$, **28**, 43
growth and characterization of anodic sulphide films on $Hg_{0.80}Cd_{0.20}Te$ grown from freshly prepared solution and stored solution, **26**, L1
sputtering effects in hexagonal silicon carbide, **29**, 94
**B**
Band structure calculations
the bulk and surface states of GaSb/AlSb/InAs superlattice, **25**, 99
the pseudobinary alloy (Ga,Al)As under hydrostatic pressure, **25**, 159
Band structure of crystalline semiconductors and insulators
the optical properties and electronic transitions of cubic and hexagonal GaN films between 1.5 and 10 eV, **29**, 65
Barium niobium oxynitride
preparation of oxynitride thin films of $BaNb(O_yN)_x$ and $LaNb(O_yN_2)_x$ using reactive sputtering from multiphase powder targets, **25**, 197
Barium titanate
current-limiting property of n-$BaTiO_3$ ceramics, **25**, 119
preparation and characterization of spray-pyrolysed $BaTiO_3$ films, **25**, 34
Barium zirconate
pathways for the low temperature synthesis of nano-sized crystalline barium zirconate, **23**, 29
Base doping
effect of base dopant species on heterojunction bipolar transistor reliability, **28**, 232
Beam injection methods
what information on extended defects do we obtain from beam-injection methods?, **24**, 1
Beam-induced defects
quantitative studies of beam-induced defects in III–V compounds by cathodoluminescence and transmission electron microscopy, **24**, 130
Bean-curd refuse
preparation of SiC and $Si_3N_4$ whiskers using bean-curd refuse as the Si source, **30**, 13
Beryllium
p-dopant incorporation and influence on gain and damping behaviour in high-speed GaAs-based strained MQW lasers, **21**, 232
Bismuth
development of microstructure and superconductivity of silver-clad Bi(2223) composite tapes in the process of heat treatment, **23**, 58
effects of starting powder with various high *Tc* phase contents on the expansion of Bi–Pb–Sr–Ca–Cu–O pellets, **25**, 68
investigations on the texture of Bi-based superconductor tapes, **23**, 1
measurements of interdiffusion in compositionally modulated amorphous Ni/Si multilayers by *in situ* X-ray diffraction, **22**, 211
Bismuth glasses
d.c. and a.c. electrical properties of amorphous $Bi_4Sr_3Ca_3Cu_4O_{16}$, **26**, 103
Bistability
phenomenon of bistability in luminescence, **28**, 444
Borides
boron-rich solids: a chance for high-efficiency high-temperature thermoelectric energy conversion, **29**, 228
Boron
a study on the preparation and magnetic properties of $Fe_{100-x}B_x$ ultrafine amorphous powders, **25**, 193
are polytype transitions possible during boron diffusion?, **29**, 99

conductivity and phase structure of blend based proton polymeric electrolytes II: Ammonium salts complexes, **22**, 117
Bragg
characterization of Bragg reflector structures using scanning reflectance spectral mapping, **28**, 457
Bridgman growth
segregation in Bridgman grown ingots of $Hg_{1-x}Cd_xTe$, **27**, L17
Brillouin scattering
optical characterization of chemical beam epitaxy grown $Ga_{0.52}In_{0.48}P$ layers and related microstructures, **28**, 151

**C**

Cadmium sulphide
cathodoluminescence dependence on electron beam diameter, **24**, 141
cathodoluminescence imaging of dislocations in CdS: a new defocused-mirror technique, **24**, 105
characterization study of CdS passivation layers on $Hg_xCd_{1-x}Te$, **28**, 43
phenomenon of bistability in luminescence, **28**, 444
Cadmium telluride
new developments in the liquid-phase epitaxy of $Hg_{1-x}Cd_xTe$, **28**, 21
optical investigation of interdiffusion in CdTe/CdMnTe quantum wells, **21**, 274
quantum confined Stark effect (QCSE) and self-electro-optic effect device (SEED) in II–VI heterostructures, **21**, 224
study of the photodecay in CdTe X-ray detectors, **28**, 47
Calcium diarsenide
study of $Eu^{3+}$-doped luminescence glasses prepared by a sol–gel process, **21**, 55
Calcium lanthanum sulphide
the effects of sulphurizing agent on the formation of calcium lanthanum sulphide, **26**, 29
Capacitance–voltage
determination of carrier and impurity profiles in doped n-type quantum well structures, **28**, 341
Capacitors
$NdGaO_3$ substrates with defined grain boundaries prepared by welding or soldering, **21**, 36
the properties of heavily compensated high resistivity GaSb crystals, **22**, 279
Carbides
boron-rich solids: a chance for high-efficiency high-temperature thermoelectric energy conversion, **29**, 228
Carbon
GaInP/GaAs heterojunction bipolar transistors grown by low pressure metalorganic chemical vapour deposition for voltage-controlled oscillators and power amplifier microwave monolithic integrated circuits, **28**, 242
stability of cubic $ZrO_2$ (10 mol.% $Y_2O_3$) when alloyed with NiO, $Al_2O_3$ or $TiO_2$: implications to solid electrolytes and cermets, **22**, 247
Carbon fibers
fluorine-intercalated carbon fibers II: An X-ray photoelectron spectroscopy study, **30**, 61
Carbon nitride films
ion-assisted laser processing of $CN_x$ films, **26**, 49
Carrier concentration
determination of carrier and impurity profiles in doped n-type quantum well structures, **28**, 341
Catalysis
surface *vs.* bulk composition of an oxidic Fe–Mo multicomponent catalyst, **25**, 1
Cathodoluminescence
basic dislocation contrasts in SEM-CL/EBIC on III–V semiconductors, **24**, 115
cathodoluminescence and electron-beam-induced current investigations of single dislocations in GaAs, **24**, 112
cathodoluminescence dependence on electron beam diameter, **24**, 141
cathodoluminescence from defects in electron-irradiated InP, **24**, 135
cathodoluminescence imaging of dislocations in CdS: a new defocused-mirror technique, **24**, 105
cathodoluminescence imaging of misfit dislocations in Si/SiGe epitaxial layers: the influence of transition metal contamination, **24**, 48
EBIC and cathodoluminescence evaluation of III–V compounds, **24**, 35
modulated cathodoluminescence for extended defect characterization, **24**, 121
modulated electron-beam-induced current and cathodoluminescence, **24**, 23
quantitative studies of beam-induced defects in III–V compounds by cathodoluminescence and transmission electron microscopy, **24**, 130
CdSe
persistent spectral hole burning in semiconductor microcrystals, **27**, L5
CdZnTe
chemical etching of CdZnTe (111) surfaces, **27**, L11
Ceramics
a.c. and d.c. susceptibility studies on silver-doped BPSCCO (2223) superconductors, **26**, 151
effect of temperature on the electrical resistivity of $YBa_2Cu_3O_{7-x}$ filled polyethylene, **27**, 13
effects of starting powder with various high *Tc* phase contents on the expansion of Bi–Pb–Sr–Ca–Cu–O pellets, **25**, 68
influence of carbon on the phase transformation kinetics and magnetic properties of Mn–Al alloys, **22**, 256
microstructural study of melt-processed $YBa_2Cu_3O_{7-\delta}$ thick films on yttria-stabilized zirconia, **21**, 19
optical effects of buried conductive layers formed by MeV ion implantation, **22**, 297
rapid consolidation of Bi–Pb–Sr–Ca–Cu–O powders by a plasma activated sintering process, **26**, 55
study of the equilibrium processes in the gas phase during silicon carbide sublimation, **21**, 65
wetting of Si–Al–O–N ceramic by Sn–5at.%Ti–X ternary active solder, **25**, 39
Chalcogenides
Au spreading on GaSb substrates, **21**, 94
influence of the boundary on the interdiffusion in heterostructures, **26**, 147
tungsten diselenide thin films synthesized on tungsten foils, **26**, 67
Chalcopyrites
Vickers microhardness of semiconductor $CuInSe_2$, **27**, 1
Characterization
study of SiC single-crystal sublimation growth conditions, **29**, 90
Charge pumping
use of the charge pumping technique to understand non-uniform *n*-channel MOSFET degradation, **23**, 120
Chemical beam epitaxy
absorption coefficient and exciton oscillator strengths in InGaAs/InP multi-quantum wells, **21**, 189
chemical beam epitaxial growth of GaAs from tertiarybutylarsine and triethylgallium precursors, **28**, 155

chemical beam epitaxy and photoluminescence characteristics of InGaAsP/InP BRAQWET modulators, **21**, 293
chemical beam epitaxy of high purity InP using tertiarybutylphosphine and 1,2 bis-phosphinoethane, **21**, 165
ESPRIT MORSE: research for novel metal–organic precursors, **21**, 147
evaluation of III-V growth technologies for optoelectronic applications, **21**, 120
optimization of growth parameters of short period InGaAs/InP superlattices for Wannier–Stark modulators, **28**, 305
Chemical etching
chemical etching of CdZnTe (111) surfaces, **27**, L11
Chemical treatment
chemical treatment of photoluminescent porous silicon, **23**, 13
Chemical vapour deposition
chemical vapour deposition of diamond from a novel capacitively coupled r.f. plasma source, **29**, 216
growth of a Ge/Si/Ge(100) heterostructure by very low pressure chemical vapour deposition using $Si_2H_6$ and $GeH_4$ gases—photoemission and low energy electron diffraction studies, **28**, 14
growth of thin β-SiC layers by carbonization of Si surfaces by rapid thermal processing, **29**, 170
influence of temperature on the properties of $SiC_xN_y$:H films prepared by plasma-enhanced chemical vapour deposition, **26**, 133
metal–organic chemical vapor deposition growth of GaN, **29**, 58
$NdGaO_3$ substrates with defined grain boundaries prepared by welding or soldering, **21**, 36
oxygen ion conductivity in $Ba_3In_{3-x}Zr_xO_{7.5+x/2}$ ($x = 0.7$–1.3), **22**, 313
photo-assisted direct writing of conducting aluminum, **30**, L5
photoluminescence and electroluminescence processes in $Si_{1-x}Ge_x$/Si heterostructures grown by chemical vapor deposition, **21**, 307
structural and electronic characterization of β-SiC films on Si grown from mono-methylsilane precursors, **29**, 154
structure of nitrogen-substituted graphite prepared by chemical vapor deposition, **29**, 220
study of the growth rate of diamond film by hot-filament CVD, **25**, 47
unintentional incorporation of contaminants during chemical vapour deposition of silicon carbide, **29**, 134
Clusters
effect of pressure during deposition on the growth of gold thin films onto polycrystalline γ-$Al_2O_3$, **25**, 111
kinetics of epitaxial growth and roughening, **30**, 149
CMZP ceramic
thermal diffusivity, specific heat, and thermal conductivity of $(Ca_{1-x},Mg_x)Zr_4(PO_4)_6$ ceramic, **23**, 94
Cobalt
preperation of Co/Pd multilayer films by laser ablation deposition, **23**, 25
Compositional drifting
molecular beam epitaxial growth and characterization of II–VI blue–green laser diodes having continuous-wave operation at room temperature, **28**, 51
Compound semiconductors
Au spreading on GaSb substrates, **21**, 94
cathodoluminescence from defects in electron-irradiated InP, **24**, 135
cathodoluminescence imaging of dislocations in CdS: a new defocused-mirror technique, **24**, 105
growth and characterization of III–V materials grown by vapor-pressure-controlled Czochralski method comparison with standard liquid-encapsulated Czochralski materials, **28**, 65
Conductivity
conductivity and phase structure of blend based proton polymeric electrolytes I: Complexes with phosphoric acid, **22**, 107
far-infrared spectra of lithium–titanium mixed ferrites, **22**, 201
gamma-ray diffraction in the study of silicon, **22**, 149
microstructural study of melt-processed $YBa_2Cu_3O_{7-\delta}$ thick films on yttria-stabilized zirconia, **21**, 19
study of $Eu^{3+}$-doped luminescence glasses prepared by a sol–gel process, **21**, 55
Contact metallurgy
a common metallization scheme for ohmic contacts to n-type and p-type GaAs: the Al–Ni–Sn system, **27**, L21
high temperature contacts to chemically vapour deposited diamond films—reliability issues, **29**, 206
X-ray photoelectron spectroscopy analyses of the surface and interface of Pd-based p-GaP ohmic contact layer, **25**, 24
Contact resistance
a common metallization scheme for ohmic contacts to n-type and p-type GaAs: the Al–Ni–Sn system, **27**, L21
ineffective grain boundaries and breakdown threshold of zinc oxide varistors, **22**, 261
interfacial reactions of W thin film on single-crystal (001) β-SiC, **29**, 126
tungsten metallization technology for high temperature silicon-on-insulator devices, **29**, 18
Contact resistivity
contact resistivity of Re, Pt and Ta films on n-type β-SiC: preliminary results, **29**, 185
Convolution
the problem of convolution in the simulation of multicrystal X-ray rocking curves of semiconductor materials, **28**, 523
Copper
Γ radiation–hydrothermal synthesis and characterization of nanocrystalline copper powders, **23**, 116
copper diffusivity in silicon: A re-examination, **25**, 141
measurements of interdiffusion in compositionally modulated amorphous Ni/Si multilayers by *in situ* X-ray diffraction, **22**, 211
perpendicular electrical conduction in Cu/Mn multilayer films, **23**, L1
selectivity in low pressure chemical vapor deposition of copper from hexafluoroacetylacetonate-copper(I)-trimethylvinylsilane in the presence of water, **23**, 48
vibrational diagnostics of the epitaxial growth of ultrathin films of sodium on Cu(001), **23**, 123
Copper oxide
dielectric relaxations in ceramics with compositions $(1-x)Pb(Mg_{1/3}Nb_{2/3})O_3 - xPbTiO_3$ ($x = 0$, 0.05, 0.10 and 0.25), **22**, 303
Cross-sectional tunneling microscopy
cross-sectional scanning tunneling microscopy on semiconductor heterostructures, **24**, 213
Crystal defects
$HBr–K_2Cr_2O_7–H_2O$ etching system for indium phosphide, **28**, 488
Crystal growth
effects of thermal annealing on the properties of zirconia films prepared by ion-assisted deposition, **21**, 10
study of SiC single-crystal sublimation growth conditions, **29**, 90

synthetic diamond: the optical band at 1.883 eV, **21**, 329
the effects of deposition conditions on microstructure and morphology of r.f.-magnetron sputtered GdTbFeCo thin films, **21**, 77
thermal analysis of liquid-encapsulated Czochralski-grown InP crystals, **28**, 72
Crystalline orientation
orientation dependence of morphology of (Hg, Cd)Te films grown by isothermal vapor phase epitaxy, **27**, 87
Crystallization
copper doping of GaSb single crystals, **28**, 138
energy functions, structure, mechanism of solidification, modulus of rupture and tensile tests of the binary organic eutectic system benzoic acid–diphenylamine, **25**, 11
growth and characterization of 2 in InP crystals by the vertical gradient freeze technique, **28**, 91
investigation of the role of the crystal growth zone during silicon carbide crystal growth by the sublimation method, **27**, 69
recrystallization of strained $Ge_xSi_{1-x}$/Si layers with various Ge gradients and in the presence of impurities, **28**, 9
study of the concentration distribution of SiC vapour in the crystal growth zone, **21**, 83
the Czochralski growth of $SrLaGa_3O_7$ single crystals and their optical and lasing properties, **26**, 201
undoped GaAs grown by the vertical gradient freeze method: growth and properties, **28**, 87
CuCl
persistent spectral hole burning in semiconductor microcrystals, **27**, L5
Cu(hfa)TMVS
selectivity in low pressure chemical vapor deposition of copper from hexafluoroacetylacetonate-copper(I)-trimethylvinylsilane in the presence of water, **23**, 48
$Cu_2Mg_3(PO)_4$
the preparation, structure, magnetic and electrical properties of $Cu^{I}Cu^{II}Mg_3(PO_4)_3$, **23**, 88
Czochralski
growth and characterization of III–V materials grown by vapor-pressure-controlled Czochralski method comparison with standard liquid-encapsulated Czochralski materials, **28**, 65

**D**

DCXRD
strain reduction in the Si overlayer for improved SIMOX material, **29**, 29
Deep level transient spectroscopy
light-beam-induced transient spectroscopy of oxidation-induced stacking faults in silicon, **24**, 167
scanning deep-level transient spectroscopy investigations on gallium arsenide, **24**, 28
Deep levels
deep-level characterization of $Al_xIn_{1-x}As$ layers grown by low pressure metal–organic chemical vapor deposition, **28**, 421
spectroscopic investigation of deep levels related to the compensation mechanism of nominally undoped semi-insulating InP, **28**, 101
Defect formation
a study of the growth and shrinkage of stacking faults in SIMOX, **29**, 24
analysis of IR absorption mapping of defects in liquid-encapsulated Czochralski GaAs, **28**, 130
characterization of the strength and position of semiconductor defects by the multielectrode EBIC (OBIC) method, **24**, 87
copper diffusivity in silicon: A re-examination, **25**, 141
deep centers and electroluminescence in 4H–SiC diodes with a p-type base region, **29**, 181
deep levels in rapid thermal annealed GaAs, **28**, 439
deep-level states and electrical properties of GaAs grown at 250°C, **28**, 393
defects in GaAs after Si indiffusion and annealing: a TEM and CL study, **30**, 43
diffusion controlled degradation analysis of high temperature $(Bi,Sb)_2(Te,Se)_3$ semiconductor thermoelectric power modules, **29**, 233
electron-beam-induced activity of defects in silicon, **24**, 8
growth and characterization of 2 in InP crystals by the vertical gradient freeze technique, **28**, 91
macrodefect formation in semiconductors during high energy ion implantation: Monte Carlo simulation of damage depth distributions, **29**, 202
mechanisms of strain release in molecular beam epitaxy grown InGaAs/GaAs buffer heterostructures, **28**, 510
molecular beam epitaxial growth and characterization of II–VI blue–green laser diodes having continuous-wave operation at room temperature, **28**, 51
observation of Si out-diffusion related defects in SiC growth on Si(001), **29**, 110
potential sources of degradation in InGaAs/GaAs laser diodes, **28**, 310
sensitivity to electrostatic discharges of 'low-cost' 1.3 $\mu$m laser diodes: a comparative study, **28**, 314
strain reduction in the Si overlayer for improved SIMOX material, **29**, 29
structural characterization of heavily Zn-doped liquid encapsulated Czochralski InP, **28**, 120
theory of combined acousto-photo-thermal spectral decomposition in condensed phases: parametric generation of thermal waves by a non-stationary ('breathing') sub-surface defect, **26**, 121
transmission electron microscopy investigation of extended defects in heavily Se-doped bulk GaSb, **28**, 142
Defects
an electron-beam-induced current study of dislocations in GaAs, **24**, 91
apparatus for digital electron-beam-induced current imaging, **24**, 64
cathodoluminescence and electron-beam-induced current investigations of single dislocations in GaAs, **24**, 112
cathodoluminescence dependence on electron beam diameter, **24**, 141
cathodoluminescence from defects in electron-irradiated InP, **24**, 135
dielectric relaxation of paired defects in perovskite-type oxides, **23**, 19
electron-beam-induced current and atomic force microscopy studies on silicon etch steps created by reactive ion etching and reactive ion beam etching, **24**, 223
energy functions, structure, mechanism of solidification, modulus of rupture and tensile tests of the binary organic eutectic system benzoic acid–diphenylamine, **25**, 11
influence of surface treatment on electrical activity of dislocations and minority carrier diffusion length in cast multicrystalline silicon, **24**, 74
light-beam-induced transient spectroscopy of oxidation-induced stacking faults in silicon, **24**, 167
luminescence from rod-like defects and hydrogen related centres in silicon, **24**, 144
mapping of defects and their recombination strength by a light-beam-induced current in silicon wafers, **24**, 152

measurements of carrier diffusion length in processed wafers: correlation with the electrical behaviour, **24**, 192
metastable electrical activity of misfit-dislocation-associated defects in Si/Si(Ge) heteroepitaxial structures: EBIC/DLTS correlation, **24**, 43
modelling the effects of piezoelectrically active defects and their impact on the threshold voltage of GaAs metal–semiconductor field effect transistors, **28**, 248
modulated cathodoluminescence for extended defect characterization, **24**, 121
optical characterization of deep states associated with oxidation-induced stacking faults in silicon, **24**, 170
optical-beam-induced current and photoluminescence techniques for localization of crystallographic defects in optoelectronic devices, **24**, 175
phase equilibria and thermodynamics of solid state contact reactions in the ternary Ta–Ga–As system, **22**, 141
scanning deep-level transient spectroscopy investigations on gallium arsenide, **24**, 28
thermodynamic aspects of (Te, S)-double-doped GaSb crystal growth, **21**, 14
two types of electron-beam-induced current behaviour of misfit dislocations in Si(Ge): experimental observations and modelling, **24**, 78

Degradation
potential sources of degradation in InGaAs/GaAs laser diodes, **28**, 310
use of the charge pumping technique to understand non-uniform *n*-channel MOSFET degradation, **23**, 120

Deuterium
luminescence from rod-like defects and hydrogen related centres in silicon, **24**, 144

Devices
scanning force microscopy of semiconductor materials and devices, **24**, 203

Diamond
boron doped diamond films: electrical and optical characterization and the effect of compensating nitrogen, **29**, 211
chemical vapour deposition of diamond from a novel capacitively coupled r.f. plasma source, **29**, 216
diamond, diamond-like and titanium nitride biocompatible coatings for human body parts, **25**, 5
growth of diamond on Au (selective) and $Al_2O_3$ surfaces, **26**, 41
high temperature contacts to chemically vapour deposited diamond films—reliability issues, **29**, 206
high temperature stability of chemically vapour deposited diamond diodes, **29**, 223
macrodefect formation in semiconductors during high energy ion implantation: Monte Carlo simulation of damage depth distributions, **29**, 202
scanning deep-level transient spectroscopy investigations on gallium arsenide, **24**, 28
structure and dielectric characterization of a chemically vapor deposited diamond thick film, **27**, 81
study of the growth rate of diamond film by hot-filament CVD, **25**, 47
synthetic diamond: the optical band at 1.883 eV, **21**, 329

Dielectric
dielectric studies of lanthanum heptamolybdate crystals grown from gels, **30**, 7
investigations on the piezoelectric and structural properties of samarium-doped lead zirconate titanate ceramics, **26**, 25
optical effects of buried conductive layers formed by MeV ion implantation, **22**, 297
study of the concentration distribution of SiC vapour in the crystal growth zone, **21**, 83

Dielectric properties
gamma-ray diffraction in the study of silicon, **22**, 149
microstructural study of melt-processed $YBa_2Cu_3O_{7-\delta}$ thick films on yttria-stabilized zirconia, **21**, 19
optical effects of buried conductive layers formed by MeV ion implantation, **22**, 297
recrystallization of boron-doped and undoped preamorphized silicon layers by rapid and conventional thermal annealing, **22**, 128

Dielectric relaxation
reliability of radio frequency dielectric experiments in perovskites, **30**, 55

Dielectric properties
dielectric relaxation of paired defects in perovskite-type oxides, **23**, 19

Diffraction
mapping of GaAs wafers by IR light diffraction and luminescence, **28**, 448
microstructural and mechanical effects of oxide addition into a thin $ZrO_2$ matrix, **26**, 175
on the determination and control of flats location in liquid-encapsulated Czochralski grown InP wafers, **28**, 80
phase equilibria and thermodynamics of solid state contact reactions in the ternary Ta–Ga–As system, **22**, 141
preparation by molecular beam epitaxy and atomic layer molecular beam epitaxy and characterization of InAs layers 1 monolayer thick in GaAs-based structures, **28**, 183

Diffuse phase transitions
current-limiting property of n-$BaTiO_3$ ceramics, **25**, 119

Diffuse transition
reliability of radio frequency dielectric experiments in perovskites, **30**, 55

Diffusion
are polytype transitions possible during boron diffusion?, **29**, 99
copper diffusivity in silicon: A re-examination, **25**, 141
defects in GaAs after Si indiffusion and annealing: a TEM and CL study, **30**, 43
diffusion of hydrogen in n-type Si, **23**, 130
evaluation of diffusion length at different excess carrier concentrations, **24**, 98
influence of the boundary on the interdiffusion in heterostructures, **26**, 147
interfacial reactions of W thin film on single-crystal (001) β-SiC, **29**, 126
LBIC and diffusion length mapping applied to the investigation of gettering by aluminium diffusion in multicrystalline silicon, **24**, 188
local investigation of the electrical properties of grain boundaries, **24**, 56
measurements of carrier diffusion length in processed wafers: correlation with the electrical behaviour, **24**, 192
redistribution and incorporation of Si in GaAs due to indium doping, **26**, 7
redistribution of atoms in the near-surface layer of multielemental solids related to variations of the ion beam parameters, **27**, 23
simulation of MOCVD-process for Y–Ba–Cu–O film production in stagnation zone reactor, **22**, 317
strain relaxation studied by photoluminescence and by double crystal X-ray diffraction measurements in strained InGaAs, **22**, 222
variation of free charge carrier concentration in doped GaAs studied by phase microscopy, **28**, 481

Diode lasers
aluminium-free 980 nm laser diodes, **21**, 211
blue diode lasers and visible optoelectronic devices, **21**, 205
growth of InAlGaAs multilayer structures for high power and submilliamp vertical cavity lasers, **21**, 228
shadow mask MBE for the fabrication of lead chalcogenide buried heterostructure lasers, **21**, 217
Diodes
high temperature stability of chemically vapour deposited diamond diodes, **29**, 223
Dislocation density
chemical etching of CdZnTe (111) surfaces, **27**, L11
Dislocation formation
thermal stresses and dislocation formation in liquid-encapsulated Czochralski-grown InP crystals, **28**, 76
Dislocation-point defect interaction
variation of free charge carrier concentration in doped GaAs studied by phase microscopy, **28**, 481
Dislocations
analysis of IR absorption mapping of defects in liquid-encapsulated Czochralski GaAs, **28**, 130
basic dislocation contrasts in SEM-CL/EBIC on III–V semiconductors, **24**, 115
dislocations and quantum transport: a possible hint for one-dimensional conductivity along dislocation lines; a fundamental mechanism for the EBIC contrast formation, **24**, 82
EBIC and cathodoluminescence evaluation of III–V compounds, **24**, 35
fabrication and application of relaxed buffer layers, **30**, 201
growth and characterization of III–V materials grown by vapor-pressure-controlled Czochralski method comparison with standard liquid-encapsulated Czochralski materials, **28**, 65
island formation in Ge/Si epitaxy, **30**, 197
quantitative studies of beam-induced defects in III–V compounds by cathodoluminescence and transmission electron microscopy, **24**, 130
theory of electron-beam-induced current and cathodoluminescence imaging of crystal defects: some new results, **24**, 15
what information on extended defects do we obtain from beam-injection methods?, **24**, 1
Dispersion
optical characterization of $As_2S_3$ and $As_2Se_3$ semiconducting glass films of non-uniform thickness from transmission measurements, **25**, 53
Dopants
cross-sectional scanning tunneling microscopy on semiconductor heterostructures, **24**, 213
Doping
preparation of GaSb by molecular beam epitaxy and electrical and photoluminescence characterization, **28**, 174
Doping and impurity
study of defects in implanted GaAs:Te by cathodoluminescence, **24**, 138
Doping and impurity implantation
effects of deep levels and Si-doping on GaInP material properties investigated by means of optical methods, **21**, 181
Rutherford backscattering studies of solid phase recrystallization and incorporation in erbium-implanted silicon, **30**, L1
Doping effects
*in situ* growth of Y–Ba–Cu–O films by ion beam sputtering, **22**, 165
AlGaInP/GaInAs/GaAs MODFET devices: candidates for optoelectronic integrated circuits, **21**, 304
behaviour of Mn in GaSb grown by the Bridgman method, **27**, 39
boron doped diamond films: electrical and optical characterization and the effect of compensating nitrogen, **29**, 211
coexistence of the DX center and other Si-related electron bound states in $Al_xGa_{1-x}As$, **28**, 412
conductivity and phase structure of blend based proton polymeric electrolytes II: Ammonium salts complexes, **22**, 117
copper doping of GaSb single crystals, **28**, 138
effects of thermal annealing on the properties of zirconia films prepared by ion-assisted deposition, **21**, 10
electrical conduction in MnTe and MnSe films, **21**, L1
junction spectroscopy of highly doped GaAs: detection of the EL2 trap, **28**, 397
microstructural and mechanical effects of oxide addition into a thin $ZrO_2$ matrix, **26**, 175
numerical simulation studies of concentration profile and growth rate of InP LPE, **22**, 227
phase equilibria in the In–Pt–As system at 600°C, **22**, 267
photocurrent study of Fe-doped semi-insulating InP, **28**, 111
positron lifetimes at vacancies in electron-irradiated indium phosphide, **28**, 126
Raman study of mechanical stresses in processes of oxygen precipitation in silicon, **21**, 49
redistribution and incorporation of Si in GaAs due to indium doping, **26**, 7
simulation of lateral Al recoil atoms and damage defects gradients in a GaAs/GaAlAs quantum well created by masked ion implantation, **21**, 284
structural characterization of heavily Zn-doped liquid encapsulated Czochralski InP, **28**, 120
the Czochralski growth of $SrLaGa_3O_7$ single crystals and their optical and lasing properties, **26**, 201
unintentional incorporation of contaminants during chemical vapour deposition of silicon carbide, **29**, 134
p-dopant incorporation and influence on gain and damping behaviour in high-speed GaAs-based strained MQW lasers, **21**, 232
Double heterostructure
polarization of light from an optically pumped (Al–Ga–N)/(Ga–In–N) double heterostructure, **26**, L5
Double-crystal X-ray diffraction
relaxation of strained InGaAs/GaAs layers under thermal processing, **28**, 507
Draw speed
thermal response of optical fibers to metallization processing, **23**, L5

**E**

Edax analysis
segregation in Bridgman grown ingots of $Hg_{1-x}Cd_xTe$, **27**, L17
Elastic modulus
a study of the Zn-doping process in metal-organic chemical vapour deposition GaAs and GaAlAs, **30**, 39
evaluation of elastic moduli in thin-film/substrate systems by the two-layer vibrating reed method, **30**, 35
Electric field
imaging of high field regions in semi-insulating GaAs under bias, **28**, 485
Electrical conduction
correlation between microstructure and electrical conductivity in $Pb(Fe_{1/2}Nb_{1/2})O_3$–$Pb(Fe_{2/3}W_{1/3})O_3$–$Pb(Zn_{1/3}Nb_{2/3})O_3$ relaxor ferroelectrics, **26**, 189

perpendicular electrical conduction in Cu/Mn multilayer films, **23**, L1
Electrical conductivity
Au spreading on GaSb substrates, **21**, 94
electric properties of $PbO-Bi_2O_3-Ga_2O_3$ glasses, **25**, 147
optical and transport properties in the electro-optical material $CdIn_2Te_4$, **21**, 333
Electrical measurements
a common metallization scheme for ohmic contacts to n-type and p-type GaAs: the Al–Ni–Sn system, **27**, L21
anomalous thermionic-field emission in epitaxial Al/n-AlGaAs junctions, **28**, 429
behaviour of Mn in GaSb grown by the Bridgman method, **27**, 39
boron doped diamond films: electrical and optical characterization and the effect of compensating nitrogen, **29**, 211
coexistence of the DX center and other Si-related electron bound states in $Al_xGa_{1-x}As$, **28**, 412
correlation of micro-non-uniformities and electron mobility in undoped liquid-encapsulated Czochralski and vertical-gradient freeze GaAs, **28**, 84
effect of temperature on the electrical resistivity of $YBa_2Cu_3O_{7-x}$ filled polyethylene, **27**, 13
effects of thermal annealing on the properties of zirconia films prepared by ion-assisted deposition, **21**, 10
electrical conductivity of rutile single crystals after heating by pulsed laser, **25**, 92
electrical properties of molecular beam epitaxial GaAs layers grown at low temperature, **28**, 147
electronic transport in thermally crystallized SiC films on sapphire, **29**, 147
negative magnetoresistance for different orientations of n-type $CdAs_2$ in the variable-range hopping regime, **26**, 19
optical and electrical characterization of thick GaSb buffer layers grown on 2 in GaAs wafers, **28**, 169
structural, optical and electrical properties of state of the art cubic SiC films, **29**, 160
structure and dielectric characterization of a chemically vapor deposited diamond thick film, **27**, 81
undoped GaAs grown by the vertical gradient freeze method: growth and properties, **28**, 87
Electrical properties
correlations between the thermoelectric power and Hall effect of Sn or Ge doped $In_2O_3$ semiconductors, **22**, 274
d.c. and a.c. electrical properties of amorphous $Bi_4Sr_3Ca_3Cu_4O_{16}$, **26**, 103
local investigation of the electrical properties of grain boundaries, **24**, 56
mapping of defects and their recombination strength by a light-beam-induced current in silicon wafers, **24**, 152
modulated electron-beam-induced current and cathodoluminescence, **24**, 23
optical characterization of extremely high purity ZnSe grown by metal–organic vapour phase epitaxy using dimethylzinc-triethylamine adduct, **21**, 169
preparation and characterization of semi-insulating undoped indium phosphide, **28**, 95
study of $Eu^{3+}$-doped luminescence glasses prepared by a sol–gel process, **21**, 55
study of the equilibrium processes in the gas phase during silicon carbide sublimation, **21**, 65
the preparation, structure, magnetic and electrical properties of $Cu^{I}Cu^{II}Mg_3(PO_4)_3$, **23**, 88
Electrical stress
use of the charge pumping technique to understand non-uniform *n*-channel MOSFET degradation, **23**, 120
Electrochemical measurement
effects of measurement factor on electrochemical capacity of some hydrogen storage alloys, **30**, 19
Electrochromism
inorganic oxide solid state electrochromic devices, **26**, 157
Electromigration
time dependence of stress and hillock distributions during electromigration in thin metal film interconnections, **23**, 15
Electromotive force
dielectric relaxations in ceramics with compositions $(1-x)Pb(Mg_{1/3}Nb_{2/3})O_3-xPbTiO_3$ ($x=0$, 0.05, 0.10 and 0.25), **22**, 303
Electron beam evaporation
fabrication of 1.5 $\mu$m optically pumped $Ga_{1-x}In_xAs_yP_{1-y}$/InP vertical-cavity surface-emitting lasers, **28**, 289
Electron beam lithography
reduction of etching damage in the fabrication of quantum wires, **28**, 379
Electron beams
cathodoluminescence dependence on electron beam diameter, **24**, 141
cathodoluminescence from defects in electron-irradiated InP, **24**, 135
modulated cathodoluminescence for extended defect characterization, **24**, 121
recombination activity of 'clean' and contaminated misfit dislocations in Si(Ge) structures, **24**, 52
spatially resolved photoluminescence and electron-beam-induced current studies of a coincidence $\Sigma=25$ silicon bicrystal, **24**, 184
the relation between EBIC contrast and recombination velocity of a grain boundary, **24**, 61
Electron bombardment
electron-beam-induced activity of defects in silicon, **24**, 8
on the effect of the recombination within the depletion zone on the EBIC signal at Schottky contact, **24**, 101
Electron conduction
electrical properties of Mn-doped GaSb, **28**, 134
extremely high mobility carriers in organic conductor $\alpha$-$(BEDT-TTF)_2I_3$ under high pressure, **25**, L1
2D electron gas
dislocations and quantum transport: a possible hint for one-dimensional conductivity along dislocation lines; a fundamental mechanism for the EBIC contrast formation, **24**, 82
Electron measurements
measurements of carrier diffusion length in processed wafers: correlation with the electrical behaviour, **24**, 192
Electron microscopy
chemical synthesis of tantalum zirconate from alkoxide precursors, **21**, 88
determination of the lateral distribution of electron–hole pairs generated by an electron beam in $Al_{0.4}Ga_{0.6}As$ by cathodoluminescence, **24**, 124
electron-beam-induced current and atomic force microscopy studies on silicon etch steps created by reactive ion etching and reactive ion beam etching, **24**, 223
impact of thermal treatments on deep level behaviour in semi-insulating GaAs, **22**, 241
ineffective grain boundaries and breakdown threshold of zinc oxide varistors, **22**, 261
investigation of InGaAs/InP interdiffusion by simultaneous transmission electron microscopy and photoluminescence analysis, **21**, 277

mechanisms of strain release in molecular beam epitaxy grown InGaAs/GaAs buffer heterostructures, **28**, 510
recombination activity of 'clean' and contaminated misfit dislocations in Si(Ge) structures, **24**, 52
structural characterization of heavily Zn-doped liquid encapsulated Czochralski InP, **28**, 120
theory of electron-beam-induced current and cathodoluminescence imaging of crystal defects: some new results, **24**, 15
Electron mobility
determination of donor and acceptor level energies by admittance spectroscopy in 6H SiC, **29**, 122
Electron paramagnetic resonance
an electron spin resonance study of the effect of thermal history on the structure of potassium silicate glasses, **26**, 35
magnetic circular dichroism and electron spin resonance of the $A^-$ acceptor state of vanadium, $V^{3+}$, in 6H-SiC, **29**, 118
magnetic properties of $Ba_2Cu_3O_4Cl_2$ single crystals, **25**, 167
Electron probe microanalysis
potassium substitution in the $Bi_2Sr_2CaCu_2O_y$ superconductor, **25**, 153
Electron spectroscopy
absorption coefficient and exciton oscillator strengths in InGaAs/InP multi-quantum wells, **21**, 189
improved method for GaAs-(Ga,Al)As epitaxial regrowth, **21**, 157
Electron state redistribution
current-limiting property of n-$BaTiO_3$ ceramics, **25**, 119
Electron states
deep level transient spectroscopy investigation of GaAs grown by atomic layer molecular beam epitaxy, **28**, 400
deep levels in rapid thermal annealed GaAs, **28**, 439
effects of deep levels and Si-doping on GaInP material properties investigated by means of optical methods, **21**, 181
effects of hydrogenation of deep and shallow levels in AlGaAs grown by MBE, **28**, 425
intersubband transitions in InAs/AlSb quantum wells, **21**, 201
studies of deep-level defects at III–V heterointerfaces, **28**, 387
Electron-beam-induced current
an electron-beam-induced current study of dislocations in GaAs, **24**, 91
apparatus for digital electron-beam-induced current imaging, **24**, 64
basic dislocation contrasts in SEM-CL/EBIC on III–V semiconductors, **24**, 115
cathodoluminescence and electron-beam-induced current investigations of single dislocations in GaAs, **24**, 112
characterization of the strength and position of semiconductor defects by the multielectrode EBIC (OBIC) method, **24**, 87
EBIC and cathodoluminescence evaluation of III–V compounds, **24**, 35
electron-beam-induced current quantitative mapping: application to Si solar cells, **24**, 68
evaluation of diffusion length at different excess carrier concentrations, **24**, 98
influence of surface treatment on electrical activity of dislocations and minority carrier diffusion length in cast multicrystalline silicon, **24**, 74
local investigation of the electrical properties of grain boundaries, **24**, 56
modulated electron-beam-induced current and cathodoluminescence, **24**, 23
Electronic band structure
determination of the electronic structure of grain boundaries by energy-resolved photoconductivity measurements, **24**, 159
epitaxial ferroelectric thin films for memory applications, **22**, 283
optical and transport properties in the electro-optical material $CdIn_2Te_4$, **21**, 333
Electronic properties
epitaxial ferroelectric thin films for memory applications, **22**, 283
optical cross-sections and distribution of $Fe^{2+}$ and $Fe^{3+}$ in semi-insulating liquid encapsulated Czochralski grown InP:Fe, **21**, 321
Electronic sub-band structure
second harmonic generation via excitations between valence sub-bands in p-type GaAs–AlAs and Si–SiGe quantum well structures, **21**, 296
Ellipsometry
spectroscopic ellipsometry a useful tool to determine the refractive indices and interfaces of $In_{0.52}Al_{0.48}As$ and $In_{0.53}Al_xGa_{0.47-x}As$ layers on InP in the wavelength range 280–1900 nm, **21**, 174
II–VI Emitters
failure mechanisms in II–VI blue–green emitters, **28**, 29
Epilayers
cathodoluminescence imaging of misfit dislocations in Si/SiGe epitaxial layers: the influence of transition metal contamination, **24**, 48
correlations between the thermoelectric power and Hall effect of Sn or Ge doped $In_2O_3$ semiconductors, **22**, 274
determination of residual strain by reflectivity, X-ray diffraction and Raman spectroscopy in ZnSe epilayers grown on GaAs(001), InP(001) and GaSb(001) by metal–organic vapor phase epitaxy, **21**, 257
electrical properties of cadmium diarsenide at low temperatures, **21**, 59
improved method for GaAs-(Ga,Al)As epitaxial regrowth, **21**, 157
improvements in the heteroepitaxial growth of GaAs on Si by MOVPE, **21**, 266
optical characterization of extremely high purity ZnSe grown by metal–organic vapour phase epitaxy using dimethylzinc-triethylamine adduct, **21**, 169
tunable infrared photoemission sensor on Si using epitaxial $ErSi_2$/Si heterostructures, **21**, 312
p-dopant incorporation and influence on gain and damping behaviour in high-speed GaAs-based strained MQW lasers, **21**, 232
Epitaxial growth
vibrational diagnostics of the epitaxial growth of ultrathin films of sodium on Cu(001), **23**, 123
Epitaxial silicon
selective epitaxial growth of SiGe alloys—influence of growth parameters on film properties, **28**, 1
Epitaxy
atomic structure of surfactant monolayers and its role in epitaxial growth, **30**, 175
fabrication of 1.5 $\mu$m optically pumped $Ga_{1-x}In_xAs_yP_{1-y}$/InP vertical-cavity surface-emitting lasers, **28**, 289
influence of the boundary on the interdiffusion in heterostructures, **26**, 147
Epitaxy etching
buried heterostructure AlGaAs photonic devices fabricated by low temperature mesa melt etching and regrowth, **28**, 302

material quality assessment of epitaxial layers of ZnSe and related compounds, **28**, 61
new dry-etch chemistries for III–V semiconductors, **25**, 179
Epitaxy of thin films
a study of the defect structure in GaAs layers grown at low and high temperatures on Si(001) substrates, **28**, 196
characterization of high quality InGaP/GaAs and InGaAsP/GaAs heterostructures grown by low pressure metal–organic chemical vapour deposition, **28**, 158
characterization of the heterostructure between heteroepitaxially grown β-$FeSi_2$ and (111) silicon, **21**, 270
fully planar AlGaAs/GasAs heterojunction bipolar transistors using chemical beam epitaxy selective growth, **28**, 261
GaInP/GaAs heterojunction bipolar transistors grown by low pressure metalorganic chemical vapour deposition for voltage-controlled oscillators and power amplifier microwave monolithic integrated circuits, **28**, 242
growth of a Ge/Si/Ge(100) heterostructure by very low pressure chemical vapour deposition using $Si_2H_6$ and $GeH_4$ gases—photoemission and low energy electron diffraction studies, **28**, 14
growth of thin β-SiC layers by carbonization of Si surfaces by rapid thermal processing, **29**, 170
hydrogen passivation effects in quaternary solid solutions of InGaAsSb lattice matched to GaSb, **27**, 137
metal–organic chemical vapor deposition growth of GaN, **29**, 58
optical and electrical characterization of thick GaSb buffer layers grown on 2 in GaAs wafers, **28**, 169
optical characterization of chemical beam epitaxy grown $Ga_{0.52}In_{0.48}P$ layers and related microstructures, **28**, 151
quantitative investigation of interdiffusion effects in balanced-strain InGaAs(P)/InGaAsP heterostructures: constant $x$ vs. constant $y$, **28**, 353
real-space transfer in heterojunction structures, **28**, 408
recrystallization of strained $Ge_xSi_{1-x}$/Si layers with various Ge gradients and in the presence of impurities, **28**, 9
roughening and facetting in lattice-mismatched heteroepitaxial growth of compound semiconductors: a Monte Carlo study, **28**, 200
selective liquid-phase epitaxy growth of $In_xGa_{1-x}As_yP_{1-y}$ on structured GaAs(100) substrates, **28**, 193
structural and electronic characterization of β-SiC films on Si grown from mono-methylsilane precursors, **29**, 154
thermally induced change in the profile of GaAs/AlGaAs quantum wells, **28**, 332
transition from island to continuous InP layer growth on (001) GaAs by MOCVD, **28**, 214
Erbium
low temperature specific heat studies of amorphous and crystalline Er–Ru alloys, **23**, 66
Etching
electrolyte for electrochemical C–V profiling of InP- and GaAs-based structures, **28**, 361
electron-beam-induced current and atomic force microscopy studies on silicon etch steps created by reactive ion etching and reactive ion beam etching, **24**, 223
fabrication of millimetre-wave Gunn and IMPATT devices with integral heat sink and integral bonding ribbon: a new approach, **28**, 253
HBr–$K_2Cr_2O_7$–$H_2O$ etching system for indium phosphide, **28**, 488
high resolution dry etching of III–V semiconductor materials using magnetically enhanced discharges, **27**, 61
MBE regrowth of GaAs/AlGaAs structures on RIE patterned substrates, **21**, 153
on the determination and control of flats location in liquid-encapsulated Czochralski grown InP wafers, **28**, 80
optical emission end point detection for reactive ion etching of Si/SiGe structures, **27**, 39
optical emission end point detection for via hole etching in InP and GaAs power device structures, **23**, 36
parametric investigations and simulations of ion beam etching and reactive ion etching mechanisms for GaAs compounds, **28**, 383
reactive ion etching characterization of a-SiC:H in $CF_4/O_2$ plasma, **29**, 176
reactive ion etching of GaInP/GaAs multilayer structures with $SiCl_4$–$Cl_2$–Ar plasma, **28**, 365
reduction of etching damage in the fabrication of quantum wires, **28**, 379
Europium
Raman study of mechanical stresses in processes of oxygen precipitation in silicon, **21**, 49
Evaporation
electrical properties of cadmium diarsenide at low temperatures, **21**, 59
investigation of the role of the crystal growth zone during silicon carbide crystal growth by the sublimation method, **27**, 69
the effects of deposition conditions on microstructure and morphology of r.f.-magnetron sputtered GdTbFeCo thin films, **21**, 77
Excitons
absorption coefficient and exciton oscillator strengths in InGaAs/InP multi-quantum wells, **21**, 189
exciton transitions in InGaAs/InP quantum wells investigated by photocurrent spectroscopy, **28**, 327
influence of the cap layer thickness on the optical properties of near surface GaInAs/GaAs quantum wells, **21**, 198
observation of blue shift in GaAs/InGaP quantum well p–i–n diodes, **28**, 323
spatially resolved photoluminescence and electron-beam-induced current studies of a coincidence $\Sigma = 25$ silicon bicrystal, **24**, 184

**F**

Failure mechanisms
high temperature contacts to chemically vapour deposited diamond films—reliability issues, **29**, 206
Far infrared spectroscopy
Raman and infrared spectroscopic studies of Ge–Ga–Ag sulphide glasses, **22**, 191
Far-IR absorption spectroscopy
resonant Raman scattering studies of $SnS_2$ crystals, **23**, 98
Far-IR spectroscopy
far-IR study of electron–phonon interaction and phase transition in $\alpha$-$In_2S_{3-x}Se_x$ ($2.4 < x < 3.0$) crystals, **30**, 27
Fast ion conductor
a.c. conductivity and electric modulus behavior of the vitreous system AgI–$Ag_2O$–$[XSeO_2$–$(1-x)V_2O_5]$, **25**, 135
Ferrites
Raman and infrared spectroscopic studies of Ge–Ga–Ag sulphide glasses, **22**, 191
Ferroelectric
dielectric studies of lanthanum heptamolybdate crystals grown from gels, **30**, 7
reliability of radio frequency dielectric experiments in perovskites, **30**, 55
Ferroelectricity
correlation between dielectric properties and nanostructure in a $Pb(In_{1/2}Nb_{1/2})O_3$ ceramic, **25**, 85

Ferroelectrics
the properties of heavily compensated high resistivity GaSb crystals, **22**, 279
Field effect
real-space transfer in heterojunction structures, **28**, 408
temperature dependence of the thin film silicon-on-insulator field effect transistor current characteristics based on full solution for the one-dimensional MISIS structure, **29**, 38
Field effect transistor
AlGaInP/GaInAs/GaAs MODFET devices: candidates for optoelectronic integrated circuits, **21**, 304
an AlGaAs/GaAs OEIC structure for the integration of LEDs, MESFETs and photodetectors, **21**, 300
Field ionization
real-space transfer in heterojunction structures, **28**, 408
Field-ion-microscopy
photothermal scanning near-field microscopy, **24**, 226
Film deposition
influence of preparation procedure on some physical properties of BICUVOX, **21**, 70
*in situ* growth of superconducting Y–Ba–Cu–O thin films by ion-beam sputtering method, **21**, 5
fabrication of millimetre-wave Gunn and IMPATT devices with integral heat sink and integral bonding ribbon: a new approach, **28**, 253
growth and characterization of anodic sulphide films on $Hg_{0.80}Cd_{0.20}Te$ grown from freshly prepared solution and stored solution, **26**, L1
improved metal–dielectric adhesion for interconnect lines of MMICs and ICs: an experimental study, **28**, 357
magnetic properties of Co–Ni–Mg–N thin films, **27**, 17
structure of nitrogen-substituted graphite prepared by chemical vapor deposition, **29**, 220
Films
lithium insertion in indium selenide films Application to microbatteries, **23**, 105
non-linear photothermal response of thin solid films and coatings, **26**, 111
Flash evaporation
preparation and characterization of $In_4Se_3$ films, **27**, 53
Fluorides
fluorine-intercalated carbon fibers II: An X-ray photoelectron spectroscopy study, **30**, 61
thermal diffusivity of $BaLiF_3$ crystals, **25**, 133
Freeze-drying method
processing and properties of superconducting $La_{1.85}Sr_{0.15}CuO_4$ powder by double-step calcining, **27**, 117
FTIR spectroscopy
far-IR study of electron–phonon interaction and phase transition in $\alpha$-$In_2S_{3-x}Se_x$ ($2.4<x<3.0$) crystals, **30**, 27
Fuel cells
analytical expressions for sputter and diffusion-modified ion implantation profiles, **22**, L1

**G**

GaAs
fabrication of millimetre-wave Gunn and IMPATT devices with integral heat sink and integral bonding ribbon: a new approach, **28**, 253
metal–organic vapour phase epitaxy growth and Raman characterization of (111) A and B oriented GaAs/InP heterostructures, **28**, 164
variation of free charge carrier concentration in doped GaAs studied by phase microscopy, **28**, 481
GaAs/Ge
structural properties of GaAs/Ge heterostructures as a function of growth conditions, **28**, 502
GaInAsP
high-reflective 1.5 $\mu$m GaInAsP/InP Bragg reflectors grown by metal organic vapor phase epitaxy, **28**, 285
Gallium
molten salt synthesis and dielectric properties of $Pb(Fe_{1/2}Nb_{1/2}O_3$–$Pb(Fe_{1/2}Ta_{1/2})O_3$ (PFN–PFT) solid solutions, **22**, 133
phase equilibria in the In–Pt–As system at 600°C, **22**, 267
Gallium aluminium arsenide
cross-sectional scanning tunneling microscopy on semiconductor heterostructures, **24**, 213
Gallium antimonide
behaviour of Mn in GaSb grown by the Bridgman method, **27**, 39
chemical synthesis of tantalum zirconate from alkoxide precursors, **21**, 88
copper doping of GaSb single crystals, **28**, 138
correlations between the thermoelectric power and Hall effect of Sn or Ge doped $In_2O_3$ semiconductors, **22**, 274
determination of residual strain by reflectivity, X-ray diffraction and Raman spectroscopy in ZnSe epilayers grown on GaAs(001), InP(001) and GaSb(001) by metal–organic vapor phase epitaxy, **21**, 257
effects of thermal annealing on the properties of zirconia films prepared by ion-assisted deposition, **21**, 10
electrical properties of Mn-doped GaSb, **28**, 134
electron cyclotron resonance plasma deposition and etching of silicon nitride on GaSb for optoelectronic applications, **28**, 369
hydrogen passivation effects in quaternary solid solutions of InGaAsSb lattice matched to GaSb, **27**, 137
ion implantation effects in GaSb, **27**, 129
improvement of dark current of Ga(Al)Sb mesa diodes using $(NH_4)_2S$ treatment, **28**, 374
optical and electrical characterization of thick GaSb buffer layers grown on 2 in GaAs wafers, **28**, 169
optical properties of GaSb–AlSb heterostructures grown by molecular beam epitaxy, **21**, 185
transmission electron microscopy investigation of extended defects in heavily Se-doped bulk GaSb, **28**, 142
Gallium arsenide
a common metallization scheme for ohmic contacts to n-type and p-type GaAs: the Al–Ni–Sn system, **27**, L21
a complementary III–V heterostructure field effect transistor technology for high temperature integrated circuits, **29**, 54
a study of the defect structure in GaAs layers grown at low and high temperatures on Si(001) substrates, **28**, 196
AlGaInP/GaInAs/GaAs MODFET devices: candidates for optoelectronic integrated circuits, **21**, 304
an AlGaAs/GaAs OEIC structure for the integration of LEDs, MESFETs and photodetectors, **21**, 300
an electron-beam-induced current study of dislocations in GaAs, **24**, 91
analysis of IR absorption mapping of defects in liquid-encapsulated Czochralski GaAs, **28**, 130
anomalous thermionic-field emission in epitaxial Al/n-AlGaAs junctions, **28**, 429
atomic force microscopy and scanning tunneling microscopy studies of large-scale unstable growth formed during GaAs(001) homoepitaxy, **30**, 143
buried heterostructure AlGaAs photonic devices fabricated by low temperature mesa melt etching and regrowth, **28**, 302

cathodoluminescence and electron-beam-induced current investigations of single dislocations in GaAs, **24**, 112
cathodoluminescence dependence on electron beam diameter, **24**, 141
cation dependence of the electronic structure of AlAs and GaAs, **25**, 79
characterization of heterointerfaces and surfaces in InSb on GaAs and in InAs/AlSb quantum wells, **21**, 262
characterization of high quality InGaP/GaAs and InGaAsP/GaAs heterostructures grown by low pressure metal–organic chemical vapour deposition, **28**, 158
coexistence of the DX center and other Si-related electron bound states in $Al_xGa_{1-x}As$, **28**, 412
correlation of micro-non-uniformities and electron mobility in undoped liquid-encapsulated Czochralski and vertical-gradient freeze GaAs, **28**, 84
crystal defects in vertical cavity epitaxial structures on GaAs investigated by X-ray methods, **28**, 520
current gain deterioration in carbon-doped AlGaAs/GaAs heterojunction bipolar transistors during high-temperature bias stress tests, **28**, 257
deep level transient spectroscopy investigation of GaAs grown by atomic layer molecular beam epitaxy, **28**, 400
deep levels in rapid thermal annealed GaAs, **28**, 439
deep-level states and electrical properties of GaAs grown at 250°C, **28**, 393
defects in GaAs after Si indiffusion and annealing: a TEM and CL study, **30**, 43
depth profiling of InAs/InP and $In_xGa_{1-x}As$/InAs heterostructures grown by molecular beam epitaxy, **28**, 228
determination of residual strain by reflectivity, X-ray diffraction and Raman spectroscopy in ZnSe epilayers grown on GaAs(001), InP(001) and GaSb(001) by metal–organic vapor phase epitaxy, **21**, 257
determination of the lateral distribution of electron–hole pairs generated by an electron beam in $Al_{0.4}Ga_{0.6}As$ by cathodoluminescence, **24**, 124
EBIC and cathodoluminescence evaluation of III–V compounds, **24**, 35
effect of base dopant species on heterojunction bipolar transistor reliability, **28**, 232
effect of chemical treatments on the composition of HgZnTe surfaces, **28**, 39
electrical properties of molecular beam epitaxial GaAs layers grown at low temperature, **28**, 147
epitaxial ferroelectric thin films for memory applications, **22**, 283
evaluation of diffusion length at different excess carrier concentrations, **24**, 98
experimental and theoretical studies of multi-quantum well structures for unipolar avalanche multiplication, **21**, 237
experimental evaluation of separate contributions to ideality factor for the base surface recombination current in heterojunction bipolar transistors, **28**, 238
fabrication of photonic integrated circuits using quantum well intermixing, **28**, 272
fully planar AlGaAs/GasAs heterojunction bipolar transistors using chemical beam epitaxy selective growth, **28**, 261
GaInP/GaAs heterojunction bipolar transistors grown by low pressure metalorganic chemical vapour deposition for voltage-controlled oscillators and power amplifier microwave monolithic integrated circuits, **28**, 242
growth and characterization of III–V materials grown by vapor-pressure-controlled Czochralski method comparison with standard liquid-encapsulated Czochralski materials, **28**, 65
growth of InAlGaAs multilayer structures for high power and submilliamp vertical cavitylasers, **21**, 228
high resolution dry etching of III–V semiconductor materials using magnetically enhanced discharges, **27**, 61
III–V semiconductor properties for high temperature electronics, **29**, 47
imaging of high field regions in semi-insulating GaAs under bias, **28**, 485
improved method for GaAs-(Ga,Al)As epitaxial regrowth, **21**, 157
improvements in the heteroepitaxial growth of GaAs on Si by MOVPE, **21**, 266
in-situ X-ray studies of organometallic vapor phase epitaxy growth, **30**, 99
influence of the cap layer thickness on the optical properties of near surface GaInAs/GaAs quantum wells, **21**, 198
investigations on Pd/In-based high temperature stable ohmic contacts on GaAs by X-ray reflectometry and diffractometry, **29**, 70
junction spectroscopy of highly doped GaAs: detection of the EL2 trap, **28**, 397
large negative persistent photoconductivity of bulk $GaAs_{1-x}P_x$ ($x = 0.02$–$0.03$) single crystals, **21**, 325
MBE regrowth of GaAs/AlGaAs structures on RIE patterned substrates, **21**, 153
mapping of GaAs wafers by IR light diffraction and luminescence, **28**, 448
modelling the effects of piezoelectrically active defects and their impact on the threshold voltage of GaAs metal–semiconductor field effect transistors, **28**, 248
new dry-etch chemistries for III–V semiconductors, **25**, 179
observation and analysis of epitaxial growth with reflectance-difference spectroscopy, **30**, 109
observation of blue shift in GaAs/InGaP quantum well p–i–n diodes, **28**, 323
optical emission end point detection for via hole etching in InP and GaAs power device structures, **23**, 36
optical-beam-induced current and photoluminescence techniques for localization of crystallographic defects in optoelectronic devices, **24**, 175
parametric investigations and simulations of ion beam etching and reactive ion etching mechanisms for GaAs compounds, **28**, 383
process-induced defects in manufacture of GaAs monolithic microwave integrated circuits, **28**, 268
quantitative studies of beam-induced defects in III–V compounds by cathodoluminescence and transmission electron microscopy, **24**, 130
role of steps in epitaxial growth, **30**, 121
room-temperature photoluminescence characterization of thin-emitter GaAlAs/GaAs and GaAlAs/GaAs/Ge solar cells, **28**, 474
scanning deep-level transient spectroscopy investigations on gallium arsenide, **24**, 28
scanning tunneling microscopy studies of the GaAs(001) surface and the nucleation of ZnSe on GaAs(001), **30**, 73
second harmonic generation via excitations between valence sub-bands in p-type GaAs–AlAs and Si–SiGe quantum well structures, **21**, 296
selective liquid-phase epitaxy growth of $In_xGa_{1-x}As_yP_{1-y}$ on structured GaAs(100) substrates, **28**, 193
Si delta-doped GaAs and AlGaAs by low-pressure MOVPE, **28**, 204
spray pyrolysis deposition for indium oxide doped with different impurities, **22**, 233
step-graded buffer layer study of the strain relaxation by transmission electron microscopy, **28**, 497

strain effects on carrier lifetimes in InGaAs/(Al)GaAs multiple quantum wells, **21**, 253
structural and mechanical properties of ion implanted GaAs and InP single crystals grown by the liquid encapsulated Czochralski technique, **28**, 461
structure and formation energy of steps on the GaAs(001)-2 × 4 surface, **30**, 127
structure and thermodynamic stability of GaAs(001) surfaces, **30**, 81
study of defects in implanted GaAs:Te by cathodoluminescence, **24**, 138
the pseudobinary alloy (Ga,Al)As under hydrostatic pressure, **25**, 159
thermally induced change in the profile of GaAs/AlGaAs quantum wells, **28**, 332
transmission electron microscopy study of $In_xGa_{1-x}As$/GaAs multilayer buffer structures used as dislocation filters, **28**, 515
undoped GaAs grown by the vertical gradient freeze method: growth and properties, **28**, 87
p-dopant incorporation and influence on gain and damping behaviour in high-speed GaAs-based strained MQW lasers, **21**, 232
(311) Gallium arsenide
the investigation of growth characteristics of single quantum wells grown on (311) GaAs substrates, **27**, 7
Gallium indium nitride
polarization of light from an optically pumped (Al–Ga–N)/(Ga–In–N) double heterostructure, **26**, L5
Gallium indium phosphide
X-ray characterization of very thin $Ga_xIn_{1-x}P$ ($x \sim 0.5$) layers grown on InP, **28**, 188
Gallium nitride
development of chemical beam epitaxy for the deposition of gallium nitride, **29**, 78
how to induce the epitaxial growth of gallium nitride on Si(001), **29**, 74
metal–organic chemical vapor deposition growth of GaN, **29**, 58
Gallium phosphide
large negative persistent photoconductivity of bulk $GaAs_{1-x}P_x$ ($x = 0.02$–$0.03$) single crystals, **21**, 325
X-ray photoelectron spectroscopy analyses of the surface and interface of Pd-based p-GaP ohmic contact layer, **25**, 24
Gallium sulphide
differential scanning calorimetry study of structural relaxation of Ge-doped $Se_{85}Te_{15}$ glasses, **22**, 181
Gamma radiation
γ radiation–hydrothermal synthesis and characterization of nanocrystalline copper powders, **23**, 116
GaSb
preparation of GaSb by molecular beam epitaxy and electrical and photoluminescence characterization, **28**, 174
Ge films
growth and structural characterization of thin Ge films by molecular dynamics simulation, **26**, 61
Ge/Si growth
island formation in Ge/Si epitaxy, **30**, 197
Gel-grown
dielectric studies of lanthanum heptamolybdate crystals grown from gels, **30**, 7
Germanium
cathodoluminescence imaging of misfit dislocations in Si/SiGe epitaxial layers: the influence of transition metal contamination, **24**, 48
metastable electrical activity of misfit-dislocation-associated defects in Si/Si(Ge) heteroepitaxial structures: EBIC/DLTS correlation, **24**, 43
on the effect of the recombination within the depletion zone on the EBIC signal at Schottky contact, **24**, 101
optical determination of the composition of bulk SiGe monocrystals, **28**, 18
photoluminescence and electroluminescence processes in $Si_{1-x}Ge_x$/Si heterostructures grown by chemical vapor deposition, **21**, 307
recombination activity of 'clean' and contaminated misfit dislocations in Si(Ge) structures, **24**, 52
room-temperature photoluminescence characterization of thin-emitter GaAlAs/GaAs and GaAlAs/GaAs/Ge solar cells, **28**, 474
second harmonic generation via excitations between valence sub-bands in p-type GaAs–AlAs and Si–SiGe quantum well structures, **21**, 296
two types of electron-beam-induced current behaviour of misfit dislocations in Si(Ge): experimental observations and modelling, **24**, 78
Glass
an electron spin resonance study of the effect of thermal history on the structure of potassium silicate glasses, **26**, 35
electric properties of $PbO–Bi_2O_3–Ga_2O_3$ glasses, **25**, 147
phase formation in the $TeO_2$–AlN system, **26**, 197
raman study of mechanical stresses in processes of oxygen precipitation in silicon, **21**, 49
Glass network formers effect
a.c. conductivity and electric modulus behavior of the vitreous system $AgI–Ag_2O–[XSeO_2–(1-x)V_2O_5]$, **25**, 135
Glass-ceramic
phase formation in the $TeO_2$–AlN system, **26**, 197
Glasses
differential scanning calorimetry study of structural relaxation of Ge-doped $Se_{85}Te_{15}$ glasses, **22**, 181
silicon on thin insulator: prediction of the oxygen fluence required for the formation of a continuous buried oxide, **22**, 172
Glassy silver ion conductor
a.c. conductivity and electric modulus behavior of the vitreous system $AgI–Ag_2O–[XSeO_2–(1-x)V_2O_5]$, **25**, 135
Glow discharge
$NdGaO_3$ substrates with defined grain boundaries prepared by welding or soldering, **21**, 36
Gold
growth of diamond on Au (selective) and $Al_2O_3$ surfaces, **26**, 41
Grain boundaries
determination of the electronic structure of grain boundaries by energy-resolved photoconductivity measurements, **24**, 159
influence of carbon on the phase transformation kinetics and magnetic properties of Mn–Al alloys, **22**, 256
local investigation of the electrical properties of grain boundaries, **24**, 56
microstructure and properties of lead ferroniobate ceramics ($Pb(Fe_{0.5}Nb_{0.5})O_3$), **21**, 26
Monte Carlo simulation of the minority-carrier recombination at and around grain boundaries surrounded by a denuded zone revealed by light-beam-induced current mapping, **24**, 180

spatially resolved photoluminescence and electron-beam-induced current studies of a coincidence $\Sigma = 25$ silicon bicrystal, **24**, 184
the relation between EBIC contrast and recombination velocity of a grain boundary, **24**, 61
thermodynamic aspects of (Te, S)-double-doped GaSb crystal growth, **21**, 14
tungsten diselenide thin films synthesized on tungsten foils, **26**, 67
what information on extended defects do we obtain from beam-injection methods?, **24**, 1
Grains
recrystallization of boron-doped and undoped preamorphized silicon layers by rapid and conventional thermal annealing, **22**, 128
Graphite
near-IR-excited Raman scattering in graphitic materials, **27**, L1
photothermal scanning near-field microscopy, **24**, 226
structure of nitrogen-substituted graphite prepared by chemical vapor deposition, **29**, 220
Graphite substrate holder
a new substrate holder for liquid phase epitaxy growth of $Hg_{1-x}Cd_xTe$ from Hg-rich solutions, **28**, 36
Grating
grating fabrication and characterization method for wafers up to 2 in, **28**, 293
Growth
atomic structure of surfactant monolayers and its role in epitaxial growth, **30**, 175
growth of neodymium heptamolybdate crystals in silica gels at ambient temperatures, **23**, 73
growth, laser and magneto-optic properties of Nd-doped $Bi_4Ge_3O_{12}$ crystals, **23**, 83
Growth defect
synchrotron topography characterization of ZnTe single crystals, **27**, 143

**H**
Hall effect
coexistence of the DX center and other Si-related electron bound states in $Al_xGa_{1-x}As$, **28**, 412
phase equilibria in the In–Pt–As system at 600°C, **22**, 267
spray pyrolysis deposition for indium oxide doped with different impurities, **22**, 233
Heat treatment
conductivity and phase structure of blend based proton polymeric electrolytes I: Complexes with phosphoric acid, **22**, 107
correlations between the thermoelectric power and Hall effect of Sn or Ge doped $In_2O_3$ semiconductors, **22**, 274
development of microstructure and superconductivity of silver-clad Bi(2223) composite tapes in the process of heat treatment, **23**, 58
electrical conduction in MnTe and MnSe films, **21**, L1
phase equilibria and thermodynamics of solid state contact reactions in the ternary Ta–Ga–As system, **22**, 141
spray pyrolysis deposition for indium oxide doped with different impurities, **22**, 233
Heteroepitaxy
a study of PbSe heteroepitaxy on Si(111) for IR optoelectronic applications, **21**, 317
Heterojunction bipolar transistors
effect of base dopant species on heterojunction bipolar transistor reliability, **28**, 232
thermally stable WTiAu non-alloyed ohmic contacts on $In_{0.5}Ga_{0.5}As$ for GaAs–AlGaAs heterojunction bipolar transistor applications, **25**, 175
Heterostructures
a complementary III–V heterostructure field effect transistor technology for high temperature integrated circuits, **29**, 54
a study of minority carrier lifetimes in (Al)GaInP/AlInP double heterostructures grown by metal organic chemical vapour deposition, **28**, 404
AlGaInP/GaInAs/GaAs MODFET devices: candidates for optoelectronic integrated circuits, **21**, 304
buried heterostructure AlGaAs photonic devices fabricated by low temperature mesa melt etching and regrowth, **28**, 302
characterization of heterointerfaces and surfaces in InSb on GaAs and in InAs/AlSb quantum wells, **21**, 262
characterization of the heterostructure between heteroepitaxially grown β-$FeSi_2$ and (111) silicon, **21**, 270
cross-sectional scanning tunneling microscopy on semiconductor heterostructures, **24**, 213
determination of the GaN/AlN band discontinuities via the $(-/0)$ acceptor level of iron, **29**, 61
experimental evaluation of separate contributions to ideality factor for the base surface recombination current in heterojunction bipolar transistors, **28**, 238
fabrication and application of relaxed buffer layers, **30**, 201
gate currents in heterostructure field-effect transistors: contribution by 'warm' electrons, **28**, 264
growth of a Ge/Si/Ge(100) heterostructure by very low pressure chemical vapour deposition using $Si_2H_6$ and $GeH_4$ gases—photoemission and low energy electron diffraction studies, **28**, 14
high power InP/InGaAsP buried heterostructure laser for a wavelength of 1.15 $\mu$m, **28**, 296
III–V semiconductor properties for high temperature electronics, **29**, 47
material quality assessment of epitaxial layers of ZnSe and related compounds, **28**, 61
metastable electrical activity of misfit-dislocation-associated defects in Si/Si(Ge) heteroepitaxial structures: EBIC/DLTS correlation, **24**, 43
optical emission end point detection for reactive ion etching of Si/SiGe structures, **27**, 39
optical properties of GaSb–AlSb heterostructures grown by molecular beam epitaxy, **21**, 185
optical-beam-induced current and photoluminescence techniques for localization of crystallographic defects in optoelectronic devices, **24**, 175
photoluminescence and electroluminescence processes in $Si_{1-x}Ge_x$/Si heterostructures grown by chemical vapor deposition, **21**, 307
quantum confined Stark effect (QCSE) and self-electro-optic effect device (SEED) in II–VI heterostructures, **21**, 224
shadow mask MBE for the fabrication of lead chalcogenide buried heterostructure lasers, **21**, 217
Si delta-doped GaAs and AlGaAs by low-pressure MOVPE, **28**, 204
strained InAs/$Al_xGa_{0.48-x}In_{0.52}As$ heterostructures: a tunable quantum well materials system for light emission from the near-IR to the mid-IR, **21**, 288
studies of deep-level defects at III–V heterointerfaces, **28**, 387
the properties of heavily compensated high resistivity GaSb crystals, **22**, 279
tunable infrared photoemission sensor on Si using epitaxial $ErSi_2$/Si heterostructures, **21**, 312

vacancy controlled interdiffusion in III–V heterostructures, **21**, 281
High frequency
electrical characterization of integrated circuits by scanning force microscopy, **24**, 218
High magnetization
substitution for iron by non-magnetic constituents in spinel lithium ferrite, **25**, 73
High temperature
a complementary III–V heterostructure field effect transistor technology for high temperature integrated circuits, **29**, 54
analysis of SIMOX metal–oxide–semiconductor transistors operated in the high temperature range, **29**, 21
high temperature stability of chemically vapour deposited diamond diodes, **29**, 223
tungsten metallization technology for high temperature silicon-on-insulator devices, **29**, 18
High temperature electronics
III–V semiconductor properties for high temperature electronics, **29**, 47
High transition temperature oxide superconductors
complex admittance study of potassium yttrium fluoride, **22**, 159
dielectric relaxations in ceramics with compositions $(1-x)Pb(Mg_{1/3}Nb_{2/3})O_3 - xPbTiO_3$ ($x = 0$, 0.05, 0.10 and 0.25), **22**, 303
measurements of interdiffusion in compositionally modulated amorphous Ni/Si multilayers by *in situ* X-ray diffraction, **22**, 211
oxygen ion conductivity in $Ba_3In_{3-x}Zr_xO_{7.5+x/2}$ ($x = 0.7$–1.3), **22**, 313
High-temperature operation
silicon-on-insulator technology for high temperature metal oxide semiconductor devices and circuits, **29**, 7
High-temperature superconductivity
a.c. and d.c. susceptibility studies on silver-doped BPSCCO (2223) superconductors, **26**, 151
microstructure and properties of high temperature superconducting materials, **26**, 75
scanning electron acoustic microscopy of electronic materials, **24**, 209
High-temperature superconductors
effects of starting powder with various high *Tc* phase contents on the expansion of Bi–Pb–Sr–Ca–Cu–O pellets, **25**, 68
processing and properties of superconducting $La_{1.85}Sr_{0.15}CuO_4$ powder by double-step calcining, **27**,117
High-transition temperature superconductivity
effect of previous heat treatment on ionic conductivity of yttrium-doped KBr crystals, **21**, 1
microstructure and properties of lead ferroniobate ceramics ($Pb(Fe_{0.5}Nb_{0.5})O_3$), **21**, 26
thermodynamic aspects of (Te, S)-double-doped GaSb crystal growth, **21**, 14
Hole-burning spectra
persistent spectral hole burning in semiconductor microcrystals, **27**, L5
Homogeneity
analysis of IR absorption mapping of defects in liquid-encapsulated Czochralski GaAs, **28**, 130
correlation of micro-non-uniformities and electron mobility in undoped liquid-encapsulated Czochralski and vertical-gradient freeze GaAs, **28**, 84
photocurrent study of Fe-doped semi-insulating InP, **28**, 111
Homogeneous powder
processing and properties of superconducting $La_{1.85}Sr_{0.15}CuO_4$ powder by double-step calcining, **27**, 117
Hot carrier injection
analysis of SIMOX metal–oxide–semiconductor transistors operated in the high temperature range, **29**, 21
Hot carriers
gate currents in heterostructure field-effect transistors: contribution by 'warm' electrons, **28**, 264
Hydrogen
diffusion of hydrogen in n-type Si, **23**, 130
effects of hydrogenation of deep and shallow levels in AlGaAs grown by MBE, **28**, 425
hydrogen passivation effects in quaternary solid solutions of InGaAsSb lattice matched to GaSb, **27**, 137
influence of hydrogen on the hyperfine field of amorphous $Fe_{83.3}Si_{3.5}B_{11.2}C_2$ alloy, **25**, 20
luminescence from rod-like defects and hydrogen related centres in silicon, **24**, 144
Hydrogen storage alloys
effects of measurement factor on electrochemical capacity of some hydrogen storage alloys, **30**, 19
Hydrostatic pressure
the pseudobinary alloy (Ga,Al)As under hydrostatic pressure, **25**, 159
Hydrothermal treatment
$\gamma$ radiation–hydrothermal synthesis and characterization of nanocrystalline copper powders, **23**, 116

I
Imaging
imaging of high field regions in semi-insulating GaAs under bias, **28**, 485
Impedance spectroscopy
correlation between microstructure and electrical conductivity in $Pb(Fe_{1/2}Nb_{1/2})O_3$–$Pb(Fe_{2/3}W_{1/3})O_3$–$Pb(Zn_{1/3}Nb_{2/3})O_3$ relaxor ferroelectrics, **26**, 189
Implantation
study of defects in implanted GaAs:Te by cathodoluminescence, **24**, 138
Impurities
cathodoluminescence and electron-beam-induced current investigations of single dislocations in GaAs, **24**, 112
cathodoluminescence imaging of misfit dislocations in Si/SiGe epitaxial layers: the influence of transition metal contamination, **24**, 48
determination of the electronic structure of grain boundaries by energy-resolved photoconductivity measurements, **24**, 159
numerical simulation studies of concentration profile and growth rate of InP LPE, **22**, 227
recombination activity of 'clean' and contaminated misfit dislocations in Si(Ge) structures, **24**, 52
In segregation
photoluminescence study of surface segregation of In in InGaAs-based structures grown by MBE and atomic layer MBE, **28**, 469
In-situ CVD
preparation and properties of new ternary compound crystals of $(Cr,Fe)_3Si_2$ by in-situ chemical vapor deposition, **27**, 73
$In_4Se_3$ films
preparation and characterization of $In_4Se_3$ films, **27**, 53
Indium
identification of CuO as a minority phase in YBCO: X-ray diffraction *vs.* EMF and coulometric titration measurements, **22**, 310
strain effects on carrier lifetimes in InGaAs/(Al)GaAs multiple quantum wells, **21**, 253

Indium aluminium arsenide
the characteristics of intimate Au–$In_yAl_{1-y}As$ Schottky diodes: a mismatch dependence study, **28**, 433
Indium antimonide
characterization of heterointerfaces and surfaces in InSb on GaAs and in InAs/AlSb quantum wells, **21**, 262
Indium arsenide
depth profiling of InAs/InP and $In_xGa_{1-x}As$/InAs heterostructures grown by molecular beam epitaxy, **28**, 228
hydrogen passivation effects in quaternary solid solutions of InGaAsSb lattice matched to GaSb, **27**, 137
ineffective grain boundaries and breakdown threshold of zinc oxide varistors, **22**, 261
intersubband transitions in InAs/AlSb quantum wells, **21**, 201
potential sources of degradation in InGaAs/GaAs laser diodes, **28**, 310
preparation by molecular beam epitaxy and atomic layer molecular beam epitaxy and characterization of InAs layers 1 monolayer thick in GaAs-based structures, **28**, 183
strained InAs/$Al_xGa_{0.48-x}In_{0.52}As$ heterostructures: a tunable quantum well materials system for light emission from the near-IR to the mid-IR, **21**, 288
Indium gallium arsenide
effects of high energy radiation on group III–V compound semiconductors, **28**, 465
relaxation of strained InGaAs/GaAs layers under thermal processing, **28**, 507
selective area bandgap modification during MBE growth of InGaAs/GaAs quantum wells for mode locked laser applications, **28**, 299
Indium oxide
numerical simulation studies of concentration profile and growth rate of InP LPE, **22**, 227
phase equilibria in the In–Pt–As system at 600°C, **22**, 267
Indium palladium
investigations on Pd/In-based high temperature stable ohmic contacts on GaAs by X-ray reflectometry and diffractometry, **29**, 70
Indium phosphide
absorption coefficient and exciton oscillator strengths in InGaAs/InP multi-quantum wells, **21**, 189
cathodoluminescence from defects in electron-irradiated InP, **24**, 135
chemical beam epitaxy and photoluminescence characteristics of InGaAsP/InP BRAQWET modulators, **21**, 293
chemical beam epitaxy of high purity InP using tertiarybutylphosphine and 1,2 bis-phosphinoethane, **21**, 165
core-level photoemission study on a Bi-2212 single crystal, **22**, 217
determination of interface state density on Au/$Ta_2O_5$/n-InP structures by different methods, **28**, 416
determination of residual strain by reflectivity, X-ray diffraction and Raman spectroscopy in ZnSe epilayers grown on GaAs(001), InP(001) and GaSb(001) by metal–organic vapor phase epitaxy, **21**, 257
effects of high energy radiation on group III–V compound semiconductors, **28**, 465
fabrication of photonic integrated circuits using quantum well intermixing, **28**, 272
gate currents in heterostructure field-effect transistors: contribution by 'warm' electrons, **28**, 264
grating fabrication and characterization method for wafers up to 2 in, **28**, 293
growth and characterization of 2 in InP crystals by the vertical gradient freeze technique, **28**, 91
growth and characterization of $In_{0.53}Ga_{0.47}As/In_xGa_{1-x}As$ strained-layer superlattices, **21**, 244
HBr–$K_2Cr_2O_7$–$H_2O$ etching system for indium phosphide, **28**, 488
high power InP/InGaAsP buried heterostructure laser for a wavelength of 1.15 $\mu$m, **28**, 296
high resolution dry etching of III–V semiconductor materials using magnetically enhanced discharges, **27**, 61
high-reflective 1.5 $\mu$m GaInAsP/InP Bragg reflectors grown by metal organic vapor phase epitaxy, **28**, 285
impurities in InP grown by MOVPE using a new precursor $Et_2InNMe_2$: photoluminescence and Hall study, **28**, 224
investigation of InGaAs/InP interdiffusion by simultaneous transmission electron microscopy and photoluminescence analysis, **21**, 277
investigation of MOVPE-grown $In_{0.53}Ga_{0.47}As$/InP multiquantum wells by Raman spectroscopy and X-ray diffractometry, **21**, 161
kinetic roughness in epitaxy (experimental), **30**, 137
large negative persistent photoconductivity of bulk $GaAs_{1-x}P_x$ ($x = 0.02$–$0.03$) single crystals, **21**, 325
lateral thickness modulations in alternate tensile–compressive strained GaInAsP multilayers grown by gas source molecular beam epitaxy, **21**, 241
morphological modifications during selective growth of InP around cylindrical and parallelepiped mesas, **28**, 179
new dry-etch chemistries for III–V semiconductors, **25**, 179
non-uniformity of Fe doping in semi-insulating LEC-grown InP and its characterization by various mapping methods, **28**, 107
on the determination and control of flats location in liquid-encapsulated Czochralski grown InP wafers, **28**, 80
optical cross-sections and distribution of $Fe^{2+}$ and $Fe^{3+}$ in semi-insulating liquid encapsulated Czochralski grown InP:Fe, **21**, 321
optical emission end point detection for via hole etching in InP and GaAs power device structures, **23**, 36
optical-beam-induced current and photoluminescence techniques for localization of crystallographic defects in optoelectronic devices, **24**, 175
photocurrent study of Fe-doped semi-insulating InP, **28**, 111
photon tunneling from semiconductor surfaces to atomic force microscopy probes, **28**, 493
positron lifetimes at vacancies in electron-irradiated indium phosphide, **28**, 126
preparation and characterization of semi-insulating 2 in InP wafers having a low Fe content by wafer annealing, **28**, 115
preparation and characterization of semi-insulating undoped indium phosphide, **28**, 95
room temperature photoreflectance as a powerful tool to characterize the crystalline quality of InAlAs layers grown on InP substrates, **21**, 177
selective and non-planar epitaxy of InP/GaInAs(P) by MOCVD, **21**, 130
sensitivity to electrostatic discharges of 'low-cost' 1.3 $\mu$m laser diodes: a comparative study, **28**, 314
spectroscopic ellipsometry a useful tool to determine the refractive indices and interfaces of $In_{0.52}Al_{0.48}As$ and $In_{0.53}Al_xGa_{0.47-x}As$ layers on InP in the wavelength range 280–1900 nm, **21**, 174
spectroscopic investigation of deep levels related to the compensation mechanism of nominally undoped semi-insulating InP, **28**, 101

strain relaxation studied by photoluminescence and by double crystal X-ray diffraction measurements in strained InGaAs, **22**, 222
structural and mechanical properties of ion implanted GaAs and InP single crystals grown by the liquid encapsulated Czochralski technique, **28**, 461
structural characterization of heavily Zn-doped liquid encapsulated Czochralski InP, **28**, 120
thermal analysis of liquid-encapsulated Czochralski-grown InP crystals, **28**, 72
thermal stresses and dislocation formation in liquid-encapsulated Czochralski-grown InP crystals, **28**, 76
transition from island to continuous InP layer growth on (001) GaAs by MOCVD, **28**, 214
Indium selenide
lithium insertion in indium selenide films Application to microbatteries, **23**, 105
Indium sulphide
strained InAs/$Al_xGa_{0.48-x}In_{0.52}As$ heterostructures: a tunable quantum well materials system for light emission from the near-IR to the mid-IR, **21**, 288
Infrared
UV and infrared studies of $TiO_2$ thin film cathodes in Ag/AgI/$TiO_2$, $SnO_2$ photosensitive galvanic cells, **23**, 41
Infrared detectors
a study of PbSe heteroepitaxy on Si(111) for IR optoelectronic applications, **21**, 317
shadow mask MBE for the fabrication of lead chalcogenide buried heterostructure lasers, **21**, 217
strained InAs/$Al_xGa_{0.48-x}In_{0.52}As$ heterostructures: a tunable quantum well materials system for light emission from the near-IR to the mid-IR, **21**, 288
tunable infrared photoemission sensor on Si using epitaxial $ErSi_2$/Si heterostructures, **21**, 312
Infrared spectroscopy
differential scanning calorimetry study of structural relaxation of Ge-doped $Se_{85}Te_{15}$ glasses, **22**, 181
InGaAs
spatially resolved photoluminescence investigation of optical damage induced by $SiN_x$ deposition in InGaAs, **23**, 142
stability of phase-separated microstructure in LPE-grown InGaAs epitaxial layers, **28**, 209
thermally stable WTiAu non-alloyed ohmic contacts on $In_{0.5}Ga_{0.5}As$ for GaAs–AlGaAs heterojunction bipolar transistor applications, **25**, 175
InGaAsP
strained multi-quantum well heterostructures for lasers, modulators and integrated optical devices at 1.3–1.55 $\mu$m, **28**, 279
Ingot segregation
segregation in Bridgman grown ingots of $Hg_{1-x}Cd_xTe$, **27**, L17
Integrated circuits
electrical characterization of integrated circuits by scanning force microscopy, **24**, 218
silicon-on-insulator technology for high temperature metal oxide semiconductor devices and circuits, **29**, 7
Integrated technology
AlGaInP/GaInAs/GaAs MODFET devices: candidates for optoelectronic integrated circuits, **21**, 304
dopant redistribution during the formation of tungsten disilicide by rapid thermal processing, **22**, 168
improved metal–dielectric adhesion for interconnect lines of MMICs and ICs: an experimental study, **28**, 357
mapping of defects and their recombination strength by a light-beam-induced current in silicon wafers, **24**, 152
silicon-on-insulator technology for high-temperature, smart-power applications, **29**, 1
Interdiffusion
*in situ* growth of Y–Ba–Cu–O films by ion beam sputtering, **22**, 165
influence of surface treatment on electrical activity of dislocations and minority carrier diffusion length in cast multicrystalline silicon, **24**, 74
investigation of InGaAs/InP interdiffusion by simultaneous transmission electron microscopy and photoluminescence analysis, **21**, 277
optical investigation of interdiffusion in CdTe/CdMnTe quantum wells, **21**, 274
synthesis and transport properties of mixed MEEP–PEO–NaSCN polymer electrolytes, **22**, 206
vacancy controlled interdiffusion in III–V heterostructures, **21**, 281
Interface roughness
recrystallization of strained $Ge_xSi_{1-x}$/Si layers with various Ge gradients and in the presence of impurities, **28**, 9
Interface states
application of angle resolved X-ray photoelectron spectroscopy to the study of GaAs (001) surfaces and metal/GaAs (001) interfaces, **28**, 527
Interface vibrations
characterization of heterointerfaces and surfaces in InSb on GaAs and in InAs/AlSb quantum wells, **21**, 262
Interfaces
MBE growth and properties of high quality Al(Ga)InAs/GaInAs MQW structures, **21**, 194
metastable electrical activity of misfit-dislocation-associated defects in Si/Si(Ge) heteroepitaxial structures: EBIC/DLTS correlation, **24**, 43
strain relaxation studied by photoluminescence and by double crystal X-ray diffraction measurements in strained InGaAs, **22**, 222
X-ray photoelectron spectroscopy analyses of the surface and interface of Pd-based p-GaP ohmic contact layer, **25**, 24
Interfacial strain
growth and characterization of $In_{0.53}Ga_{0.47}As/In_xGa_{1-x}As$ strained-layer superlattices, **21**, 244
Interfacial stress
improved metal–dielectric adhesion for interconnect lines of MMICs and ICs: an experimental study, **28**, 357
mechanisms of strain release in molecular beam epitaxy grown InGaAs/GaAs buffer heterostructures, **28**, 510
roughening and facetting in lattice-mismatched heteroepitaxial growth of compound semiconductors: a Monte Carlo study, **28**, 200
X-ray characterization of very thin $Ga_xIn_{1-x}P$ ($x \sim 0.5$) layers grown on InP, **28**, 188
Ion beams
*in situ* growth of superconducting Y–Ba–Cu–O thin films by ion-beam sputtering method, **21**, 5
complex admittance study of potassium yttrium fluoride, **22**, 159
effect of previous heat treatment on ionic conductivity of yttrium-doped KBr crystals, **21**, 1
Ion bombardment
low energy positron beam studies of nano-TiN films, **26**, 163
redistribution of atoms in the near-surface layer of multielemental solids related to variations of the ion beam parameters, **27**, 23

Ion channeling
lattice strain relaxation of ZnS layers grown by vapour-phase epitaxy on (100) GaAs, **28**, 55
Ion implantation
characterization of implanted silicon wafers by the non-linear photoreflectance technique, **24**, 199
defect production and annealing in ion implanted silicon carbide, **29**, 142
dopant redistribution during the formation of tungsten disilicide by rapid thermal processing, **22**, 168
electronic structure of non-stoichiometric Ga-As compounds, **22**, 290
electronic transport in thermally crystallized SiC films on sapphire, **29**, 147
ion implantation effects in GaSb, **27**, 129
macrodefect formation in semiconductors during high energy ion implantation: Monte Carlo simulation of damage depth distributions, **29**, 202
Rutherford backscattering studies of solid phase recrystallization and incorporation in erbium-implanted silicon, **30**, L1
simulation of MOCVD-process for Y–Ba–Cu–O film production in stagnation zone reactor, **22**, 317
simulation of lateral Al recoil atoms and damage defects gradients in a GaAs/GaAlAs quantum well created by masked ion implantation, **21**, 284
strain reduction in the Si overlayer for improved SIMOX material, **29**, 29
structural and mechanical properties of ion implanted GaAs and InP single crystals grown by the liquid encapsulated Czochralski technique, **28**, 461
time evolution of dislocation formation in ion implanted silicon, **25**, 60
vacancy controlled interdiffusion in III–V heterostructures, **21**, 281
X-ray photoelectron spectroscopy study of $Sn^+$ implanted a-$Si_{1-x}C_x$:H thin films, **29**, 165
Ion-assisted laser processing
ion-assisted laser processing of $CN_x$ films, **26**, 49
Ionic conduction
elaboration, characterization and electrical properties of Na–Al–O thin films, **26**, 181
electrical conduction in MnTe and MnSe films, **21**, L1
far-infrared spectra of lithium–titanium mixed ferrites, **22**, 201
identification of CuO as a minority phase in YBCO: X-ray diffraction *vs.* EMF and coulometric titration measurements, **22**, 310
study of the equilibrium processes in the gas phase during silicon carbide sublimation, **21**, 65
Ionization
determination of the electronic structure of grain boundaries by energy-resolved photoconductivity measurements, **24**, 159
Ions
cation dependence of the electronic structure of AlAs and GaAs, **25**, 79
formation of β-SiC films by ion beam mixing of Si/C multilayers, **29**, 105
IR phase microscopy
variation of free charge carrier concentration in doped GaAs studied by phase microscopy, **28**, 481
IR spectroscopy
carbonization of Si surfaces by solid source molecular beam epitaxy, **29**, 138
deposition and optical properties of amorphous hydrogenated $Si_xC_y$ layers, **29**, 151
determination of the GaN/AlN band discontinuities via the (−/0) acceptor level of iron, **29**, 61
far-IR characterization of GaInAs/InP quantum wells and superlattices, **28**, 337
undoped GaAs grown by the vertical gradient freeze method: growth and properties, **28**, 87
Iridium
tunable infrared photoemission sensor on Si using epitaxial $ErSi_2$/Si heterostructures, **21**, 312
Iron
a study on the preparation and magnetic properties of $Fe_{100-x}B_x$ ultrafine amorphous powders, **25**, 193
optical cross-sections and distribution of $Fe^{2+}$ and $Fe^{3+}$ in semi-insulating liquid encapsulated Czochralski grown InP:Fe, **21**, 321
Iron oxide
surface *vs.* bulk composition of an oxidic Fe–Mo multicomponent catalyst, **25**, 1
Iron/chromium silicide
preparation and properties of new ternary compound crystals of $(Cr,Fe)_3Si_2$ by in-situ chemical vapor deposition, **27**, 73
Island formation
island formation in Ge/Si epitaxy, **30**, 197
ISOVPE
orientation dependence of morphology of (Hg, Cd)Te films grown by isothermal vapor phase epitaxy, **27**, 87
ISOVPE films morphology
orientation dependence of morphology of (Hg, Cd)Te films grown by isothermal vapor phase epitaxy, **27**, 87

**L**

$La_{1.85}Sr_{0.15}CuO_4$
processing and properties of superconducting $La_{1.85}Sr_{0.15}CuO_4$ powder by double-step calcining, **27**, 117
Lanthanum heptamolybdate
dielectric studies of lanthanum heptamolybdate crystals grown from gels, **30**, 7
Lanthanum niobium oxynitride
preparation of oxynitride thin films of $BaNb(O_yN)_x$ and $LaNb(O_yN_2)_x$ using reactive sputtering from multiphase powder targets, **25**, 197
Laser
growth, laser and magneto-optic properties of Nd-doped $Bi_4Ge_3O_{12}$ crystals, **23**, 83
Laser ablation deposition
preperation of Co/Pd multilayer films by laser ablation deposition, **23**, 25
Laser deposition
subsurface overheating of targets in laser deposition of superconducting films, **23**, L9
Laser effect
electrical conductivity of rutile single crystals after heating by pulsed laser, **25**, 92
Laser processing
diamond, diamond-like and titanium nitride biocompatible coatings for human body parts, **25**, 5
the Czochralski growth of $SrLaGa_3O_7$ single crystals and their optical and lasing properties, **26**, 201
the properties of heavily compensated high resistivity GaSb crystals, **22**, 279
Lasers
aluminium-free 980 nm laser diodes, **21**, 211
characterization of implanted silicon wafers by the non-linear photoreflectance technique, **24**, 199

ESPRIT MORSE: research for novel metal–organic precursors, **21**, 147
lateral thickness modulations in alternate tensile–compressive strained GaInAsP multilayers grown by gas source molecular beam epitaxy, **21**, 241
MBE growth and properties of high quality Al(Ga)InAs/GaInAs MQW structures, **21**, 194
photothermal scanning near-field microscopy, **24**, 226
shadow mask MBE for the fabrication of lead chalcogenide buried heterostructure lasers, **21**, 217
p-dopant incorporation and influence on gain and damping behaviour in high-speed GaAs-based strained MQW lasers, **21**, 232
Layer structures
investigation of the cationic ordering in InGaP/GaAs epilayers grown by low-pressure, metal organic vapour phase epitaxy, **28**, 219
material quality assessment of epitaxial layers of ZnSe and related compounds, **28**, 61
reactive ion etching of GaInP/GaAs multilayer structures with $SiCl_4$–$Cl_2$–Ar plasma, **28**, 365
Layered compounds
evaluation of III-V growth technologies for optoelectronic applications, **21**, 120
Lead
microstructural study of melt-processed $YBa_2Cu_3O_{7-\delta}$ thick films on yttria-stabilized zirconia, **21**, 19
Lead telluride
influence of the boundary on the interdiffusion in heterostructures, **26**, 147
LEC
non-uniformity of Fe doping in semi-insulating LEC-grown InP and its characterization by various mapping methods, **28**, 107
process-induced defects in manufacture of GaAs monolithic microwave integrated circuits, **28**, 268
thermal analysis of liquid-encapsulated Czochralski-grown InP crystals, **28**, 72
thermal stresses and dislocation formation in liquid-encapsulated Czochralski-grown InP crystals, **28**, 76
Lely method
growth of bulk SiC, **29**, 83
LETI method
growth of bulk SiC, **29**, 83
Light emitting diodes
deep centers and electroluminescence in 4H–SiC diodes with a p-type base region, **29**, 181
Light-beam-induced current
Monte Carlo simulation of the minority-carrier recombination at and around grain boundaries surrounded by a denuded zone revealed by light-beam-induced current mapping, **24**, 180
Light-emitting diodes
failure mechanisms in II–VI blue–green emitters, **28**, 29
Liquid phase epitaxy
a new substrate holder for liquid phase epitaxy growth of $Hg_{1-x}Cd_xTe$ from Hg-rich solutions, **28**, 36
an electron-beam-induced current study of dislocations in GaAs, **24**, 91
buried heterostructure AlGaAs photonic devices fabricated by low temperature mesa melt etching and regrowth, **28**, 302
high power InP/InGaAsP buried heterostructure laser for a wavelength of 1.15 $\mu$m, **28**, 296
new developments in the liquid-phase epitaxy of $Hg_{1-x}Cd_xTe$, **28**, 21
selective liquid-phase epitaxy growth of $In_xGa_{1-x}As_yP_{1-y}$ on structured GaAs(100) substrates, **28**, 193
stability of phase-separated microstructure in LPE-grown InGaAs epitaxial layers, **28**, 209
strain relaxation studied by photoluminescence and by double crystal X-ray diffraction measurements in strained InGaAs, **22**, 222
Lithium
lithium insertion in indium selenide films Application to microbatteries, **23**, 105
Raman and infrared spectroscopic studies of Ge–Ga–Ag sulphide glasses, **22**, 191
Lithium ferrite
substitution for iron by non-magnetic constituents in spinel lithium ferrite, **25**, 73
Lower pressure chemical vapour deposition
selectivity in low pressure chemical vapor deposition of copper from hexafluoroacetylacetonate-copper(I)-trimethylvinylsilane in the presence of water, **23**, 48
Luminescence
luminescence from rod-like defects and hydrogen related centres in silicon, **24**, 144
MBE regrowth of GaAs/AlGaAs structures on RIE patterned substrates, **21**, 153
optical investigation of interdiffusion in CdTe/CdMnTe quantum wells, **21**, 274
phenomenon of bistability in luminescence, **28**, 444
photoluminescence and electroluminescence processes in $Si_{1-x}Ge_x$/Si heterostructures grown by chemical vapor deposition, **21**, 307
Raman study of mechanical stresses in processes of oxygen precipitation in silicon, **21**, 49
recombination activity of 'clean' and contaminated misfit dislocations in Si(Ge) structures, **24**, 52
theory of electron-beam-induced current and cathodoluminescence imaging of crystal defects: some new results, **24**, 15

**M**

Magnetic anisotropy
development of (001) texture of MnSb in thin films prepared by interdiffusion of Mn/Sb multilayers, **27**, 109
Magnetic field effect
behaviour of ferromagnetic sheets in alternating electric and magnetic fields, **30**, 23
negative magnetoresistance for different orientations of n-type $CdAs_2$ in the variable-range hopping regime, **26**, 19
suppression of superconductivity by magnetic field in quench-condensed ultrathin films of indium, **25**, 187
Magnetic measurements
a.c. and d.c. susceptibility studies on silver-doped BPSCCO (2223) superconductors, **26**, 151
magnetic properties of $Ba_2Cu_3O_4Cl_2$ single crystals, **25**, 167
Magnetic properties
influence of hydrogen on the hyperfine field of amorphous $Fe_{83.3}Si_{3.5}B_{11.2}C_2$ alloy, **25**, 20
stability of cubic $ZrO_2$ (10 mol.% $Y_2O_3$) when alloyed with NiO, $Al_2O_3$ or $TiO_2$: implications to solid electrolytes and cermets, **22**, 247
study of $Eu^{3+}$-doped luminescence glasses prepared by a sol–gel process, **21**, 55
the preparation, structure, magnetic and electrical properties of $Cu^{I}Cu^{II}Mg_3(PO_4)_3$, **23**, 88
Magnetic sheets
behaviour of ferromagnetic sheets in alternating electric and magnetic fields, **30**, 23

Magneto-optic properties
growth, laser and magneto-optic properties of Nd-doped $Bi_4Ge_3O_{12}$ crystals, **23**, 83
Magnetoresistance
extremely high mobility carriers in organic conductor $\alpha$-(BEDT–TTF)$_2I_3$ under high pressure, **25**, L1
Manganese
behaviour of Mn in GaSb grown by the Bridgman method, **27**, 39
development of (001) texture of MnSb in thin films prepared by interdiffusion of Mn/Sb multilayers, **27**, 109
electrical properties of Mn-doped GaSb, **28**, 134
perpendicular electrical conduction in Cu/Mn multilayer films, **23**, L1
Mapping
characterization of Bragg reflector structures using scanning reflectance spectral mapping, **28**, 457
Mass spectrometry
quantitative comparison of mass spectrometry and photoluminescence on InAsP/InP multiple quantum well structures, **28**, 319
Mechanical properties
characterization of the Z luminescence system in high purity CdTe, **26**, 1
realization of capacitive structures from plasma enhanced chemical vapor deposition process, **21**, 41
Vickers microhardness of semiconductor $CuInSe_2$, **27**, 1
Young's modulus of MnAl and MnBi films, **25**, L7
Melt texture growth
reactivity of $BaSnO_3$ as additive agent with the 211 and 123 yttrium barium cuprates, **27**, 29
Melting
microstructure and properties of lead ferroniobate ceramics ($Pb(Fe_{0.5}Nb_{0.5})O_3$), **21**, 26
Mercury cadmium telluride
a new substrate holder for liquid phase epitaxy growth of $Hg_{1-x}Cd_xTe$ from Hg-rich solutions, **28**, 36
growth and characterization of anodic sulphide films on $Hg_{0.80}Cd_{0.20}Te$ grown from freshly prepared solution and stored solution, **26**, L1
orientation dependence of morphology of (Hg, Cd)Te films grown by isothermal vapor phase epitaxy, **27**, 87
segregation in Bridgman grown ingots of $Hg_{1-x}Cd_xTe$, **27**, L17
Mercury telluride
characterization study of CdS passivation layers on $Hg_xCd_{1-x}Te$, **28**, 43
new developments in the liquid-phase epitaxy of $Hg_{1-x}Cd_xTe$, **28**, 21
Mercury zinc telluride
application of angle resolved X-ray photoelectron spectroscopy to the study of GaAs (001) surfaces and metal/GaAs (001) interfaces, **28**, 527
Metal–insulator–semiconductor structures
temperature dependence of the thin film silicon-on-insulator field effect transistor current characteristics based on full solution for the one-dimensional MISIS structure, **29**, 38
Metal–insulator transitions
effect of temperature on the electrical resistivity of $YBa_2Cu_3O_{7-x}$ filled polyethylene, **27**, 13
electrical properties of Mn-doped GaSb, **28**, 134
extremely high mobility carriers in organic conductor $\alpha$-(BEDT–TTF)$_2I_3$ under high pressure, **25**, L1
study of $Eu^{3+}$-doped luminescence glasses prepared by a sol–gel process, **21**, 55
suppression of superconductivity by magnetic field in quench-condensed ultrathin films of indium, **25**, 187
Metal–organic chemical vapour deposition
oxygen ion conductivity in $Ba_3In_{3-x}Zr_xO_{7.5+x/2}$ ($x = 0.7$–1.3), **22**, 313
selective and non-planar epitaxy of InP/GaInAs(P) by MOCVD, **21**, 130
Metal–organic molecular beam epitaxy
evaluation of III-V growth technologies for optoelectronic applications, **21**, 120
Metal–organic vapour phase epitaxy
determination of residual strain by reflectivity, X-ray diffraction and Raman spectroscopy in ZnSe epilayers grown on GaAs(001), InP(001) and GaSb(001) by metal–organic vapor phase epitaxy, **21**, 257
ESPRIT MORSE: research for novel metal–organic precursors, **21**, 147
effects of deep levels and Si-doping on GaInP material properties investigated by means of optical methods, **21**, 181
growth and characterization of $In_{0.53}Ga_{0.47}As/In_xGa_{1-x}As$ strained-layer superlattices, **21**, 244
improvements in the heteroepitaxial growth of GaAs on Si by MOVPE, **21**, 266
investigation of MOVPE-grown $In_{0.53}Ga_{0.47}As/InP$ multi-quantum wells by Raman spectroscopy and X-ray diffractometry, **21**, 161
metal–organic vapour-phase epitaxial growth of symmetrically strained (GaIn)As/Ga(PAs) superlattices, **21**, 249
optical characterization of extremely high purity ZnSe grown by metal–organic vapour phase epitaxy using dimethylzinc-triethylamine adduct, **21**, 169
polarization of light from an optically pumped (Al–Ga–N)/(Ga–In–N) double heterostructure, **26**, L5
spectroscopic ellipsometry a useful tool to determine the refractive indices and interfaces of $In_{0.52}Al_{0.48}As$ and $In_{0.53}Al_xGa_{0.47-x}As$ layers on InP in the wavelength range 280–1900 nm, **21**, 174
Metallic glasses
influence of hydrogen on the hyperfine field of amorphous $Fe_{83.3}Si_{3.5}B_{11.2}C_2$ alloy, **25**, 20
Metallization
thermal response of optical fibers to metallization processing, **23**, L5
Metalorganics
chemical beam epitaxial growth of GaAs from tertiarybutylarsine and triethylgallium precursors, **28**, 155
Metal–oxide–semiconductor structures
determination of interface state density on $Au/Ta_2O_5$/n-InP structures by different methods, **28**, 416
silicon-on-insulator technology for high-temperature, smart-power applications, **29**, 1
Metals
a study of the Zn-doping process in metal-organic chemical vapour deposition GaAs and GaAlAs, **30**, 39
evaluation of elastic moduli in thin-film/substrate systems by the two-layer vibrating reed method, **30**, 35
many-particle theory of electron transport processes in transition liquid and amorphous metals, **26**, 141
wetting of Si–Al–O–N ceramic by Sn–5at.%Ti–X ternary active solder, **25**, 39
Metal–semiconductor field effect transistors
modelling the effects of piezoelectrically active defects and their impact on the threshold voltage of GaAs metal–semiconductor field effect transistors, **28**, 248
Metal–semiconductor interfaces
effect of chemical treatments on the composition of HgZnTe surfaces, **28**, 39

Method of successive reactions
behaviour of ferromagnetic sheets in alternating electric and magnetic fields, **30**, 23
MH electrode
effects of measurement factor on electrochemical capacity of some hydrogen storage alloys, **30**, 19
Microbatteries
lithium insertion in indium selenide films Application to microbatteries, **23**, 105
Microstructural development
influence of preparation procedure on some physical properties of BICUVOX, **21**, 70
microstructural study of melt-processed $YBa_2Cu_3O_{7-\delta}$ thick films on yttria-stabilized zirconia, **21**, 19
thermodynamic aspects of (Te, S)-double-doped GaSb crystal growth, **21**, 14
Microstructure
correlation between microstructure and electrical conductivity in $Pb(Fe_{1/2}Nb_{1/2})O_3$–$Pb(Fe_{2/3}W_{1/3})O_3$–$Pb(Zn_{1/3}Nb_{2/3})O_3$ relaxor ferroelectrics, **26**, 189
development of microstructure and superconductivity of silver-clad Bi(2223) composite tapes in the process of heat treatment, **23**, 58
microstructure and properties of high temperature superconducting materials, **26**, 75
Misfit dislocations
structural properties of GaAs/Ge heterostructures as a function of growth conditions, **28**, 502
Mixed crystals
optical determination of the composition of bulk SiGe monocrystals, **28**, 18
Mixed III-V layers
two-dimensional phase separation and surface-reconstruction driven atomic ordering in mixed III–V layers, **30**, 187
Mixing
formation of β-SiC films by ion beam mixing of Si/C multilayers, **29**, 105
MOCVD
a study of minority carrier lifetimes in (Al)GaInP/AlInP double heterostructures grown by metal organic chemical vapour deposition, **28**, 404
characterization of Bragg reflector structures using scanning reflectance spectral mapping, **28**, 457
characterization of high quality InGaP/GaAs and InGaAsP/GaAs heterostructures grown by low pressure metal–organic chemical vapour deposition, **28**, 158
deep-level characterization of $Al_xIn_{1-x}As$ layers grown by low pressure metal–organic chemical vapor deposition, **28**, 421
high-reflective 1.5 $\mu$m GaInAsP/InP Bragg reflectors grown by metal organic vapor phase epitaxy, **28**, 285
material quality assessment of epitaxial layers of ZnSe and related compounds, **28**, 61
metal–organic chemical vapor deposition growth of GaN, **29**, 58
metal–organic vapour phase epitaxy growth and Raman characterization of (111) A and B oriented GaAs/InP heterostructures, **28**, 164
transition from island to continuous InP layer growth on (001) GaAs by MOCVD, **28**, 214
X-ray characterization of very thin $Ga_xIn_{1-x}P$ ($x \sim 0.5$) layers grown on InP, **28**, 188
Modeling
thermal analysis of liquid-encapsulated Czochralski-grown InP crystals, **28**, 72
thermal stresses and dislocation formation in liquid-encapsulated Czochralski-grown InP crystals, **28**, 76
Molecular and atom beam epitaxy
fully planar AlGaAs/GasAs heterojunction bipolar transistors using chemical beam epitaxy selective growth, **28**, 261
studies of deep-level defects at III–V heterointerfaces, **28**, 387
Molecular beam epitaxy
a study of PbSe heteroepitaxy on Si(111) for IR optoelectronic applications, **21**, 317
a study of the defect structure in GaAs layers grown at low and high temperatures on Si(001) substrates, **28**, 196
anomalous thermionic-field emission in epitaxial Al/n-AlGaAs junctions, **28**, 429
atomic force microscopy and scanning tunneling microscopy studies of large-scale unstable growth formed during GaAs(001) homoepitaxy, **30**, 143
carbonization of Si surfaces by solid source molecular beam epitaxy, **29**, 138
core-level photoemission study on a Bi-2212 single crystal, **22**, 217
crystal defects in vertical cavity epitaxial structures on GaAs investigated by X-ray methods, **28**, 520
deep-level states and electrical properties of GaAs grown at 250°C, **28**, 393
depth profiling of InAs/InP and $In_xGa_{1-x}As$/InAs heterostructures grown by molecular beam epitaxy, **28**, 228
effects of hydrogenation of deep and shallow levels in AlGaAs grown by MBE, **28**, 425
electrical properties of molecular beam epitaxial GaAs layers grown at low temperature, **28**, 147
experimental and theoretical studies of multi-quantum well structures for unipolar avalanche multiplication, **21**, 237
growth and structural characterization of thin Ge films by molecular dynamics simulation, **26**, 61
growth of InAlGaAs multilayer structures for high power and submilliamp vertical cavity lasers, **21**, 228
how to induce the epitaxial growth of gallium nitride on Si(001), **29**, 74
improved method for GaAs-(Ga,Al)As epitaxial regrowth, **21**, 157
kinetic roughness in epitaxy (experimental), **30**, 137
kinetics of epitaxial growth and roughening, **30**, 149
lateral thickness modulations in alternate tensile–compressive strained GaInAsP multilayers grown by gas source molecular beam epitaxy, **21**, 241
MBE growth and properties of high quality Al(Ga)InAs/GaInAs MQW structures, **21**, 194
MBE regrowth of GaAs/AlGaAs structures on RIE patterned substrates, **21**, 153
mechanisms of layer growth during molecular beam epitaxy of semiconductor films, **30**, 87
molecular beam epitaxial growth and characterization of II–VI blue–green laser diodes having continuous-wave operation at room temperature, **28**, 51
Monte Carlo simulation of growth and recovery of silicon, **29**, 34
observation of Si out-diffusion related defects in SiC growth on Si(001), **29**, 110
optical investigation of interdiffusion in CdTe/CdMnTe quantum wells, **21**, 274
optical properties of GaSb–AlSb heterostructures grown by molecular beam epitaxy, **21**, 185
photoluminescence study of surface segregation of In in InGaAs-based structures grown by MBE and atomic layer MBE, **28**, 469

preparation by molecular beam epitaxy and atomic layer molecular beam epitaxy and characterization of InAs layers 1 monolayer thick in GaAs-based structures, **28**, 183
preparation of GaSb by molecular beam epitaxy and electrical and photoluminescence characterization, **28**, 174
redistribution and incorporation of Si in GaAs due to indium doping, **26**, 7
role of steps in epitaxial growth, **30**, 121
room temperature photoreflectance as a powerful tool to characterize the crystalline quality of InAlAs layers grown on InP substrates, **21**, 177
scanning tunneling microscopy studies of the GaAs(001) surface and the nucleation of ZnSe on GaAs(001), **30**, 73
selective area bandgap modification during MBE growth of InGaAs/GaAs quantum wells for mode locked laser applications, **28**, 299
shadow mask MBE for the fabrication of lead chalcogenide buried heterostructure lasers, **21**, 217
strained $InAs/Al_xGa_{0.48-x}In_{0.52}As$ heterostructures: a tunable quantum well materials system for light emission from the near-IR to the mid-IR, **21**, 288
the characteristics of intimate $Au-In_yAl_{1-y}As$ Schottky diodes: a mismatch dependence study, **28**, 433

Molecular dynamics
growth and structural characterization of thin Ge films by molecular dynamics simulation, **26**, 61

Molecular dynamics simulations
ab initio studies of single-height Si(001) steps, **30**, 167

Molybdenum
surface *vs.* bulk composition of an oxidic Fe–Mo multicomponent catalyst, **25**, 1

Monochromators
the problem of convolution in the simulation of multicrystal X-ray rocking curves of semiconductor materials, **28**, 523

Monte Carlo models
Monte Carlo simulation of growth and recovery of silicon, **29**, 34
roughening and facetting in lattice-mismatched heteroepitaxial growth of compound semiconductors: a Monte Carlo study, **28**, 200

Morphology
investigations on the texture of Bi-based superconductor tapes, **23**, 1

MOS devices
silicon-on-insulator technology for high temperature metal oxide semiconductor devices and circuits, **29**, 7

MOSFET
use of the charge pumping technique to understand non-uniform *n*-channel MOSFET degradation, **23**, 120

Mossbauer effect
surface *vs.* bulk composition of an oxidic Fe–Mo multicomponent catalyst, **25**, 1

Mossbauer spectroscopy
influence of hydrogen on the hyperfine field of amorphous $Fe_{83.3}Si_{3.5}B_{11.2}C_2$ alloy, **25**, 20

MOVPE
fabrication of 1.5 $\mu$m optically pumped $Ga_{1-x}In_xAs_yP_{1-y}/InP$ vertical-cavity surface-emitting lasers, **28**, 289
impurities in InP grown by MOVPE using a new precursor $Et_2InNMe_2$: photoluminescence and Hall study, **28**, 224
Si delta-doped GaAs and AlGaAs by low-pressure MOVPE, **28**, 204

Multi-quantum well structures
strained multi-quantum well heterostructures for lasers, modulators and integrated optical devices at 1.3–1.55 $\mu$m, **28**, 279

Multilayer films
perpendicular electrical conduction in Cu/Mn multilayer films, **23**, L1
preperation of Co/Pd multilayer films by laser ablation deposition, **23**, 25

Multilayer materials
growth of InAlGaAs multilayer structures for high power and submilliamp vertical cavity lasers, **21**, 228
inorganic oxide solid state electrochromic devices, **26**, 157
lateral thickness modulations in alternate tensile–compressive strained GaInAsP multilayers grown by gas source molecular beam epitaxy, **21**, 241
modulated cathodoluminescence for extended defect characterization, **24**, 121
$NdGaO_3$ substrates with defined grain boundaries prepared by welding or soldering, **21**, 36
synthesis and transport properties of mixed MEEP–PEO–NaSCN polymer electrolytes, **22**, 206

Multilayers
formation of β-SiC films by ion beam mixing of Si/C multilayers, **29**, 105

Multiphase target
preparation of oxynitride thin films of $BaNb(O_yN)_x$ and $LaNb(O_yN_2)_x$ using reactive sputtering from multiphase powder targets, **25**, 197

Multiple-quantum-well
determination of carrier and impurity profiles in doped n-type quantum well structures, **28**, 341

**N**

Nanostructure
correlation between dielectric properties and nanostructure in a $Pb(In_{1/2}Nb_{1/2})O_3$ ceramic, **25**, 85

Narrow band-gap semiconductors
a study of PbSe heteroepitaxy on Si(111) for IR optoelectronic applications, **21**, 317

Neodymium
growth, laser and magneto-optic properties of Nd-doped $Bi_4Ge_3O_{12}$ crystals, **23**, 83

Neodymium heptamolybdate
growth of neodymium heptamolybdate crystals in silica gels at ambient temperatures, **23**, 73

New precursor
impurities in InP grown by MOVPE using a new precursor $Et_2InNMe_2$: photoluminescence and Hall study, **28**, 224

Nickel
synthesis and transport properties of mixed MEEP–PEO–NaSCN polymer electrolytes, **22**, 206

Ni–MH battery
effects of measurement factor on electrochemical capacity of some hydrogen storage alloys, **30**, 19

Niobium
recrystallization of boron-doped and undoped preamorphized silicon layers by rapid and conventional thermal annealing, **22**, 128

Nitrides
cation dependence of the electronic structure of AlAs and GaAs, **25**, 79
determination of the GaN/AlN band discontinuities via the $(-/0)$ acceptor level of iron, **29**, 61
development of chemical beam epitaxy for the deposition of gallium nitride, **29**, 78
phase formation in the $TeO_2$–AlN system, **26**, 197

Nitrogen
structure of nitrogen-substituted graphite prepared by chemical vapor deposition, **29**, 220
Non-linear effects
non-linear photothermal response of thin solid films and coatings, **26**, 111
theory of combined acousto-photo-thermal spectral decomposition in condensed phases: parametric generation of thermal waves by a non-stationary ('breathing') sub-surface defect, **26**, 121
Non-planar epitaxy
selective and non-planar epitaxy of InP/GaInAs(P) by MOCVD, **21**, 130
Nuclear detector
study of the photodecay in CdTe X-ray detectors, **28**, 47
Nucleation
energy functions, structure, mechanism of solidification, modulus of rupture and tensile tests of the binary organic eutectic system benzoic acid–diphenylamine, **25**, 11
study of the growth rate of diamond film by hot-filament CVD, **25**, 47
transition from island to continuous InP layer growth on (001) GaAs by MOCVD, **28**, 214

**O**

Ohmic contacts
investigations on Pd/In-based high temperature stable ohmic contacts on GaAs by X-ray reflectometry and diffractometry, **29**, 70
thermally stable WTiAu non-alloyed ohmic contacts on $In_{0.5}Ga_{0.5}As$ for GaAs–AlGaAs heterojunction bipolar transistor applications, **25**, 175
OMCVD
observation and analysis of epitaxial growth with reflectance-difference spectroscopy, **30**, 109
OMVPE
in-situ X-ray studies of organometallic vapor phase epitaxy growth, **30**, 99
Optical absorption
large negative persistent photoconductivity of bulk $GaAs_{1-x}P_x$ ($x = 0.02$–$0.03$) single crystals, **21**, 325
optical and transport properties in the electro-optical material $CdIn_2Te_4$, **21**, 333
quantum confined Stark effect (QCSE) and self-electro-optic effect device (SEED) in II–VI heterostructures, **21**, 224
Optical damage
spatially resolved photoluminescence investigation of optical damage induced by $SiN_x$ deposition in InGaAs, **23**, 142
Optical fibres
thermal response of optical fibers to metallization processing, **23**, L5
Optical measurements
characterization of the heterostructure between heteroepitaxially grown β-$FeSi_2$ and (111) silicon, **21**, 270
effects of deep levels and Si-doping on GaInP material properties investigated by means of optical methods, **21**, 181
optical characterization of $As_2S_3$ and $As_2Se_3$ semiconducting glass films of non-uniform thickness from transmission measurements, **25**, 53
optical investigation of interdiffusion in CdTe/CdMnTe quantum wells, **21**, 274
stability of cubic $ZrO_2$ (10 mol.% $Y_2O_3$) when alloyed with NiO, $Al_2O_3$ or $TiO_2$: implications to solid electrolytes and cermets, **22**, 247
Optical properties
boron doped diamond films: electrical and optical characterization and the effect of compensating nitrogen, **29**, 211
cathodoluminescence imaging of dislocations in CdS: a new defocused-mirror technique, **24**, 105
chemical beam epitaxy of high purity InP using tertiarybutylphosphine and 1,2 bis-phosphinoethane, **21**, 165
correlations between the thermoelectric power and Hall effect of Sn or Ge doped $In_2O_3$ semiconductors, **22**, 274
deposition and optical properties of amorphous hydrogenated $Si_xC_y$ layers, **29**, 151
experimental and theoretical studies of multi-quantum well structures for unipolar avalanche multiplication, **21**, 237
influence of the cap layer thickness on the optical properties of near surface GaInAs/GaAs quantum wells, **21**, 198
MBE growth and properties of high quality Al(Ga)InAs/GaInAs MQW structures, **21**, 194
MBE regrowth of GaAs/AlGaAs structures on RIE patterned substrates, **21**, 153
magnetic circular dichroism and electron spin resonance of the $A^-$ acceptor state of vanadium, $V^{3+}$, in 6H-SiC, **29**, 118
metal–organic vapour-phase epitaxial growth of symmetrically strained (GaIn)As/Ga(PAs) superlattices, **21**, 249
modulated electron-beam-induced current and cathodoluminescence, **24**, 23
numerical simulation studies of concentration profile and growth rate of InP LPE, **22**, 227
observation of blue shift in GaAs/InGaP quantum well p–i–n diodes, **28**, 323
optical and electrical characterization of thick GaSb buffer layers grown on 2 in GaAs wafers, **28**, 169
optical and recording properties of copper phthalocyanine films, **25**, 171
optical and transport properties in the electro-optical material $CdIn_2Te_4$, **21**, 333
optical characterization of extremely high purity ZnSe grown by metal–organic vapour phase epitaxy using dimethylzinc-triethylamine adduct, **21**, 169
optical determination of the composition of bulk SiGe monocrystals, **28**, 18
optical properties of GaSb–AlSb heterostructures grown by molecular beam epitaxy, **21**, 185
photon tunneling from semiconductor surfaces to atomic force microscopy probes, **28**, 493
quantitative investigation of interdiffusion effects in balanced-strain InGaAs(P)/InGaAsP heterostructures: constant $x$ vs. constant $y$, **28**, 353
quantum confined Stark effect (QCSE) and self-electro-optic effect device (SEED) in II–VI heterostructures, **21**, 224
room-temperature photoluminescence characterization of thin-emitter GaAlAs/GaAs and GaAlAs/GaAs/Ge solar cells, **28**, 474
sensitivity to electrostatic discharges of 'low-cost' 1.3 $\mu$m laser diodes: a comparative study, **28**, 314
spectroscopic ellipsometry a useful tool to determine the refractive indices and interfaces of $In_{0.52}Al_{0.48}As$ and $In_{0.53}Al_xGa_{0.47-x}As$ layers on InP in the wavelength range 280–1900 nm, **21**, 174
strain effects on carrier lifetimes in InGaAs/(Al)GaAs multiple quantum wells, **21**, 253
structural, optical and electrical properties of state of the art cubic SiC films, **29**, 160
the Czochralski growth of $SrLaGa_3O_7$ single crystals and their optical and lasing properties, **26**, 201
the optical properties and electronic transitions of cubic and hexagonal GaN films between 1.5 and 10 eV, **29**, 65

thermally induced change in the profile of GaAs/AlGaAs quantum wells, **28**, 332
Optical-beam-induced current
characterization of the strength and position of semiconductor defects by the multielectrode EBIC (OBIC) method, **24**, 87
Optoelectronic devices
blue diode lasers and visible optoelectronic devices, **21**, 205
ESPRIT MORSE: research for novel metal–organic precursors, **21**, 147
evaluation of III-V growth technologies for optoelectronic applications, **21**, 120
grating fabrication and characterization method for wafers up to 2 in, **28**, 293
investigation of MOVPE-grown $In_{0.53}Ga_{0.47}As/InP$ multi-quantum wells by Raman spectroscopy and X-ray diffractometry, **21**, 161
optical-beam-induced current and photoluminescence techniques for localization of crystallographic defects in optoelectronic devices, **24**, 175
strained multi-quantum well heterostructures for lasers, modulators and integrated optical devices at 1.3–1.55 $\mu$m, **28**, 279
Optoelectronic materials
growth and characterization of $In_{0.53}Ga_{0.47}As/In_xGa_{1-x}As$ strained-layer superlattices, **21**, 244
Optoelectronics
a study of PbSe heteroepitaxy on Si(111) for IR optoelectronic applications, **21**, 317
optical characterization of extremely high purity ZnSe grown by metal–organic vapour phase epitaxy using dimethylzinc-triethylamine adduct, **21**, 169
optical cross-sections and distribution of $Fe^{2+}$ and $Fe^{3+}$ in semi-insulating liquid encapsulated Czochralski grown InP:Fe, **21**, 321
selective and non-planar epitaxy of InP/GaInAs(P) by MOCVD, **21**, 130
spectroscopic ellipsometry a useful tool to determine the refractive indices and interfaces of $In_{0.52}Al_{0.48}As$ and $In_{0.53}Al_xGa_{0.47-x}As$ layers on InP in the wavelength range 280–1900 nm, **21**, 174
Order
investigation of the cationic ordering in InGaP/GaAs epilayers grown by low-pressure, metal organic vapour phase epitaxy, **28**, 219
Order-disorder
reliability of radio frequency dielectric experiments in perovskites, **30**, 55
Organic conductor
extremely high mobility carriers in organic conductor $\alpha$-$(BEDT-TTF)_2I_3$ under high pressure, **25**, L1
Organic substances
optical and recording properties of copper phthalocyanine films, **25**, 171
Overheating
subsurface overheating of targets in laser deposition of superconducting films, **23**, L9
Oxidation
light-beam-induced transient spectroscopy of oxidation-induced stacking faults in silicon, **24**, 167
optical characterization of deep states associated with oxidation-induced stacking faults in silicon, **24**, 170
Oxide defects
effects of Ar and $H_2$ annealing on the electrical properties of oxides on 6H SiC, **29**, 131
Oxides
inorganic oxide solid state electrochromic devices, **26**, 157
microstructural and mechanical effects of oxide addition into a thin $ZrO_2$ matrix, **26**, 175
Oxygen
dopant redistribution during the formation of tungsten disilicide by rapid thermal processing, **22**, 168
identification of CuO as a minority phase in YBCO: X-ray diffraction *vs.* EMF and coulometric titration measurements, **22**, 310
measurements of interdiffusion in compositionally modulated amorphous Ni/Si multilayers by *in situ* X-ray diffraction, **22**, 211
realization of capacitive structures from plasma enhanced chemical vapor deposition process, **21**, 41
Oxynitrides
preparation of oxynitride thin films of $BaNb(O_yN)_x$ and $LaNb(O_yN_2)_x$ using reactive sputtering from multiphase powder targets, **25**, 197

**P**

p-n junctions
blue diode lasers and visible optoelectronic devices, **21**, 205
current gain deterioration in carbon-doped AlGaAs/GaAs heterojunction bipolar transistors during high-temperature bias stress tests, **28**, 257
experimental evaluation of separate contributions to ideality factor for the base surface recombination current in heterojunction bipolar transistors, **28**, 238
improvement of dark current of Ga(Al)Sb mesa diodes using $(NH_4)_2S$ treatment, **28**, 374
measurements of carrier diffusion length in processed wafers: correlation with the electrical behaviour, **24**, 192
scanning deep-level transient spectroscopy investigations on gallium arsenide, **24**, 28
Palladium
preperation of Co/Pd multilayer films by laser ablation depostion, **23**, 25
Particle detector
imaging of high field regions in semi-insulating GaAs under bias, **28**, 485
Permittivity
electric properties of $PbO-Bi_2O_3-Ga_2O_3$ glasses, **25**, 147
Perovskite
correlation between dielectric properties and nanostructure in a $Pb(In_{1/2}Nb_{1/2})O_3$ ceramic, **25**, 85
Perovskite-type oxides
dielectric relaxation of paired defects in perovskite-type oxides, **23**, 19
recrystallization of boron-doped and undoped preamorphized silicon layers by rapid and conventional thermal annealing, **22**, 128
PGZT
dielectric and pyroelectric characteristics of PZT doped with gadolinium, **25**, 29
$\Phi$ phase
reactivity of $BaSnO_3$ as additive agent with the 211 and 123 yttrium barium cuprates, **27**, 29
Phase formation
phase formation in the $TeO_2-AlN$ system, **26**, 197
Phase separation
two-dimensional phase separation and surface-reconstruction driven atomic ordering in mixed III–V layers, **30**, 187
Phase transitions
are polytype transitions possible during boron diffusion?, **29**, 99

sputtering effects in hexagonal silicon carbide, **29**, 94
stability of cubic $ZrO_2$ (10 mol.% $Y_2O_3$) when alloyed with NiO, $Al_2O_3$ or $TiO_2$: implications to solid electrolytes and cermets, **22**, 247
Phonons
characterization of heterointerfaces and surfaces in InSb on GaAs and in InAs/AlSb quantum wells, **21**, 262
Phonons and vibrations
far-IR characterization of GaInAs/InP quantum wells and superlattices, **28**, 337
Phosphorus
electronic structure of non-stoichiometric Ga-As compounds, **22**, 290
Photoacoustic effect
thermal diffusivity of $BaLiF_3$ crystals, **25**, 133
Photoconduction
large negative persistent photoconductivity of bulk $GaAs_{1-x}P_x$ ($x = 0.02$–$0.03$) single crystals, **21**, 325
photocurrent study of Fe-doped semi-insulating InP, **28**, 111
Photocurrent
electron-beam-induced current quantitative mapping: application to Si solar cells, **24**, 68
mapping of defects and their recombination strength by a light-beam-induced current in silicon wafers, **24**, 152
Photodetectors
an AlGaAs/GaAs OEIC structure for the integration of LEDs, MESFETs and photodetectors, **21**, 300
Photoelectron spectroscopy
measurements of interdiffusion in compositionally modulated amorphous Ni/Si multilayers by *in situ* X-ray diffraction, **22**, 211
tunable infrared photoemission sensor on Si using epitaxial $ErSi_2$/Si heterostructures, **21**, 312
Photoluminescence
chemical beam epitaxy and photoluminescence characteristics of InGaAsP/InP BRAQWET modulators, **21**, 293
chemical treatment of photoluminescent porous silicon, **23**, 13
core-level photoemission study on a Bi-2212 single crystal, **22**, 217
determination of carrier and impurity profiles in doped n-type quantum well structures, **28**, 341
effects of high energy radiation on group III–V compound semiconductors, **28**, 465
impurities in InP grown by MOVPE using a new precursor $Et_2InNMe_2$: photoluminescence and Hall study, **28**, 224
influence of the cap layer thickness on the optical properties of near surface GaInAs/GaAs quantum wells, **21**, 198
investigation of InGaAs/InP interdiffusion by simultaneous transmission electron microscopy and photoluminescence analysis, **21**, 277
optical-beam-induced current and photoluminescence techniques for localization of crystallographic defects in optoelectronic devices, **24**, 175
photoluminescence and electroluminescence processes in $Si_{1-x}Ge_x$/Si heterostructures grown by chemical vapor deposition, **21**, 307
room temperature photoreflectance as a powerful tool to characterize the crystalline quality of InAlAs layers grown on InP substrates, **21**, 177
spatially resolved photoluminescence and electron-beam-induced current studies of a coincidence $\Sigma = 25$ silicon bicrystal, **24**, 184
spatially resolved photoluminescence investigation of optical damage induced by $SiN_x$ deposition in InGaAs, **23**, 142
spray pyrolysis deposition for indium oxide doped with different impurities, **22**, 233
strain effects on carrier lifetimes in InGaAs/(Al)GaAs multiple quantum wells, **21**, 253
synthetic diamond: the optical band at 1.883 eV, **21**, 329
the investigation of growth characteristics of single quantum wells grown on (311) GaAs substrates, **27**, 7
vacancy controlled interdiffusion in III–V heterostructures, **21**, 281
Photoluminescence spectroscopy
improved method for GaAs-(Ga,Al)As epitaxial regrowth, **21**, 157
quantitative comparison of mass spectrometry and photoluminescence on InAsP/InP multiple quantum well structures, **28**, 319
Photoluminescence studies
preparation of GaSb by molecular beam epitaxy and electrical and photoluminescence characterization, **28**, 174
process-induced defects in manufacture of GaAs monolithic microwave integrated circuits, **28**, 268
Photolysis
photo-assisted direct writing of conducting aluminum, **30**, L5
Photonic integration
fabrication of photonic integrated circuits using quantum well intermixing, **28**, 272
Photoreflection spectroscopy
room temperature photoreflectance as a powerful tool to characterize the crystalline quality of InAlAs layers grown on InP substrates, **21**, 177
Photosensitive galvanic cells
UV and infrared studies of $TiO_2$ thin film cathodes in Ag/AgI/$TiO_2$, $SnO_2$ photosensitive galvanic cells, **23**, 41
Photothermal microscopy
non-linear photothermal response of thin solid films and coatings, **26**, 111
theory of combined acousto-photo-thermal spectral decomposition in condensed phases: parametric generation of thermal waves by a non-stationary ('breathing') sub-surface defect, **26**, 121
Piezoelectric
investigations on the piezoelectric and structural properties of samarium-doped lead zirconate titanate ceramics, **26**, 25
modelling the effects of piezoelectrically active defects and their impact on the threshold voltage of GaAs metal–semiconductor field effect transistors, **28**, 248
Plasma
chemical vapour deposition of diamond from a novel capacitively coupled r.f. plasma source, **29**, 216
Plasma processing
determination of interface state density on Au/$Ta_2O_5$/n-InP structures by different methods, **28**, 416
electron cyclotron resonance plasma deposition and etching of silicon nitride on GaSb for optoelectronic applications, **28**, 369
influence of temperature on the properties of $SiC_xN_y$:H films prepared by plasma-enhanced chemical vapour deposition, **26**, 133
optical emission end point detection for reactive ion etching of Si/SiGe structures, **27**, 39
parametric investigations and simulations of ion beam etching and reactive ion etching mechanisms for GaAs compounds, **28**, 383
reactive ion etching of GaInP/GaAs multilayer structures with $SiCl_4$–$Cl_2$–Ar plasma, **28**, 365

Plasma-enhanced chemical vapour deposition
spatially resolved photoluminescence investigation of optical damage induced by $SiN_x$ deposition in InGaAs, **23**, 142
Platinum
ineffective grain boundaries and breakdown threshold of zinc oxide varistors, **22**, 261
Polarization effect
polarization of light from an optically pumped (Al–Ga–N)/(Ga–In–N) double heterostructure, **26**, L5
Polycrystalline films
preparation and characterization of $In_4Se_3$ films, **27**, 53
Polymer electrodes
conductivity and phase structure of blend based proton polymeric electrolytes I: Complexes with phosphoric acid, **22**, 107
Polymer electrolytes
analytical expressions for sputter and diffusion-modified ion implantation profiles, **22**, L1
far-infrared spectra of lithium–titanium mixed ferrites, **22**, 201
Polymers
effect of temperature on the electrical resistivity of $YBa_2Cu_3O_{7-x}$ filled polyethylene, **27**, 13
Positron beam studies
low energy positron beam studies of nano-TiN films, **26**, 163
Positrons
positron lifetimes at vacancies in electron-irradiated indium phosphide, **28**, 126
Potassium
potassium substitution in the $Bi_2Sr_2CaCu_2O_y$ superconductor, **25**, 153
Powders
$\gamma$ radiation–hydrothermal synthesis and characterization of nanocrystalline copper powders, **23**, 116
impact of thermal treatments on deep level behaviour in semi-insulating GaAs, **22**, 241
microstructural study of melt-processed $YBa_2Cu_3O_{7-\delta}$ thick films on yttria-stabilized zirconia, **21**, 19
pathways for the low temperature synthesis of nano-sized crystalline barium zirconate, **23**, 29
recrystallization of boron-doped and undoped preamorphized silicon layers by rapid and conventional thermal annealing, **22**, 128
study of the concentration distribution of SiC vapour in the crystal growth zone, **21**, 83
synthesis and characterization of ultrafine powders of SiC–$Si_3N_4$, **23**, 10
Power devices
optical emission end point detection for via hole etching in InP and GaAs power device structures, **23**, 36
Precipitation
realization of capacitive structures from plasma enhanced chemical vapor deposition process, **21**, 41
Precursors
chemical beam epitaxy of high purity InP using tertiarybutylphosphine and 1,2 bis-phosphinoethane, **21**, 165
ESPRIT MORSE: research for novel metal–organic precursors, **21**, 147
study of the concentration distribution of SiC vapour in the crystal growth zone, **21**, 83
Preparation
stabilization of the high $T_c$ phase in the $Bi_{1.6}Pb_{0.3}M_{0.1}Sr_2Ca_2Cu_3O_y$ (M = W,Mo) superconducting system, **23**, 137
the preparation, structure, magnetic and electrical properties of $Cu^{I}Cu^{II}Mg_3(PO_4)_3$, **23**, 88
Process and device modelling
an AlGaAs/GaAs OEIC structure for the integration of LEDs, MESFETs and photodetectors, **21**, 300
an electron-beam-induced current study of dislocations in GaAs, **24**, 91
electronic structure of non-stoichiometric Ga-As compounds, **22**, 290
experimental and theoretical studies of multi-quantum well structures for unipolar avalanche multiplication, **21**, 237
modulated cathodoluminescence for extended defect characterization, **24**, 121
oxygen ion conductivity in $Ba_3In_{3-x}Zr_xO_{7.5+x/2}$ ($x = 0.7$–1.3), **22**, 313
realization of capacitive structures from plasma enhanced chemical vapor deposition process, **21**, 41
simulation of MOCVD-process for Y–Ba–Cu–O film production in stagnation zone reactor, **22**, 317
simulation of lateral Al recoil atoms and damage defects gradients in a GaAs/GaAlAs quantum well created by masked ion implantation, **21**, 284
strain relaxation studied by photoluminescence and by double crystal X-ray diffraction measurements in strained InGaAs, **22**, 222
Processing
rapid consolidation of Bi–Pb–Sr–Ca–Cu–O powders by a plasma activated sintering process, **26**, 55
Proton conduction
analytical expressions for sputter and diffusion-modified ion implantation profiles, **22**, L1
Proton conductivity
conductivity and phase structure of blend based proton polymeric electrolytes I: Complexes with phosphoric acid, **22**, 107
Pyroelectric
dielectric and pyroelectric characteristics of PZT doped with gadolinium, **25**, 29
preparation and characterization of spray-pyrolysed $BaTiO_3$ films, **25**, 34
PZT
investigations on the piezoelectric and structural properties of samarium-doped lead zirconate titanate ceramics, **26**, 25

## Q

Quantum effects
negative magnetoresistance for different orientations of n-type $CdAs_2$ in the variable-range hopping regime, **26**, 19
Quantum structures
crystal defects in vertical cavity epitaxial structures on GaAs investigated by X-ray methods, **28**, 520
exciton transitions in InGaAs/InP quantum wells investigated by photocurrent spectroscopy, **28**, 327
optimization of growth parameters of short period InGaAs/InP superlattices for Wannier–Stark modulators, **28**, 305
Quantum transport
dislocations and quantum transport: a possible hint for one-dimensional conductivity along dislocation lines; a fundamental mechanism for the EBIC contrast formation, **24**, 82
Quantum well
determination of the lateral distribution of electron–hole pairs generated by an electron beam in $Al_{0.4}Ga_{0.6}As$ by cathodoluminescence, **24**, 124
exciton transitions in InGaAs/InP quantum wells investigated by photocurrent spectroscopy, **28**, 327
far-IR characterization of GaInAs/InP quantum wells and superlattices, **28**, 337

observation of blue shift in GaAs/InGaP quantum well p–i–n diodes, **28**, 323
selective area bandgap modification during MBE growth of InGaAs/GaAs quantum wells for mode locked laser applications, **28**, 299
selective epitaxial growth of SiGe alloys—influence of growth parameters on film properties, **28**, 1
the investigation of growth characteristics of single quantum wells grown on (311) GaAs substrates, **27**, 7
transmission electron microscopy and X-ray diffraction investigation of In segregation in MOVPE-grown InGaAs-based MQWs with either GaAs or AlGaAs barriers, **28**, 346
Quantum well structures
quantitative comparison of mass spectrometry and photoluminescence on InAsP/InP multiple quantum well structures, **28**, 319
Quantum wells
absorption coefficient and exciton oscillator strengths in InGaAs/InP multi-quantum wells, **21**, 189
chemical beam epitaxy and photoluminescence characteristics of InGaAsP/InP BRAQWET modulators, **21**, 293
experimental and theoretical studies of multi-quantum well structures for unipolar avalanche multiplication, **21**, 237
fabrication of photonic integrated circuits using quantum well intermixing, **28**, 272
improved method for GaAs-(Ga,Al)As epitaxial regrowth, **21**, 157
influence of the cap layer thickness on the optical properties of near surface GaInAs/GaAs quantum wells, **21**, 198
intersubband transitions in InAs/AlSb quantum wells, **21**, 201
investigation of InGaAs/InP interdiffusion by simultaneous transmission electron microscopy and photoluminescence analysis, **21**, 277
investigation of MOVPE-grown $In_{0.53}Ga_{0.47}As/InP$ multi-quantum wells by Raman spectroscopy and X-ray diffractometry, **21**, 161
lateral thickness modulations in alternate tensile–compressive strained GaInAsP multilayers grown by gas source molecular beam epitaxy, **21**, 241
MBE growth and properties of high quality Al(Ga)InAs/GaInAs MQW structures, **21**, 194
optical investigation of interdiffusion in CdTe/CdMnTe quantum wells, **21**, 274
optical properties of GaSb–AlSb heterostructures grown by molecular beam epitaxy, **21**, 185
quantum confined Stark effect (QCSE) and self-electro-optic effect device (SEED) in II–VI heterostructures, **21**, 224
second harmonic generation via excitations between valence sub-bands in p-type GaAs–AlAs and Si–SiGe quantum well structures, **21**, 296
selective and non-planar epitaxy of InP/GaInAs(P) by MOCVD, **21**, 130
simulation of lateral Al recoil atoms and damage defects gradients in a GaAs/GaAlAs quantum well created by masked ion implantation, **21**, 284
strain effects on carrier lifetimes in InGaAs/(Al)GaAs multiple quantum wells, **21**, 253
strained $InAs/Al_xGa_{0.48-x}In_{0.52}As$ heterostructures: a tunable quantum well materials system for light emission from the near-IR to the mid-IR, **21**, 288
p-dopant incorporation and influence on gain and damping behaviour in high-speed GaAs-based strained MQW lasers, **21**, 232
Quantum wires
reduction of etching damage in the fabrication of quantum wires, **28**, 379

**R**
Radiation effects
effects of high energy radiation on group III–V compound semiconductors, **28**, 465
luminescence from rod-like defects and hydrogen related centres in silicon, **24**, 144
optical characterization of deep states associated with oxidation-induced stacking faults in silicon, **24**, 170
phase equilibria and thermodynamics of solid state contact reactions in the ternary Ta–Ga–As system, **22**, 141
Raman scattering
characterization of heterointerfaces and surfaces in InSb on GaAs and in InAs/AlSb quantum wells, **21**, 262
metal–organic vapour phase epitaxy growth and Raman characterization of (111) A and B oriented GaAs/InP heterostructures, **28**, 164
near-IR-excited Raman scattering in graphitic materials, **27**, L1
optical characterization of chemical beam epitaxy grown $Ga_{0.52}In_{0.48}P$ layers and related microstructures, **28**, 151
resonant Raman scattering studies of $SnS_2$ crystals, **23**, 98
Raman spectroscopy
differential scanning calorimetry study of structural relaxation of Ge-doped $Se_{85}Te_{15}$ glasses, **22**, 181
investigation of MOVPE-grown $In_{0.53}Ga_{0.47}As/InP$ multi-quantum wells by Raman spectroscopy and X-ray diffractometry, **21**, 161
realization of capacitive structures from plasma enhanced chemical vapor deposition process, **21**, 41
Rapid thermal annealing
*in situ* growth of Y–Ba–Cu–O films by ion beam sputtering, **22**, 165
comparison of properties of solid phase epitaxial silicon on sapphire films recrystallized by rapid thermal annealing and furnace annealing, **29**, 43
conductivity and phase structure of blend based proton polymeric electrolytes II: Ammonium salts complexes, **22**, 117
investigation of InGaAs/InP interdiffusion by simultaneous transmission electron microscopy and photoluminescence analysis, **21**, 277
time evolution of dislocation formation in ion implanted silicon, **25**, 60
Reactive ion etching
fabrication of 1.5 $\mu$m optically pumped $Ga_{1-x}In_xAs_yP_{1-y}/InP$ vertical-cavity surface-emitting lasers, **28**, 289
morphological modifications during selective growth of InP around cylindrical and parallelepiped mesas, **28**, 179
Reactive sputtering
preparation of oxynitride thin films of $BaNb(O_yN)_x$ and $LaNb(O_yN_2)_x$ using reactive sputtering from multiphase powder targets, **25**, 197
Real space transfer
gate currents in heterostructure field-effect transistors: contribution by 'warm' electrons, **28**, 264
Recombination
on the effect of the recombination within the depletion zone on the EBIC signal at Schottky contact, **24**, 101
Reflectance
characterization of Bragg reflector structures using scanning reflectance spectral mapping, **28**, 457

Reflectance-difference spectroscopy
observation and analysis of epitaxial growth with reflectance-difference spectroscopy, **30**, 109
Reflection
electronic structure of non-stoichiometric Ga-As compounds, **22**, 290
phase equilibria and thermodynamics of solid state contact reactions in the ternary Ta–Ga–As system, **22**, 141
Reflectivity
high-reflective 1.5 $\mu$m GaInAsP/InP Bragg reflectors grown by metal organic vapor phase epitaxy, **28**, 285
Relaxation
dielectric relaxation of paired defects in perovskite-type oxides, **23**, 19
Relaxation phenomena
selective epitaxial growth of SiGe alloys—influence of growth parameters on film properties, **28**, 1
silicon on thin insulator: prediction of the oxygen fluence required for the formation of a continuous buried oxide, **22**, 172
step-graded buffer layer study of the strain relaxation by transmission electron microscopy, **28**, 497
Relaxation time phenomena
d.c. and a.c. electrical properties of amorphous $Bi_4Sr_3Ca_3Cu_4O_{16}$, **26**, 103
Relaxor
correlation between dielectric properties and nanostructure in a $Pb(In_{1/2}Nb_{1/2})O_3$ ceramic, **25**, 85
Relaxors
correlation between microstructure and electrical conductivity in $Pb(Fe_{1/2}Nb_{1/2})O_3$–$Pb(Fe_{2/3}W_{1/3})O_3$–$Pb(Zn_{1/3}Nb_{2/3})O_3$ relaxor ferroelectrics, **26**, 189
Reliability
high temperature contacts to chemically vapour deposited diamond films—reliability issues, **29**, 206
Resistance profiling
diffusion of hydrogen in n-type Si, **23**, 130
RHEED
growth of thin β-SiC layers by carbonization of Si surfaces by rapid thermal processing, **29**, 170
in-situ X-ray studies of organometallic vapor phase epitaxy growth, **30**, 99
mechanisms of layer growth during molecular beam epitaxy of semiconductor films, **30**, 87
RT photoluminescence
room-temperature scanning photoluminescence for mapping the lifetime and the doping density in compound semiconductors, **28**, 452
Ruthenium
low temperature specific heat studies of amorphous and crystalline Er–Ru alloys, **23**, 66
Rutherford back scattering
characterization of the heterostructure between heteroepitaxially grown β-$FeSi_2$ and (111) silicon, **21**, 270

S
Scanning electron microscopy
cathodoluminescence from defects in electron-irradiated InP, **24**, 135
evaluation of diffusion length at different excess carrier concentrations, **24**, 98
modulated electron-beam-induced current and cathodoluminescence, **24**, 23
the effects of sulphurizing agent on the formation of calcium lanthanum sulphide, **26**, 29
Scanning force microscopy
electrical characterization of integrated circuits by scanning force microscopy, **24**, 218
scanning force microscopy of semiconductor materials and devices, **24**, 203
Scanning tunneling microscopy
role of steps in epitaxial growth, **30**, 121
scanning tunneling microscopy studies of the GaAs(001) surface and the nucleation of ZnSe on GaAs(001), **30**, 73
Scattering mechanisms
dislocations and quantum transport: a possible hint for one-dimensional conductivity along dislocation lines; a fundamental mechanism for the EBIC contrast formation, **24**, 82
Schottky
high temperature stability of chemically vapour deposited diamond diodes, **29**, 223
Schottky barrier
anomalous thermionic-field emission in epitaxial Al/n-AlGaAs junctions, **28**, 429
development of chemical beam epitaxy for the deposition of gallium nitride, **29**, 78
effects of hydrogenation of deep and shallow levels in AlGaAs grown by MBE, **28**, 425
junction spectroscopy of highly doped GaAs: detection of the EL2 trap, **28**, 397
quantum confined Stark effect (QCSE) and self-electro-optic effect device (SEED) in II–VI heterostructures, **21**, 224
surface barrier height in metal–n-6H-SiC structures, **29**, 198
the characteristics of intimate Au–$In_yAl_{1-y}As$ Schottky diodes: a mismatch dependence study, **28**, 433
Secondary defects
time evolution of dislocation formation in ion implanted silicon, **25**, 60
Secondary ion mass spectrometry
diffusion of hydrogen in n-type Si, **23**, 130
Segregation
Monte Carlo simulation of the minority-carrier recombination at and around grain boundaries surrounded by a denuded zone revealed by light-beam-induced current mapping, **24**, 180
non-uniformity of Fe doping in semi-insulating LEC-grown InP and its characterization by various mapping methods, **28**, 107
Selective growth
growth of diamond on Au (selective) and $Al_2O_3$ surfaces, **26**, 41
morphological modifications during selective growth of InP around cylindrical and parallelepiped mesas, **28**, 179
Selectivity
selectivity in low pressure chemical vapor deposition of copper from hexafluoroacetylacetonate-copper(I)-trimethylvinylsilane in the presence of water, **23**, 48
Selenium
far-IR study of electron–phonon interaction and phase transition in $\alpha$-$In_2S_{3-x}Se_x$ ($2.4<x<3.0$) crystals, **30**, 27
phase equilibria in the In–Pt–As system at 600°C, **22**, 267
Selenium doping
transmission electron microscopy investigation of extended defects in heavily Se-doped bulk GaSb, **28**, 142
Semi-insulating
preparation and characterization of semi-insulating 2 in InP wafers having a low Fe content by wafer annealing, **28**, 115
preparation and characterization of semi-insulating undoped indium phosphide, **28**, 95

Semiconductor devices
a study of minority carrier lifetimes in (Al)GaInP/AlInP double heterostructures grown by metal organic chemical vapour deposition, **28**, 404
analysis of SIMOX metal–oxide–semiconductor transistors operated in the high temperature range, **29**, 21
boron-rich solids: a chance for high-efficiency high-temperature thermoelectric energy conversion, **29**, 228
experimental evaluation of separate contributions to ideality factor for the base surface recombination current in heterojunction bipolar transistors, **28**, 238
fabrication and properties of high-resistivity porous silicon carbide for SiC power device passivation, **29**, 114
fabrication of millimetre-wave Gunn and IMPATT devices with integral heat sink and integral bonding ribbon: a new approach, **28**, 253
fully planar AlGaAs/GasAs heterojunction bipolar transistors using chemical beam epitaxy selective growth, **28**, 261
GaInP/GaAs heterojunction bipolar transistors grown by low pressure metalorganic chemical vapour deposition for voltage-controlled oscillators and power amplifier microwave monolithic integrated circuits, **28**, 242
high power InP/InGaAsP buried heterostructure laser for a wavelength of 1.15 $\mu$m, **28**, 296
high temperature 6H-SiC dinistor, **29**, 194
high temperature silicon carbide stabilitrons for the voltage range from 4 to 50 V, **29**, 190
new dry-etch chemistries for III–V semiconductors, **25**, 179
optimization of growth parameters of short period InGaAs/InP superlattices for Wannier–Stark modulators, **28**, 305
parametric investigations and simulations of ion beam etching and reactive ion etching mechanisms for GaAs compounds, **28**, 383
quantitative investigation of interdiffusion effects in balanced-strain InGaAs(P)/InGaAsP heterostructures: constant $x$ vs. constant $y$, **28**, 353
selective area bandgap modification during MBE growth of InGaAs/GaAs quantum wells for mode locked laser applications, **28**, 299
sensitivity to electrostatic discharges of 'low-cost' 1.3 $\mu$m laser diodes: a comparative study, **28**, 314
Si delta-doped GaAs and AlGaAs by low-pressure MOVPE, **28**, 204
silicon-on-insulator technology for high-temperature, smart-power applications, **29**, 1
static and dynamic behaviour of power devices in silicon-direct-bonded substrates, **29**, 13
temperature dependence of the thin film silicon-on-insulator field effect transistor current characteristics based on full solution for the one-dimensional MISIS structure, **29**, 38
Semiconductor doped glasses
optical characterization of $As_2S_3$ and $As_2Se_3$ semiconducting glass films of non-uniform thickness from transmission measurements, **25**, 53
Semiconductor laser diodes
potential sources of degradation in InGaAs/GaAs laser diodes, **28**, 310
Semiconductor lasers
fabrication of 1.5 $\mu$m optically pumped $Ga_{1-x}In_xAs_yP_{1-y}$/InP vertical-cavity surface-emitting lasers, **28**, 289
Semiconductor microcrystals
persistent spectral hole burning in semiconductor microcrystals, **27**, L5
Semiconductor oxides
current-limiting property of n-$BaTiO_3$ ceramics, **25**, 119
Semiconductor–electrolyte
electrolyte for electrochemical C–V profiling of InP- and GaAs-based structures, **28**, 361
Semiconductor–electrolyte contacts
fabrication and properties of high-resistivity porous silicon carbide for SiC power device passivation, **29**, 114
Semiconductor–insulator
a study of the growth and shrinkage of stacking faults in SIMOX, **29**, 24
Semiconductor–insulator–semiconductor structures
real-space transfer in heterojunction structures, **28**, 408
Semiconductors
aluminium-free 980 nm laser diodes, **21**, 211
atomic structure of surfactant monolayers and its role in epitaxial growth, **30**, 175
characterization of high quality InGaP/GaAs and InGaAsP/GaAs heterostructures grown by low pressure metal–organic chemical vapour deposition, **28**, 158
characterization of the strength and position of semiconductor defects by the multielectrode EBIC (OBIC) method, **24**, 87
copper doping of GaSb single crystals, **28**, 138
correlation of micro-non-uniformities and electron mobility in undoped liquid-encapsulated Czochralski and vertical-gradient freeze GaAs, **28**, 84
deep level transient spectroscopy investigation of GaAs grown by atomic layer molecular beam epitaxy, **28**, 400
determination of the GaN/AlN band discontinuities via the $(-/0)$ acceptor level of iron, **29**, 61
exciton transitions in InGaAs/InP quantum wells investigated by photocurrent spectroscopy, **28**, 327
growth and characterization of 2 in InP crystals by the vertical gradient freeze technique, **28**, 91
high resolution dry etching of III–V semiconductor materials using magnetically enhanced discharges, **27**, 61
investigation of the cationic ordering in InGaP/GaAs epilayers grown by low-pressure, metal organic vapour phase epitaxy, **28**, 219
investigation of the role of the crystal growth zone during silicon carbide crystal growth by the sublimation method, **27**, 69
ion implantation effects in GaSb, **27**, 129
mapping of GaAs wafers by IR light diffraction and luminescence, **28**, 448
mechanisms of layer growth during molecular beam epitaxy of semiconductor films, **30**, 87
modulated cathodoluminescence for extended defect characterization, **24**, 121
negative magnetoresistance for different orientations of n-type $CdAs_2$ in the variable-range hopping regime, **26**, 19
new developments in the liquid-phase epitaxy of $Hg_{1-x}Cd_xTe$, **28**, 21
on the determination and control of flats location in liquid-encapsulated Czochralski grown InP wafers, **28**, 80
photon tunneling from semiconductor surfaces to atomic force microscopy probes, **28**, 493
positron lifetimes at vacancies in electron-irradiated indium phosphide, **28**, 126
room-temperature scanning photoluminescence for mapping the lifetime and the doping density in compound semiconductors, **28**, 452
scanning electron acoustic microscopy of electronic materials, **24**, 209

scanning force microscopy of semiconductor materials and devices, **24**, 203
step-graded buffer layer study of the strain relaxation by transmission electron microscopy, **28**, 497
strain reduction in the Si overlayer for improved SIMOX material, **29**, 29
structural and mechanical properties of ion implanted GaAs and InP single crystals grown by the liquid encapsulated Czochralski technique, **28**, 461
the bulk and surface states of GaSb/AlSb/InAs superlattice, **25**, 99
theory of electron-beam-induced current and cathodoluminescence imaging of crystal defects: some new results, **24**, 15
transmission electron microscopy and X-ray diffraction investigation of In segregation in MOVPE-grown InGaAs-based MQWs with either GaAs or AlGaAs barriers, **28**, 346
transmission electron microscopy study of $In_xGa_{1-x}As$/GaAs multilayer buffer structures used as dislocation filters, **28**, 515
vickers microhardness of semiconductor $CuInSe_2$, **27**, 1
III-V Semiconductors
basic dislocation contrasts in SEM-CL/EBIC on III–V semiconductors, **24**, 115
Sensors
III–V semiconductor properties for high temperature electronics, **29**, 47
Shallow level
determination of donor and acceptor level energies by admittance spectroscopy in 6H SiC, **29**, 122
Si(001)
ab initio studies of single-height Si(001) steps, **30**, 167
Si-based ceramics
preparation of SiC and $Si_3N_4$ whiskers using bean-curd refuse as the Si source, **30**, 13
Silica gels
growth of neodymium heptamolybdate crystals in silica gels at ambient temperatures, **23**, 73
Silicon
*in situ* growth of Y–Ba–Cu–O films by ion beam sputtering, **22**, 165
a study of PbSe heteroepitaxy on Si(111) for IR optoelectronic applications, **21**, 317
a study of the growth and shrinkage of stacking faults in SIMOX, **29**, 24
apparatus for digital electron-beam-induced current imaging, **24**, 64
cathodoluminescence imaging of misfit dislocations in Si/SiGe epitaxial layers: the influence of transition metal contamination, **24**, 48
characterization of implanted silicon wafers by the non-linear photoreflectance technique, **24**, 199
characterization of the heterostructure between heteroepitaxially grown β-$FeSi_2$ and (111) silicon, **21**, 270
chemical treatment of photoluminescent porous silicon, **23**, 13
conductivity and phase structure of blend based proton polymeric electrolytes II: Ammonium salts complexes, **22**, 117
copper diffusivity in silicon: A re-examination, **25**, 141
determination of the electronic structure of grain boundaries by energy-resolved photoconductivity measurements, **24**, 159
diffusion of hydrogen in n-type Si, **23**, 130
effects of deep levels and Si-doping on GaInP material properties investigated by means of optical methods, **21**, 181
electron-beam-induced activity of defects in silicon, **24**, 8
electron-beam-induced current and atomic force microscopy studies on silicon etch steps created by reactive ion etching and reactive ion beam etching, **24**, 223
electron-beam-induced current quantitative mapping: application to Si solar cells, **24**, 68
electronic structure of non-stoichiometric Ga-As compounds, **22**, 290
evaluation of diffusion length at different excess carrier concentrations, **24**, 98
how to induce the epitaxial growth of gallium nitride on Si(001), **29**, 74
improvements in the heteroepitaxial growth of GaAs on Si by MOVPE, **21**, 266
influence of surface treatment on electrical activity of dislocations and minority carrier diffusion length in cast multicrystalline silicon, **24**, 74
LBIC and diffusion length mapping applied to the investigation of gettering by aluminium diffusion in multicrystalline silicon, **24**, 188
light-beam-induced transient spectroscopy of oxidation-induced stacking faults in silicon, **24**, 167
luminescence from rod-like defects and hydrogen related centres in silicon, **24**, 144
macrodefect formation in semiconductors during high energy ion implantation: Monte Carlo simulation of damage depth distributions, **29**, 202
mapping of defects and their recombination strength by a light-beam-induced current in silicon wafers, **24**, 152
metastable electrical activity of misfit-dislocation-associated defects in Si/Si(Ge) heteroepitaxial structures: EBIC/DLTS correlation, **24**, 43
Monte Carlo simulation of growth and recovery of silicon, **29**, 34
Monte Carlo simulation of the minority-carrier recombination at and around grain boundaries surrounded by a denuded zone revealed by light-beam-induced current mapping, **24**, 180
optical characterization of deep states associated with oxidation-induced stacking faults in silicon, **24**, 170
optical determination of the composition of bulk SiGe monocrystals, **28**, 18
phase equilibria and thermodynamics of solid state contact reactions in the ternary Ta–Ga–As system, **22**, 141
photoluminescence and electroluminescence processes in $Si_{1-x}Ge_x$/Si heterostructures grown by chemical vapor deposition, **21**, 307
preparation of SiC and $Si_3N_4$ whiskers using bean-curd refuse as the Si source, **30**, 13
realization of capacitive structures from plasma enhanced chemical vapor deposition process, **21**, 41
recombination activity of 'clean' and contaminated misfit dislocations in Si(Ge) structures, **24**, 52
Rutherford backscattering studies of solid phase recrystallization and incorporation in erbium-implanted silicon, **30**, L1
second harmonic generation via excitations between valence sub-bands in p-type GaAs–AlAs and Si–SiGe quantum well structures, **21**, 296
silicon-on-insulator technology for high-temperature, smart-power applications, **29**, 1
spatially resolved photoluminescence and electron-beam-induced current studies of a coincidence $\Sigma = 25$ silicon bicrystal, **24**, 184

synthesis and transport properties of mixed MEEP–PEO–NaSCN polymer electrolytes, **22**, 206
the properties of heavily compensated high resistivity GaSb crystals, **22**, 279
the relation between EBIC contrast and recombination velocity of a grain boundary, **24**, 61
tunable infrared photoemission sensor on Si using epitaxial $ErSi_2$/Si heterostructures, **21**, 312
two types of electron-beam-induced current behaviour of misfit dislocations in Si(Ge): experimental observations and modelling, **24**, 78
what information on extended defects do we obtain from beam-injection methods?, **24**, 1
Silicon carbide
are polytype transitions possible during boron diffusion?, **29**, 99
carbonization of Si surfaces by solid source molecular beam epitaxy, **29**, 138
contact resistivity of Re, Pt and Ta films on n-type β-SiC: preliminary results, **29**, 185
deep centers and electroluminescence in 4H–SiC diodes with a p-type base region, **29**, 181
defect production and annealing in ion implanted silicon carbide, **29**, 142
deposition and optical properties of amorphous hydrogenated $Si_xC_y$ layers, **29**, 151
determination of donor and acceptor level energies by admittance spectroscopy in 6H SiC, **29**, 122
effects of Ar and $H_2$ annealing on the electrical properties of oxides on 6H SiC, **29**, 131
electrical properties of cadmium diarsenide at low temperatures, **21**, 59
electronic transport in thermally crystallized SiC films on sapphire, **29**, 147
fabrication and properties of high-resistivity porous silicon carbide for SiC power device passivation, **29**, 114
formation of β-SiC films by ion beam mixing of Si/C multilayers, **29**, 105
growth of bulk SiC, **29**, 83
growth of thin β-SiC layers by carbonization of Si surfaces by rapid thermal processing, **29**, 170
high temperature 6H-SiC dinistor, **29**, 194
high temperature silicon carbide stabilitrons for the voltage range from 4 to 50 V, **29**, 190
how to induce the epitaxial growth of gallium nitride on Si(001), **29**, 74
interfacial reactions of W thin film on single-crystal (001) β-SiC, **29**, 126
investigation of the role of the crystal growth zone during silicon carbide crystal growth by the sublimation method, **27**, 69
magnetic circular dichroism and electron spin resonance of the $A^-$ acceptor state of vanadium, $V^{3+}$, in 6H-SiC, **29**, 118
observation of Si out-diffusion related defects in SiC growth on Si(001), **29**, 110
reactive ion etching characterization of a-SiC:H in $CF_4/O_2$ plasma, **29**, 176
sputtering effects in hexagonal silicon carbide, **29**, 94
structural and electronic characterization of β-SiC films on Si grown from mono-methylsilane precursors, **29**, 154
structural, optical and electrical properties of state of the art cubic SiC films, **29**, 160
study of SiC single-crystal sublimation growth conditions, **29**, 90
surface barrier height in metal–n-6H-SiC structures, **29**, 198
synthesis and characterization of ultrafine powders of SiC–$Si_3N_4$, **23**, 10
the effects of deposition conditions on microstructure and morphology of r.f.-magnetron sputtered GdTbFeCo thin films, **21**, 77
unintentional incorporation of contaminants during chemical vapour deposition of silicon carbide, **29**, 134
Silicon dioxide
dopant redistribution during the formation of tungsten disilicide by rapid thermal processing, **22**, 168
Silicon nitride
electron cyclotron resonance plasma deposition and etching of silicon nitride on GaSb for optoelectronic applications, **28**, 369
influence of temperature on the properties of $SiC_xN_y$:H films prepared by plasma-enhanced chemical vapour deposition, **26**, 133
$NdGaO_3$ substrates with defined grain boundaries prepared by welding or soldering, **21**, 36
synthesis and characterization of ultrafine powders of SiC–$Si_3N_4$, **23**, 10
Silicon on sapphire
comparison of properties of solid phase epitaxial silicon on sapphire films recrystallized by rapid thermal annealing and furnace annealing, **29**, 43
Silicon oxide
an electron spin resonance study of the effect of thermal history on the structure of potassium silicate glasses, **26**, 35
effects of Ar and $H_2$ annealing on the electrical properties of oxides on 6H SiC, **29**, 131
Silicon-on-insulator
analysis of SIMOX metal–oxide–semiconductor transistors operated in the high temperature range, **29**, 21
dopant redistribution during the formation of tungsten disilicide by rapid thermal processing, **22**, 168
silicon-on-insulator technology for high temperature metal oxide semiconductor devices and circuits, **29**, 7
tungsten metallization technology for high temperature silicon-on-insulator devices, **29**, 18
Silver
development of microstructure and superconductivity of silver-clad Bi(2223) composite tapes in the process of heat treatment, **23**, 58
Silver iodide
UV and infrared studies of $TiO_2$ thin film cathodes in Ag/AgI/$TiO_2$, $SnO_2$ photosensitive galvanic cells, **23**, 41
Single crystal
synchrotron topography characterization of ZnTe single crystals, **27**, 143
Single-crystal growth
growth of bulk SiC, **29**, 83
Sintering
impact of thermal treatments on deep level behaviour in semi-insulating GaAs, **22**, 241
microstructure and properties of lead ferroniobate ceramics ($Pb(Fe_{0.5}Nb_{0.5})O_3$), **21**, 26
recrystallization of boron-doped and undoped preamorphized silicon layers by rapid and conventional thermal annealing, **22**, 128
study of the equilibrium processes in the gas phase during silicon carbide sublimation, **21**, 65
Size effect
characterization of the Z luminescence system in high purity CdTe, **26**, 1
Young's modulus of MnAl and MnBi films, **25**, L7

Skin effect
behaviour of ferromagnetic sheets in alternating electric and magnetic fields, **30**, 23
Sm-doped PZT
investigations on the piezoelectric and structural properties of samarium-doped lead zirconate titanate ceramics, **26**, 25
Sodium
vibrational diagnostics of the epitaxial growth of ultrathin films of sodium on Cu(001), **23**, 123
Sol-gel
preparation and characterization of spray-pyrolysed $BaTiO_3$ films, **25**, 34
Sol–gel process
Raman study of mechanical stresses in processes of oxygen precipitation in silicon, **21**, 49
Solar cells
apparatus for digital electron-beam-induced current imaging, **24**, 64
electron-beam-induced current quantitative mapping: application to Si solar cells, **24**, 68
room-temperature photoluminescence characterization of thin-emitter GaAlAs/GaAs and GaAlAs/GaAs/Ge solar cells, **28**, 474
Solid electrolytes
differential scanning calorimetry study of structural relaxation of Ge-doped $Se_{85}Te_{15}$ glasses, **22**, 181
impact of thermal treatments on deep level behaviour in semi-insulating GaAs, **22**, 241
Solid phase epitaxy
comparison of properties of solid phase epitaxial silicon on sapphire films recrystallized by rapid thermal annealing and furnace annealing, **29**, 43
Solid-solid interfaces
conductivity and phase structure of blend based proton polymeric electrolytes II: Ammonium salts complexes, **22**, 117
molten salt synthesis and dielectric properties of $Pb(Fe_{1/2}Nb_{1/2}$–$Pb(Fe_{1/2}Ta_{1/2})O_3$ (PFN–PFT) solid solutions, **22**, 133
sp2 bonding
ion-assisted laser processing of $CN_x$ films, **26**, 49
sp3 bonding
ion-assisted laser processing of $CN_x$ films, **26**, 49
I-SPL
room-temperature scanning photoluminescence for mapping the lifetime and the doping density in compound semiconductors, **28**, 452
Space charge effects
deep level transient spectroscopy investigation of GaAs grown by atomic layer molecular beam epitaxy, **28**, 400
Specific heat
thermal diffusivity, specific heat, and thermal conductivity of $(Ca_{1-x},Mg_x)Zr_4(PO_4)_6$ ceramic, **23**, 94
Specific heat studies
low temperature specific heat studies of amorphous and crystalline Er–Ru alloys, **23**, 66
Spectroscopic ellipsometry
the optical properties and electronic transitions of cubic and hexagonal GaN films between 1.5 and 10 eV, **29**, 65
Spray pyrolysis
preparation and characterization of spray-pyrolysed $BaTiO_3$ films, **25**, 34
Sputtering
complex admittance study of potassium yttrium fluoride, **22**, 159
effect of previous heat treatment on ionic conductivity of yttrium-doped KBr crystals, **21**, 1
elaboration, characterization and electrical properties of Na–Al–O thin films, **26**, 181
influence of preparation procedure on some physical properties of BICUVOX, **21**, 70
inorganic oxide solid state electrochromic devices, **26**, 157
redistribution of atoms in the near-surface layer of multielemental solids related to variations of the ion beam parameters, **27**, 23
simulation of MOCVD-process for Y–Ba–Cu–O film production in stagnation zone reactor, **22**, 317
sputtering effects in hexagonal silicon carbide, **29**, 94
tungsten diselenide thin films synthesized on tungsten foils, **26**, 67
Step edge barrier
atomic force microscopy and scanning tunneling microscopy studies of large-scale unstable growth formed during GaAs(001) homoepitaxy, **30**, 143
Step edges
ab initio studies of single-height Si(001) steps, **30**, 167
Stoichiometry
electrical properties of cadmium diarsenide at low temperatures, **21**, 59
epitaxial ferroelectric thin films for memory applications, **22**, 283
identification of CuO as a minority phase in YBCO: X-ray diffraction *vs.* EMF and coulometric titration measurements, **22**, 310
optical and transport properties in the electro-optical material $CdIn_2Te_4$, **21**, 333
Strain
core-level photoemission study on a Bi-2212 single crystal, **22**, 217
fabrication and application of relaxed buffer layers, **30**, 201
Strain gauges
characterisation of a thin-film/thick-film strain gauge sensor on stainless steel, **26**, 13
Strain relaxation
lattice strain relaxation of ZnS layers grown by vapour-phase epitaxy on (100) GaAs, **28**, 55
Strained $Ge_xSi_{1-x}$
recrystallization of strained $Ge_xSi_{1-x}$/Si layers with various Ge gradients and in the presence of impurities, **28**, 9
Strained layers
relaxation of strained InGaAs/GaAs layers under thermal processing, **28**, 507
Stress
*in situ* growth of superconducting Y–Ba–Cu–O thin films by ion-beam sputtering method, **21**, 5
time dependence of stress and hillock distributions during electromigration in thin metal film interconnections, **23**, 15
Structural properties
differential scanning calorimetry study of structural relaxation of Ge-doped $Se_{85}Te_{15}$ glasses, **22**, 181
metal–organic vapour-phase epitaxial growth of symmetrically strained (GaIn)As/Ga(PAs) superlattices, **21**, 249
silicon on thin insulator: prediction of the oxygen fluence required for the formation of a continuous buried oxide, **22**, 172
structural properties of GaAs/Ge heterostructures as a function of growth conditions, **28**, 502
Structure
the preparation, structure, magnetic and electrical properties of $Cu^{I}Cu^{II}Mg_3(PO_4)_3$, **23**, 88
Subgrains misorientation
chemical etching of CdZnTe (111) surfaces, **27**, L11

Sublimation
electrical properties of cadmium diarsenide at low temperatures, **21**, 59
study of SiC single-crystal sublimation growth conditions, **29**, 90
Substitution
substitution for iron by non-magnetic constituents in spinel lithium ferrite, **25**, 73
Sulphides
growth and characterization of anodic sulphide films on $Hg_{0.80}Cd_{0.20}Te$ grown from freshly prepared solution and stored solution, **26**, L1
Sulphur
effects of thermal annealing on the properties of zirconia films prepared by ion-assisted deposition, **21**, 10
far-IR study of electron–phonon interaction and phase transition in $\alpha$-$In_2S_{3-x}Se_x$ ($2.4 < x < 3.0$) crystals, **30**, 27
the effects of sulphurizing agent on the formation of calcium lanthanum sulphide, **26**, 29
Superconducting films
subsurface overheating of targets in laser deposition of superconducting films, **23**, L9
Superconductivity
development of microstructure and superconductivity of silver-clad Bi(2223) composite tapes in the process of heat treatment, **23**, 58
potassium substitution in the $Bi_2Sr_2CaCu_2O_y$ superconductor, **25**, 153
stabilization of the high $T_c$ phase in the $Bi_{1.6}Pb_{0.3}M_{0.1}Sr_2Ca_2Cu_3O_y$ (M = W,Mo) superconducting system, **23**, 137
superconductivity of 1212-type phase $TlSr_2(Ca,Cr)Cu_2O_7$ and $TlSr_2(Sr,Tm)Cu_2O_7$, **23**, 54
suppression of superconductivity by magnetic field in quench-condensed ultrathin films of indium, **25**, 187
Superconductivity materials
d.c. and a.c. electrical properties of amorphous $Bi_4Sr_3Ca_3Cu_4O_{16}$, **26**, 103
microstructure and properties of high temperature superconducting materials, **26**, 75
Superconductors
investigations on the texture of Bi-based superconductor tapes, **23**, 1
rapid consolidation of Bi–Pb–Sr–Ca–Cu–O powders by a plasma activated sintering process, **26**, 55
reactivity of $BaSnO_3$ as additive agent with the 211 and 123 yttrium barium cuprates, **27**, 29
Superlattices
crystal defects in vertical cavity epitaxial structures on GaAs investigated by X-ray methods, **28**, 520
far-IR characterization of GaInAs/InP quantum wells and superlattices, **28**, 337
growth and characterization of $In_{0.53}Ga_{0.47}As/In_xGa_{1-x}As$ strained-layer superlattices, **21**, 244
metal–organic vapour-phase epitaxial growth of symmetrically strained (GaIn)As/Ga(PAs) superlattices, **21**, 249
optical characterization of chemical beam epitaxy grown $Ga_{0.52}In_{0.48}P$ layers and related microstructures, **28**, 151
optimization of growth parameters of short period InGaAs/InP superlattices for Wannier–Stark modulators, **28**, 305
the bulk and surface states of GaSb/AlSb/InAs superlattice, **25**, 99
the investigation of growth characteristics of single quantum wells grown on (311) GaAs substrates, **27**, 7
transmission electron microscopy study of $In_xGa_{1-x}As$/GaAs multilayer buffer structures used as dislocation filters, **28**, 515
Superstructure
substitution for iron by non-magnetic constituents in spinel lithium ferrite, **25**, 73
Surface and interface states
determination of the electronic structure of grain boundaries by energy-resolved photoconductivity measurements, **24**, 159
surface barrier height in metal–n-6H-SiC structures, **29**, 198
Surface composition
fluorine-intercalated carbon fibers II: An X-ray photoelectron spectroscopy study, **30**, 61
redistribution of atoms in the near-surface layer of multielemental solids related to variations of the ion beam parameters, **27**, 23
Surface defects
improvement of dark current of Ga(Al)Sb mesa diodes using $(NH_4)_2S$ treatment, **28**, 374
roughening and facetting in lattice-mismatched heteroepitaxial growth of compound semiconductors: a Monte Carlo study, **28**, 200
Surface diffusion
chemical synthesis of tantalum zirconate from alkoxide precursors, **21**, 88
diffusion controlled degradation analysis of high temperature $(Bi,Sb)_2(Te,Se)_3$ semiconductor thermoelectric power modules, **29**, 233
growth of diamond on Au (selective) and $Al_2O_3$ surfaces, **26**, 41
kinetic roughness in epitaxy (experimental), **30**, 137
observation of Si out-diffusion related defects in SiC growth on Si(001), **29**, 110
Surface dynamics
atomic force microscopy and scanning tunneling microscopy studies of large-scale unstable growth formed during GaAs(001) homoepitaxy, **30**, 143
kinetics of epitaxial growth and roughening, **30**, 149
mechanisms of layer growth during molecular beam epitaxy of semiconductor films, **30**, 87
Surface energy
fabrication and application of relaxed buffer layers, **30**, 201
structure and formation energy of steps on the GaAs(001)-$2 \times 4$ surface, **30**, 127
structure and thermodynamic stability of GaAs(001) surfaces, **30**, 81
surface barrier height in metal–n-6H-SiC structures, **29**, 198
Surface morphology
a new substrate holder for liquid phase epitaxy growth of $Hg_{1-x}Cd_xTe$ from Hg-rich solutions, **28**, 36
chemical beam epitaxy of high purity InP using tertiarybutylphosphine and 1,2 bis-phosphinoethane, **21**, 165
effect of chemical treatments on the composition of HgZnTe surfaces, **28**, 39
improvements in the heteroepitaxial growth of GaAs on Si by MOVPE, **21**, 266
influence of rapid thermal annealing on the properties of $SnO_2$ thin films, **30**, 1
kinetics of epitaxial growth and roughening, **30**, 149
metal–organic vapour phase epitaxy growth and Raman characterization of (111) A and B oriented GaAs/InP heterostructures, **28**, 164
role of steps in epitaxial growth, **30**, 121
Surface processing
$HBr–K_2Cr_2O_7–H_2O$ etching system for indium phosphide, **28**, 488

Surface reconstruction
two-dimensional phase separation and surface-reconstruction driven atomic ordering in mixed III–V layers, **30**, 187
Surface roughness
kinetic roughness in epitaxy (experimental), **30**, 137
photon tunneling from semiconductor surfaces to atomic force microscopy probes, **28**, 493
Surface segregation
preparation by molecular beam epitaxy and atomic layer molecular beam epitaxy and characterization of InAs layers 1 monolayer thick in GaAs-based structures, **28**, 183
transmission electron microscopy and X-ray diffraction investigation of In segregation in MOVPE-grown InGaAs-based MQWs with either GaAs or AlGaAs barriers, **28**, 346
Surface states
the bulk and surface states of GaSb/AlSb/InAs superlattice, **25**, 99
Surface stress
current gain deterioration in carbon-doped AlGaAs/GaAs heterojunction bipolar transistors during high-temperature bias stress tests, **28**, 257
Surface structure
influence of surface treatment on electrical activity of dislocations and minority carrier diffusion length in cast multicrystalline silicon, **24**, 74
structure and formation energy of steps on the GaAs(001)-$2 \times 4$ surface, **30**, 127
structure and thermodynamic stability of GaAs(001) surfaces, **30**, 81
Surfaces
observation and analysis of epitaxial growth with reflectance-difference spectroscopy, **30**, 109
X-ray photoelectron spectroscopy analyses of the surface and interface of Pd-based p-GaP ohmic contact layer, **25**, 24
Surfactants
atomic structure of surfactant monolayers and its role in epitaxial growth, **30**, 175
Synchrotron topography
synchrotron topography characterization of ZnTe single crystals, **27**, 143
Synthesis
pathways for the low temperature synthesis of nano-sized crystalline barium zirconate, **23**, 29
synthesis and characterization of ultrafine powders of SiC–$Si_3N_4$, **23**, 10

**T**

Tantalum
molten salt synthesis and dielectric properties of $Pb(Fe_{1/2}Nb_{1/2}$–$Pb(Fe_{1/2}Ta_{1/2})O_3$ (PFN–PFT) solid solutions, **22**, 133
study of the concentration distribution of SiC vapour in the crystal growth zone, **21**, 83
Tellurium
correlations between the thermoelectric power and Hall effect of Sn or Ge doped $In_2O_3$ semiconductors, **22**, 274
effects of thermal annealing on the properties of zirconia films prepared by ion-assisted deposition, **21**, 10
Temperature dependence
island formation in Ge/Si epitaxy, **30**, 197
Temperature effect
on the effect of the recombination within the depletion zone on the EBIC signal at Schottky contact, **24**, 101
Ternary compounds
aluminium-free 980 nm laser diodes, **21**, 211
core-level photoemission study on a Bi-2212 single crystal, **22**, 217
effects of deep levels and Si-doping on GaInP material properties investigated by means of optical methods, **21**, 181
gamma-ray diffraction in the study of silicon, **22**, 149
growth and characterization of $In_{0.53}Ga_{0.47}As/In_xGa_{1-x}As$ strained-layer superlattices, **21**, 244
ineffective grain boundaries and breakdown threshold of zinc oxide varistors, **22**, 261
large negative persistent photoconductivity of bulk $GaAs_{1-x}P_x$ ($x = 0.02$–$0.03$) single crystals, **21**, 325
molten salt synthesis and dielectric properties of $Pb(Fe_{1/2}Nb_{1/2}$–$Pb(Fe_{1/2}Ta_{1/2})O_3$ (PFN–PFT) solid solutions, **22**, 133
room temperature photoreflectance as a powerful tool to characterize the crystalline quality of InAlAs layers grown on InP substrates, **21**, 177
strain effects on carrier lifetimes in InGaAs/(Al)GaAs multiple quantum wells, **21**, 253
Texture
investigations on the texture of Bi-based superconductor tapes, **23**, 1
Thallium
superconductivity of 1212-type phase $TlSr_2(Ca,Cr)Cu_2O_7$ and $TlSr_2(Sr,Tm)Cu_2O_7$, **23**, 54
Theory of electron structure
cation dependence of the electronic structure of AlAs and GaAs, **25**, 79
Theory of electron transport
many-particle theory of electron transport processes in transition liquid and amorphous metals, **26**, 141
Theory of electronic structure
epitaxial ferroelectric thin films for memory applications, **22**, 283
oxygen ion conductivity in $Ba_3In_{3-x}Zr_xO_{7.5+x/2}$ ($x = 0.7$–$1.3$), **22**, 313
Theory of recombination
the relation between EBIC contrast and recombination velocity of a grain boundary, **24**, 61
two types of electron-beam-induced current behaviour of misfit dislocations in Si(Ge): experimental observations and modelling, **24**, 78
Theory of scattering
determination of the lateral distribution of electron–hole pairs generated by an electron beam in $Al_{0.4}Ga_{0.6}As$ by cathodoluminescence, **24**, 124
Theory of superconductivity
oxygen ion conductivity in $Ba_3In_{3-x}Zr_xO_{7.5+x/2}$ ($x = 0.7$–$1.3$), **22**, 313
Theory of transport policies
strain relaxation studied by photoluminescence and by double crystal X-ray diffraction measurements in strained InGaAs, **22**, 222
Thermal annealing
*in situ* growth of superconducting Y–Ba–Cu–O thin films by ion-beam sputtering method, **21**, 5
chemical synthesis of tantalum zirconate from alkoxide precursors, **21**, 88
improvements in the heteroepitaxial growth of GaAs on Si by MOVPE, **21**, 266
preparation and characterization of semi-insulating undoped indium phosphide, **28**, 95
spray pyrolysis deposition for indium oxide doped with different impurities, **22**, 233

Thermal conductivity
thermal diffusivity, specific heat, and thermal conductivity of $(Ca_{1-x},Mg_x)Zr_4(PO_4)_6$ ceramic, **23**, 94
Thermal diffusion
diffusion controlled degradation analysis of high temperature $(Bi,Sb)_2(Te,Se)_3$ semiconductor thermoelectric power modules, **29**, 233
quantitative investigation of interdiffusion effects in balanced-strain InGaAs(P)/InGaAsP heterostructures: constant $x$ vs. constant $y$, **28**, 353
Rutherford backscattering studies of solid phase recrystallization and incorporation in erbium-implanted silicon, **30**, L1
thermally induced change in the profile of GaAs/AlGaAs quantum wells, **28**, 332
Thermal diffusivity
thermal diffusivity of $BaLiF_3$ crystals, **25**, 133
thermal diffusivity, specific heat, and thermal conductivity of $(Ca_{1-x},Mg_x)Zr_4(PO_4)_6$ ceramic, **23**, 94
Thermal evaporation
Au spreading on GaSb substrates, **21**, 94
Thermal processing
analytical expressions for sputter and diffusion-modified ion implantation profiles, **22**, L1
photothermal scanning near-field microscopy, **24**, 226
room temperature photoreflectance as a powerful tool to characterize the crystalline quality of InAlAs layers grown on InP substrates, **21**, 177
Thermal properties
electrical properties of cadmium diarsenide at low temperatures, **21**, 59
molten salt synthesis and dielectric properties of $Pb(Fe_{1/2}Nb_{1/2}-Pb(Fe_{1/2}Ta_{1/2})O_3$ (PFN–PFT) solid solutions, **22**, 133
phase equilibria in the In–Pt–As system at 600°C, **22**, 267
silicon on thin insulator: prediction of the oxygen fluence required for the formation of a continuous buried oxide, **22**, 172
static and dynamic behaviour of power devices in silicon-direct-bonded substrates, **29**, 13
the effects of deposition conditions on microstructure and morphology of r.f.-magnetron sputtered GdTbFeCo thin films, **21**, 77
thermal diffusivity of $BaLiF_3$ crystals, **25**, 133
Thermal response
thermal response of optical fibers to metallization processing, **23**, L5
Thermally stimulated current
spectroscopic investigation of deep levels related to the compensation mechanism of nominally undoped semi-insulating InP, **28**, 101
Thermoelectric devices
diffusion controlled degradation analysis of high temperature $(Bi,Sb)_2(Te,Se)_3$ semiconductor thermoelectric power modules, **29**, 233
Thermoelectric properties
boron-rich solids: a chance for high-efficiency high-temperature thermoelectric energy conversion, **29**, 228
Thermomechanical treatments
investigations on the texture of Bi-based superconductor tapes, **23**, 1
Thick films
characterisation of a thin-film/thick-film strain gauge sensor on stainless steel, **26**, 13
thermodynamic aspects of (Te, S)-double-doped GaSb crystal growth, **21**, 14
Thin films
a study of the Zn-doping process in metal-organic chemical vapour deposition GaAs and GaAlAs, **30**, 39
a study of the growth and shrinkage of stacking faults in SIMOX, **29**, 24
analytical expressions for sputter and diffusion-modified ion implantation profiles, **22**, L1
Au spreading on GaSb substrates, **21**, 94
characterisation of a thin-film/thick-film strain gauge sensor on stainless steel, **26**, 13
characterization of the Z luminescence system in high purity CdTe, **26**, 1
chemical vapour deposition of diamond from a novel capacitively coupled r.f. plasma source, **29**, 216
complex admittance study of potassium yttrium fluoride, **22**, 159
deposition and optical properties of amorphous hydrogenated $Si_xC_y$ layers, **29**, 151
development of (001) texture of MnSb in thin films prepared by interdiffusion of Mn/Sb multilayers, **27**, 109
development of chemical beam epitaxy for the deposition of gallium nitride, **29**, 78
diamond, diamond-like and titanium nitride biocompatible coatings for human body parts, **25**, 5
effect of pressure during deposition on the growth of gold thin films onto polycrystalline $\gamma$-$Al_2O_3$, **25**, 111
effect of previous heat treatment on ionic conductivity of yttrium-doped KBr crystals, **21**, 1
elaboration, characterization and electrical properties of Na–Al–O thin films, **26**, 181
evaluation of elastic moduli in thin-film/substrate systems by the two-layer vibrating reed method, **30**, 35
influence of preparation procedure on some physical properties of BICUVOX, **21**, 70
influence of rapid thermal annealing on the properties of $SnO_2$ thin films, **30**, 1
influence of temperature on the properties of $SiC_xN_y$:H films prepared by plasma-enhanced chemical vapour deposition, **26**, 133
low energy positron beam studies of nano-TiN films, **26**, 163
magnetic properties of Co–Ni–Mg–N thin films, **27**, 17
microstructural and mechanical effects of oxide addition into a thin $ZrO_2$ matrix, **26**, 175
microstructure and properties of lead ferroniobate ceramics $(Pb(Fe_{0.5}Nb_{0.5})O_3)$, **21**, 26
numerical simulation studies of concentration profile and growth rate of InP LPE, **22**, 227
optical characterization of $As_2S_3$ and $As_2Se_3$ semiconducting glass films of non-uniform thickness from transmission measurements, **25**, 53
optical emission end point detection for reactive ion etching of Si/SiGe structures, **27**, 39
phenomenon of bistability in luminescence, **28**, 444
photothermal scanning near-field microscopy, **24**, 226
study of the growth rate of diamond film by hot-filament CVD, **25**, 47
suppression of superconductivity by magnetic field in quench-condensed ultrathin films of indium, **25**, 187
temperature dependence of the thin film silicon-on-insulator field effect transistor current characteristics based on full solution for the one-dimensional MISIS structure, **29**, 38
the properties of heavily compensated high resistivity GaSb crystals, **22**, 279
tungsten diselenide thin films synthesized on tungsten foils, **26**, 67
X-ray photoelectron spectroscopy study of $Sn^+$ implanted a-$Si_{1-x}C_x$:H thin films, **29**, 165

Young's modulus of MnAl and MnBi films, **25**, L7
Thin metal films
contact resistivity of Re, Pt and Ta films on n-type β-SiC: preliminary results, **29**, 185
Tin
wetting of Si–Al–O–N ceramic by Sn–5at.%Ti–X ternary active solder, **25**, 39
Tin Oxide
influence of rapid thermal annealing on the properties of $SnO_2$ thin films, **30**, 1
Tin sulphide
resonant Raman scattering studies of $SnS_2$ crystals, **23**, 98
Titanium
Raman and infrared spectroscopic studies of Ge–Ga–Ag sulphide glasses, **22**, 191
Titanium dioxide
electrical conductivity of rutile single crystals after heating by pulsed laser, **25**, 92
UV and infrared studies of $TiO_2$ thin film cathodes in $Ag/AgI/TiO_2$, $SnO_2$ photosensitive galvanic cells, **23**, 41
Titanium nitride
low energy positron beam studies of nano-TiN films, **26**, 163
TMAA
photo-assisted direct writing of conducting aluminum, **30**, L5
Total binding energy
structure and formation energy of steps on the GaAs(001)-$2 \times 4$ surface, **30**, 127
Transient electron microscopy
light-beam-induced transient spectroscopy of oxidation-induced stacking faults in silicon, **24**, 167
Transition metals
cathodoluminescence imaging of misfit dislocations in Si/SiGe epitaxial layers: the influence of transition metal contamination, **24**, 48
electron-beam-induced activity of defects in silicon, **24**, 8
Transmission electron microscopy
a study of the defect structure in GaAs layers grown at low and high temperatures on Si(001) substrates, **28**, 196
defects in GaAs after Si indiffusion and annealing: a TEM and CL study, **30**, 43
failure mechanisms in II–VI blue–green emitters, **28**, 29
step-graded buffer layer study of the strain relaxation by transmission electron microscopy, **28**, 497
structural, optical and electrical properties of state of the art cubic SiC films, **29**, 160
the characteristics of intimate Au–$In_yAl_{1-y}As$ Schottky diodes: a mismatch dependence study, **28**, 433
transmission electron microscopy and X-ray diffraction investigation of In segregation in MOVPE-grown InGaAs-based MQWs with either GaAs or AlGaAs barriers, **28**, 346
transmission electron microscopy investigation of extended defects in heavily Se-doped bulk GaSb, **28**, 142
transmission electron microscopy study of $In_xGa_{1-x}As$/GaAs multilayer buffer structures used as dislocation filters, **28**, 515
Transmission electron spectroscopy
influence of preparation procedure on some physical properties of BICUVOX, **21**, 70
optical effects of buried conductive layers formed by MeV ion implantation, **22**, 297
thermodynamic aspects of (Te, S)-double-doped GaSb crystal growth, **21**, 14
Transport properties
far-infrared spectra of lithium–titanium mixed ferrites, **22**, 201
optical and transport properties in the electro-optical material $CdIn_2Te_4$, **21**, 333
simulation of lateral Al recoil atoms and damage defects gradients in a GaAs/GaAlAs quantum well created by masked ion implantation, **21**, 284
Tungsten
*in situ* growth of Y–Ba–Cu–O films by ion beam sputtering, **22**, 165
interfacial reactions of W thin film on single-crystal (001) β-SiC, **29**, 126
$NdGaO_3$ substrates with defined grain boundaries prepared by welding or soldering, **21**, 36
tungsten metallization technology for high temperature silicon-on-insulator devices, **29**, 18
Tunnelling
photothermal scanning near-field microscopy, **24**, 226
Twinned crystals
preparation and properties of new ternary compound crystals of $(Cr,Fe)_3Si_2$ by in-situ chemical vapor deposition, **27**, 73
Twins
synchrotron topography characterization of ZnTe single crystals, **27**, 143
Two-layer vibrating reed method
a study of the Zn-doping process in metal-organic chemical vapour deposition GaAs and GaAlAs, **30**, 39
evaluation of elastic moduli in thin-film/substrate systems by the two-layer vibrating reed method, **30**, 35
Type II superconductivity
a.c. and d.c. susceptibility studies on silver-doped BPSCCO (2223) superconductors, **26**, 151
1212-type phase
superconductivity of 1212-type phase $TlSr_2(Ca,Cr)Cu_2O_7$ and $TlSr_2(Sr,Tm)Cu_2O_7$, **23**, 54

**U**
Ultrathin films
vibrational diagnostics of the epitaxial growth of ultrathin films of sodium on Cu(001), **23**, 123
Ultraviolet
UV and infrared studies of $TiO_2$ thin film cathodes in $Ag/AgI/TiO_2$, $SnO_2$ photosensitive galvanic cells, **23**, 41
Ultraviolet spectroscopy
growth of a Ge/Si/Ge(100) heterostructure by very low pressure chemical vapour deposition using $Si_2H_6$ and $GeH_4$ gases—photoemission and low energy electron diffraction studies, **28**, 14

**V**
Vanadium
magnetic circular dichroism and electron spin resonance of the $A^-$ acceptor state of vanadium, $V^{3+}$, in 6H-SiC, **29**, 118
Vapour phase epitaxy
morphological modifications during selective growth of InP around cylindrical and parallelepiped mesas, **28**, 179
selective epitaxial growth of SiGe alloys—influence of growth parameters on film properties, **28**, 1
Vapourization
the effects of deposition conditions on microstructure and morphology of r.f.-magnetron sputtered GdTbFeCo thin films, **21**, 77
Varistors
influence of carbon on the phase transformation kinetics and magnetic properties of Mn–Al alloys, **22**, 256

Via holes
optical emission end point detection for via hole etching in InP and GaAs power device structures, **23**, 36
Vibration of atoms
Raman and infrared spectroscopic studies of Ge–Ga–Ag sulphide glasses, **22**, 191
synthetic diamond: the optical band at 1.883 eV, **21**, 329
Vibrational diagnostics
vibrational diagnostics of the epitaxial growth of ultrathin films of sodium on Cu(001), **23**, 123
Viscosity
energy functions, structure, mechanism of solidification, modulus of rupture and tensile tests of the binary organic eutectic system benzoic acid–diphenylamine, **25**, 11

**W**
Wafers
characterization of implanted silicon wafers by the non-linear photoreflectance technique, **24**, 199
mapping of defects and their recombination strength by a light-beam-induced current in silicon wafers, **24**, 152
measurements of carrier diffusion length in processed wafers: correlation with the electrical behaviour, **24**, 192
Weak ferromagnetism
magnetic properties of $Ba_2Cu_3O_4Cl_2$ single crystals, **25**, 167
Wetting
wetting of Si–Al–O–N ceramic by Sn–5at.%Ti–X ternary active solder, **25**, 39
Whiskers
preparation and properties of new ternary compound crystals of $(Cr,Fe)_3Si_2$ by in-situ chemical vapor deposition, **27**, 73
preparation of SiC and $Si_3N_4$ whiskers using bean-curd refuse as the Si source, **30**, 13
WTiAu
thermally stable WTiAu non-alloyed ohmic contacts on $In_{0.5}Ga_{0.5}As$ for GaAs–AlGaAs heterojunction bipolar transistor applications, **25**, 175

**X**
X-ray
study of the photodecay in CdTe X-ray detectors, **28**, 47
X-ray diffraction
investigation of the cationic ordering in InGaP/GaAs epilayers grown by low-pressure, metal organic vapour phase epitaxy, **28**, 219
investigations on Pd/In-based high temperature stable ohmic contacts on GaAs by X-ray reflectometry and diffractometry, **29**, 70
lattice strain relaxation of ZnS layers grown by vapour-phase epitaxy on (100) GaAs, **28**, 55
structural and electronic characterization of β-SiC films on Si grown from mono-methylsilane precursors, **29**, 154
the effects of sulphurizing agent on the formation of calcium lanthanum sulphide, **26**, 29
X-ray photoelectron diffraction
effect of chemical treatments on the composition of HgZnTe surfaces, **28**, 39
X-ray photoelectron spectroscopy
application of angle resolved X-ray photoelectron spectroscopy to the study of GaAs (001) surfaces and metal/GaAs (001) interfaces, **28**, 527
X-ray scattering
impact of thermal treatments on deep level behaviour in semi-insulating GaAs, **22**, 241
X-ray spectroscopy
*in situ* growth of superconducting Y–Ba–Cu–O thin films by ion-beam sputtering method, **21**, 5
characterization study of CdS passivation layers on $Hg_xCd_{1-x}Te$, **28**, 43
conductivity and phase structure of blend based proton polymeric electrolytes I: Complexes with phosphoric acid, **22**, 107
core-level photoemission study on a Bi-2212 single crystal, **22**, 217
depth profiling of InAs/InP and $In_xGa_{1-x}As$/InAs heterostructures grown by molecular beam epitaxy, **28**, 228
dielectric relaxations in ceramics with compositions $(1-x)Pb(Mg_{1/3}Nb_{2/3})O_3 - xPbTiO_3$ ($x = 0$, 0.05, 0.10 and 0.25), **22**, 303
fluorine-intercalated carbon fibers II: An X-ray photoelectron spectroscopy study, **30**, 61
improvement of dark current of Ga(Al)Sb mesa diodes using $(NH_4)_2S$ treatment, **28**, 374
ineffective grain boundaries and breakdown threshold of zinc oxide varistors, **22**, 261
investigation of MOVPE-grown $In_{0.53}Ga_{0.47}As$/InP multi-quantum wells by Raman spectroscopy and X-ray diffractometry, **21**, 161
mechanisms of strain release in molecular beam epitaxy grown InGaAs/GaAs buffer heterostructures, **28**, 510
metal–organic vapour-phase epitaxial growth of symmetrically strained (GaIn)As/Ga(PAs) superlattices, **21**, 249
stability of cubic $ZrO_2$ (10 mol.% $Y_2O_3$) when alloyed with NiO, $Al_2O_3$ or $TiO_2$: implications to solid electrolytes and cermets, **22**, 247
synthesis and transport properties of mixed MEEP–PEO–NaSCN polymer electrolytes, **22**, 206
X-ray characterization of very thin $Ga_xIn_{1-x}P$ ($x \sim 0.5$) layers grown on InP, **28**, 188
X-ray photoelectron spectroscopy analyses of the surface and interface of Pd-based p-GaP ohmic contact layer, **25**, 24
X-ray photoelectron spectroscopy study of $Sn^+$ implanted a-$Si_{1-x}C_x$:H thin films, **29**, 165
X-ray studies
in-situ X-ray studies of organometallic vapor phase epitaxy growth, **30**, 99
X-rays
the problem of convolution in the simulation of multicrystal X-ray rocking curves of semiconductor materials, **28**, 523

**Y**
YBCO
reactivity of $BaSnO_3$ as additive agent with the 211 and 123 yttrium barium cuprates, **27**, 29
Young's modulus
characterization of the Z luminescence system in high purity CdTe, **26**, 1
Young's modulus of MnAl and MnBi films, **25**, L7
Yttrium
electrical conduction in MnTe and MnSe films, **21**, L1

**Z**
Zinc
stability of phase-separated microstructure in LPE-grown InGaAs epitaxial layers, **28**, 209
Zinc oxide
influence of carbon on the phase transformation kinetics and magnetic properties of Mn–Al alloys, **22**, 256

Zinc selenide
blue diode lasers and visible optoelectronic devices, **21**, 205
determination of residual strain by reflectivity, X-ray diffraction and Raman spectroscopy in ZnSe epilayers grown on GaAs(001), InP(001) and GaSb(001) by metal–organic vapor phase epitaxy, **21**, 257
optical characterization of extremely high purity ZnSe grown by metal–organic vapour phase epitaxy using dimethylzinc-triethylamine adduct, **21**, 169
scanning tunneling microscopy studies of the GaAs(001) surface and the nucleation of ZnSe on GaAs(001), **30**, 73
Zirconium
*in situ* growth of superconducting Y–Ba–Cu–O thin films by ion-beam sputtering method, **21**, 5
identification of CuO as a minority phase in YBCO: X-ray diffraction *vs.* EMF and coulometric titration measurements, **22**, 310
study of the concentration distribution of SiC vapour in the crystal growth zone, **21**, 83
study of the equilibrium processes in the gas phase during silicon carbide sublimation, **21**, 65
Zirconium dioxide
complex admittance study of potassium yttrium fluoride, **22**, 159
impact of thermal treatments on deep level behaviour in semi-insulating GaAs, **22**, 241
ZnMgSSe
molecular beam epitaxial growth and characterization of II–VI blue–green laser diodes having continuous-wave operation at room temperature, **28**, 51
ZnS epilayers
lattice strain relaxation of ZnS layers grown by vapour-phase epitaxy on (100) GaAs, **28**, 55
